5. MAINTENANCE

5.1 Cleaning

Wipe the bed frame with a soft, damp cloth. Avoid using harsh chemicals, abrasive cleaners, or excessive moisture, as these can damage the wood finish. For spills, wipe immediately.

5.2 Wood Care

This bed frame is made from natural wood. Over time, natural wood may show minor imperfections or changes in appearance. If desired, you can apply wood stain or oil to protect the wood and customize its color. Follow the instructions of the specific wood treatment product you choose.

5.3 Ventilation

To maximize the benefits of the slatted base and prevent mold, ensure good air circulation around and under the bed. Periodically air out your mattress and bedding.

6. TROUBLESHOOTING

6.1 Instability

If the bed frame feels unstable, check all screws and connections to ensure they are tightened properly. Ensure the bed is placed on a flat, even surface.

6.2 Power Outlet Not Working

Verify that the bed frame's power cord is securely plugged into a functional wall outlet. Check if the wall outlet itself is receiving power. If issues persist, contact customer support.
