ABBIDOT AB-T70

ABBIDOT AB-T70 Dog Training Collar User Manual

Model: AB-T70

1. INTRODUCTION

This manual provides instructions for the ABBIDOT AB-T70 Dog Training Collar. This system is designed to assist in training dogs weighing 5 to 120 lbs, offering a range of up to 4500 feet. It features six training modes including beep, vibration, and static stimulation, along with an enhanced night light and IPX7 waterproof rating for the collar.

2. SAFETY INFORMATION

Please read all safety and product information before using your ABBIDOT training collar. Failure to follow these instructions could result in injury to your dog or damage to the product.

- **Not for Aggressive Dogs:** Do not use this product on aggressive dogs. If your dog is aggressive, consult a

professional trainer.

- **Skin Irritation:** Prolonged wear or improper fit can cause skin irritation. Regularly check your dog's neck for signs of redness or sores.

- **Collar Fit:** Ensure the collar fits snugly but not too tightly. You should be able to fit two fingers comfortably between the collar and your dog's neck.

- **Supervision:** Always supervise your dog during training sessions.

- **Water Exposure:** While the collar is IPX7 waterproof, it is recommended to keep the collar as dry as possible to maintain your dog's comfort and skin health, especially after water activities.

- **Children:** Keep the training system out of reach of children.

3. Package Contents

The ABBIDOT AB-T70 Dog Training Collar package includes the following items:

Image: All components included in the ABBIDOT AB-T70 Dog Training Collar package.

- T70 Remote Control
- T70 Collar Receiver with Strap
- User Manual (this document)
- Dog Training Booklet
- Type-C Charging Cable
- Lanyard
- Test Light Tool
- Silicone Caps (4x)
- Contact Points (4x)
- Metal Extension Contact (optional, for long-haired dogs)

4. Setup and Fitting

4.1 Charging the Devices

Before first use, fully charge both the remote control and the collar receiver. Use the provided Type-C charging cable. The remote lasts up to 55 days, and the collar receiver lasts up to 45 days on a full charge.

4.2 Attaching Contact Points (Optional)

The collar receiver comes with standard contact points. For dogs with thicker coats, you may need to attach the longer metal extension contacts to ensure proper contact for static stimulation. If you do not intend to use the static stimulation function, these accessories are not required.

4.3 Fitting the Collar

Proper fit of the collar is essential for effective training and your dog's comfort. The collar is suitable for dogs with neck sizes ranging from 6 to 27 inches and weighing between 5 and 120 pounds.

1. Place the receiver on your dog's neck, ensuring the contact points (if installed) are positioned beneath the neck.

2. Adjust the strap so it is snug but not tight. You should be able to fit two fingers comfortably between the collar and your dog's neck.

3. Trim any excess strap length if necessary, ensuring the end is secured.

Image: Visual guide for adjusting the collar strap to fit different dog sizes.

4.4 Pairing the Remote and Receiver

The remote and receiver are typically pre-paired. If re-pairing is needed:

1. Turn on the remote and the receiver.

2. Press and hold the power button on the receiver until the indicator light flashes rapidly.

3. On the remote, select a channel (if applicable) and press any training button (e.g., Beep or Vibration). The receiver light will become solid, indicating successful pairing.

5. OPERATING THE TRAINING COLLAR

The ABBIDOT AB-T70 offers six training modes and a user-friendly display for easy control.

5.1 Remote Control Overview

Image: The remote control's oversized display, showing various indicators and settings for clear visibility.

The remote features an oversized display for clear visibility of settings and modes. Buttons are intuitively placed for quick access to training functions.

5.2 Training Modes

The system includes six distinct training modes:

- **Beep (Audible Tone):** Three distinct audible tones, each with 9 adjustable intensity levels. Used for attention-getting or as a warning.

- **Vibration:** 36 adjustable intensity levels. Provides a tactile cue without static.

- **Static Stimulation:** 118 adjustable intensity levels. Delivers a safe, momentary static pulse. Use the lowest effective level.

- **Custom Mode:** Allows for personalized settings combining tone and vibration.

Image: Detail of the remote control showing buttons for Tone, Super (Custom), and Vibra modes, and the static session lock/unlock feature.

5.3 Static Session Lock/Unlock

To prevent accidental static stimulation, the remote features a lock mechanism. Push down the knob on the remote to lock/unlock the static session. Rotate the knob to adjust the static level when unlocked.

