6. Care & Maintenance

6.1 Boucle Upholstery Care

- Regularly vacuum the boucle fabric with a soft brush attachment to remove dust and debris.
- For spills, blot immediately with a clean, dry cloth. Do not rub, as this can spread the stain.
- For stubborn stains, use a mild fabric cleaner specifically designed for upholstery. Test on an inconspicuous area first.
- Avoid direct sunlight to prevent fading of the fabric.

6.2 Frame Care

- Wipe metal and wood components with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners.
- Periodically check all bolts and screws to ensure they remain tight. Retighten as necessary to maintain stability and prevent noise.
- Avoid dragging the bed frame when moving it; lift it to prevent damage to the frame and your flooring.

7. Troubleshooting

7.1 Bed Frame is Noisy

- **Check all connections:** Ensure all bolts and screws are securely tightened. Loose connections are a common cause of noise.
- **Verify slat placement:** Make sure all wooden slats are correctly seated in their plastic holders and evenly distributed.
- **Inspect mattress:** Sometimes, the mattress itself can be the source of noise. Try removing the mattress and testing the frame.

7.2 Drawers are Difficult to Open/Close

- **Check for obstructions:** Ensure nothing is blocking the wheels or the path of the drawers under the bed.
- **Inspect wheels:** Verify that the wheels are clean and free of debris.
- **Even loading:** Ensure the contents of the drawers are evenly distributed and not overloaded.

7.3 Headboard Feels Loose

- **Tighten fasteners:** Check the bolts connecting the headboard to the bed frame and tighten them if loose.
- **Ensure proper installation:** Refer to the assembly manual to confirm the headboard was installed correctly.
