Königshaus 800W

Königshaus 800W Smart Dual Space Heater User Manual

Model: 800W | Brand: Königshaus

INTRODUCTION

This manual provides essential information for the safe and efficient operation of your Königshaus 800W Smart Dual Space Heater. Please read these instructions thoroughly before installation and use, and retain them for future reference.

SAFETY INSTRUCTIONS

- **DO NOT COVER** the heater at any time. Covering the heater can lead to overheating and fire hazards. This warning is prominently displayed on the unit.
- Ensure the heater is placed on a stable, level surface or securely mounted to a wall.
- Keep flammable materials such as furniture, curtains, and bedding at least 3 feet (0.9 meters) away from the front, sides, and rear of the heater.
- Do not operate the heater near water or in excessively damp environments. The unit has an IP44 splash-proof rating, making it suitable for bathroom use, but direct water exposure should be avoided.
- This appliance is equipped with overheat protection. If the heater overheats, it will automatically shut off. Unplug the unit and allow it to cool before restarting.
- Do not insert foreign objects into any ventilation or exhaust opening as this may cause an electric shock or fire, or damage the heater.
- Supervise children and individuals with reduced physical, sensory, or mental capabilities when the heater is in use.
- Always unplug the heater when not in use.

Warmth you can trust

Safe. Built to last. Made for families.

PACKAGE CONTENTS

Verify that all components are present in the package:

- Königshaus 800W Smart Dual Space Heater Unit
- Remote Control
- Towel Rack (detachable)
- Stand Feet (for freestanding use)
- Mounting Kit (for wall installation)
- User Manual

SETUP

Freestanding Installation

1. Attach the provided stand feet to the bottom of the heater unit using the included screws. Ensure they are securely fastened.
2. Place the heater on a firm, level surface, ensuring adequate clearance from walls and flammable objects.
3. If desired, attach the detachable towel rack to the designated slots on the heater.

Wall Mounting Installation

1. Select a suitable wall location, ensuring it is structurally sound and has adequate clearance from flammable materials.
2. Use the provided mounting kit to securely attach the heater to the wall. Follow the specific instructions included with the mounting hardware for proper installation.
3. The towel rack can be easily attached to the wall mounting brackets if desired, providing a convenient feature for bathrooms.

sensor on the power cord for accurate readings.

OPERATING INSTRUCTIONS

Initial Power On

Plug the heater into a standard electrical outlet. The digital display on the unit will illuminate, indicating it is powered on.

Using the Remote Control

The included remote control allows for convenient adjustment of settings from a distance.

- **Power Button:** Turns the heater on or off.
- **Temperature Adjustment:** Use the '+' and '-' buttons to set the desired temperature.
- **Timer Function:** Activate and set the timer for scheduled operation.
- **Mode Selection:** Cycle through available heating modes (if applicable).

Convenient control

Control via remote control or app.