PACKAGING & ACCESSORIES

1. T70 Remote
2. T70 Collar with Strap
3. User Manual
4. Dog Training Booklet
5. Package
6. Metal Extension Contact
7. Test Light Tool
8. Silicone Caps*4
9. Contact Points*4
10. Type-C Cable
11. Lanyard

5.5 Operating Range and Multi-Dog Support

The system offers an extended control range of up to 4500 feet, allowing for training in various environments. The remote control can manage up to 6 dogs simultaneously, each on a separate channel.

Image: An illustration showing the remote control's 4500-foot range and its ability to control multiple dogs.

6. Maintenance

6.1 Cleaning

Wipe the remote control and the receiver with a damp cloth as needed. Avoid using harsh chemicals or abrasive cleaners.

6.2 Water Resistance

The collar receiver is IPX7 waterproof, meaning it can withstand immersion in water up to 1 meter for 30 minutes. The remote control is IPX5 water-resistant, protecting against splashes but not immersion. Always ensure the charging port covers are securely closed.
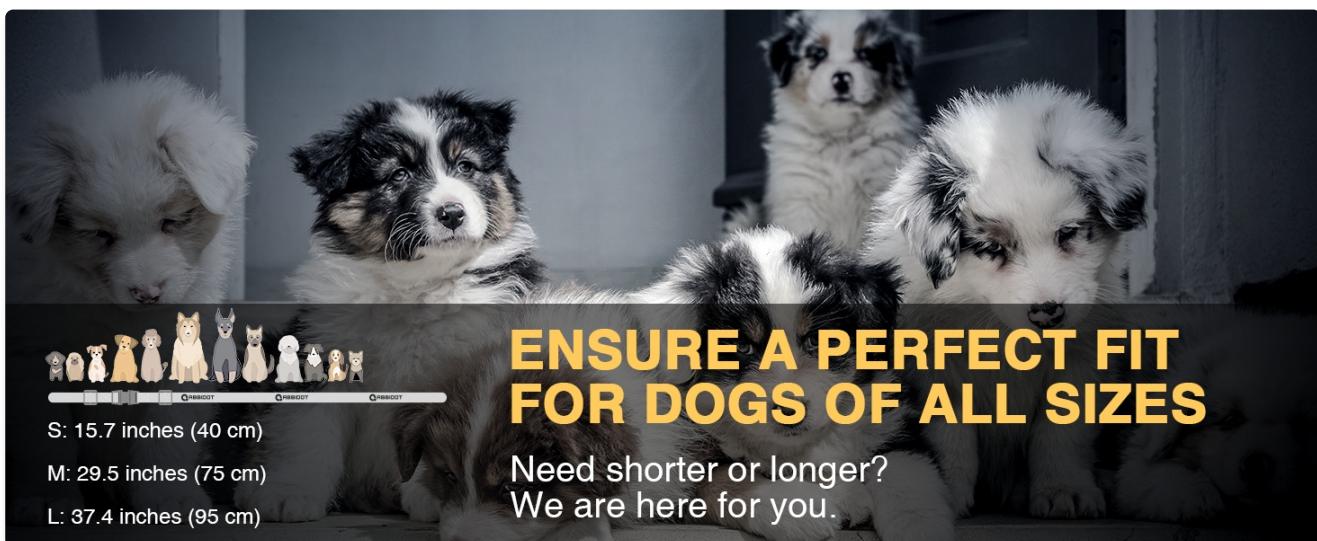

Image: A dog splashing in water, illustrating the IPX7 waterproof rating of the collar and IPX5 water resistance of the remote.

6.3 Battery Care

To maximize battery life, avoid fully discharging the devices frequently. Charge them when the battery indicator is low. Store in a cool, dry place when not in use for extended periods.

7. TROUBLESHOOTING

Problem	Possible Solution
Collar not responding to remote.	Ensure both devices are powered on. Check battery levels on both devices. Re-pair the remote and receiver (refer to Section 4.4). Ensure you are within the 4500 ft operating range.
Static stimulation is not working.	Ensure the static session is unlocked on the remote. Check that the contact points are making proper contact with your dog's skin. Use longer contact points for long-haired dogs. Use the test light tool to verify the static function.
Collar light is not working.	Check battery level of the collar receiver. Ensure the night light mode is activated on the remote.
Skin irritation on dog's neck.	Remove the collar immediately. Clean the dog's neck and the collar. Allow the skin to heal. Ensure proper collar fit and do not leave the collar on for more than 12 hours per day. Consider using the silicone caps over the contact points if static stimulation is not needed.
