## 2. INITIAL SETUP

### 2.1. Inserting SIM Cards and MicroSD Card

The CUBOT Kingkong 11 supports dual SIM cards and a MicroSD card for expanded storage.

1. Locate the SIM card tray on the side of the device.
2. Use the provided SIM ejector tool to open the tray.
3. Carefully place your Nano-SIM cards and/or MicroSD card into the designated slots. Ensure correct orientation.
4. Gently push the tray back into the device until it is flush with the side.

## 2.2. Powering On and Initial Charge

1. Press and hold the power button located on the side of the device until the CUBOT logo appears.
2. For first-time use, it is recommended to fully charge the device. Connect the USB-C cable to the phone and the 33W fast charger to a power outlet.
3. The battery indicator on the screen will show charging status.

## 2.3. Software Configuration

Follow the on-screen prompts to complete the initial setup, including language selection, Wi-Fi connection, Google account login, and security settings (Face ID/Fingerprint).

## 3. OPERATION

### 3.1. Android 15 Operating System

The CUBOT Kingkong 11 runs on Android 15, offering an intuitive user interface and enhanced features. Navigate through apps, customize settings, and utilize smart functions for an optimized experience.

Image: Screenshot of the Android 15 operating system interface on the CUBOT Kingkong 11.

### 3.2. Main Display (6.72" FHD+ 120Hz)

The 6.72-inch FHD+ display provides vibrant visuals with a 120Hz refresh rate for smooth scrolling and gaming. The 1080x2400 resolution ensures clear and detailed content viewing.

## Hasta 32GB de RAM (16GB + 16GB Ampliados)

### 3.4. Camera System

The device features a versatile quad-camera system:

- **108MP Main Camera:** Captures high-resolution photos with impressive detail.
- **32MP Front Camera:** For high-definition selfies and video calls.
- **24MP Night Vision Camera:** Equipped with infrared LEDs for clear imaging in complete darkness.
- **8MP Macro Lens:** Allows for close-up photography, capturing intricate details of small subjects.

## 4. MAINTENANCE

### 4.1. Durability and Protection

The CUBOT Kingkong 11 is certified with IP68/IP69K for dust and water resistance, and MIL-STD-810H for shock resistance. It can withstand submersion in water up to 5 meters for 30 minutes.

- **Water Resistance:** Ensure all ports (USB-C, SIM tray) are properly sealed before exposing the device to water. After exposure to water, dry the device thoroughly before charging.
- **Dust Resistance:** The device is designed to prevent dust ingress. Clean any accumulated dust from ports and crevices using a soft, dry brush.
- **Shock Resistance:** While rugged, avoid intentional drops or impacts from extreme heights to preserve the device's integrity.

## 4.2. Cleaning

Use a soft, lint-free cloth to clean the screen and body of the phone. For stubborn smudges, a slightly damp cloth can be used, followed by immediate drying.

## 5. TROUBLESHOOTING

---

### 5.1. Device Not Powering On

- Ensure the battery is charged. Connect the charger and wait a few minutes before attempting to power on again.
- Press and hold the power button for at least 10-15 seconds to perform a forced restart.

### 5.2. Poor Performance/Lag

- Close unnecessary background applications.
- Clear cache data for frequently used apps.
- Ensure sufficient storage space is available. Consider moving large files to the MicroSD card or cloud storage.
- Restart the device periodically.

### 5.3. Charging Issues

- Verify that the charging cable and adapter are securely connected and undamaged.
- Try using a different compatible charger and cable.
- Check the USB-C port for any debris or obstruction.

### 5.4. Network Connectivity Problems

- Ensure SIM cards are correctly inserted and activated.
- Check network settings (e.g., APN settings) with your service provider.
- Toggle Airplane Mode on and off.
- Restart the device.
