## TROUBLESHOOTING

### Desk Wobbles After Assembly:

Ensure all screws and fasteners are fully tightened. Check that the desk is on a level surface. If necessary, use furniture pads under the legs to stabilize.

### Drawer or Sliding Door Sticks:

Check for any obstructions in the tracks or slides. Ensure the desk is assembled correctly and is not warped. Apply a small amount of silicone lubricant to the tracks if needed (for sliding doors).

### Desktop Gaps:

As noted, the desktop is spliced together, and minor gaps are a normal characteristic of the design and do not affect structural integrity or functionality.