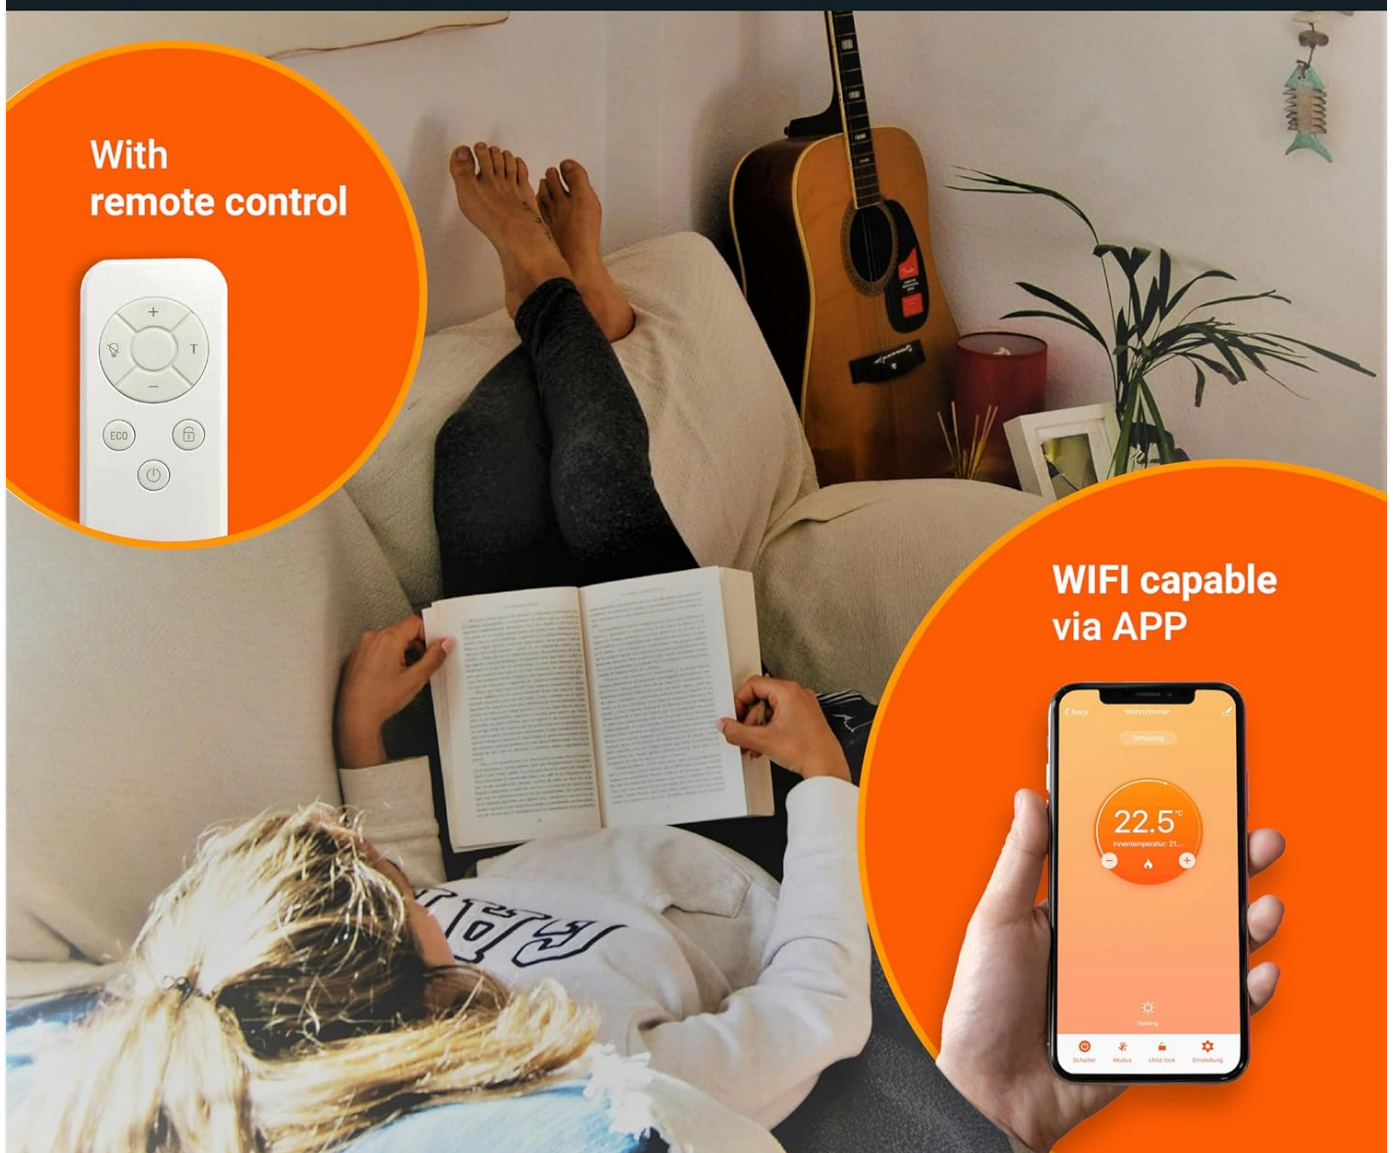

Image: Demonstrates the convenience of controlling the heater using the provided remote control or the mobile application.

WiFi App Control

For advanced control and scheduling, download the Königshaus smart app to your smartphone or tablet.

1. **Download the App:** Search for "Königshaus Smart" or a similar app name in your device's app store.
2. **Pairing:** Follow the in-app instructions to connect your heater to your home WiFi network. This typically involves putting the heater into pairing mode and selecting your network.
3. **Remote Control:** Adjust temperature, set timers, and activate various heating modes from anywhere with an internet connection.
4. **Scheduling:** Create custom heating schedules to optimize energy usage and comfort.

Note: If your WiFi connection becomes unstable, the app may require re-initialization to resume programmed timer functions. The remote control will continue to function independently.

Thermostat and Temperature Sensor

The built-in thermostat and external temperature sensor (located on the power cord) provide precise temperature regulation. Ensure the temperature sensor is not obstructed or placed in an area with inconsistent temperature readings (e.g., directly next to a cold window or heat source).

MAINTENANCE

- **Cleaning:** Before cleaning, always unplug the heater and allow it to cool completely. Wipe the exterior surfaces with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- **Storage:** If storing the heater for an extended period, ensure it is clean and dry. Store it in a cool, dry place, preferably in its original packaging.
- **Inspection:** Periodically inspect the power cord and plug for any signs of damage. If damaged, do not operate the heater and contact customer support.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Heater does not turn on.	No power, unit unplugged, or overheat protection activated.	Ensure the heater is securely plugged into a working outlet. Check circuit breaker. If overheat protection activated, unplug and allow to cool for 30 minutes before restarting.
Heater is not heating effectively.	Temperature setting too low, room size exceeds heater capacity, or obstructions.	Increase the temperature setting. Ensure the heater is appropriate for the room size (800W for 114–171 ft ²). Remove any obstructions around the heater.
WiFi app control is not working or disconnecting.	Unstable WiFi connection, app pairing issue.	Check your home WiFi network stability. Re-pair the heater with the app if necessary. Ensure the app is updated to the latest version.
Inaccurate temperature readings.	Temperature sensor obstructed or improperly placed.	Ensure the temperature sensor on the power cord is not covered and is in an open area to accurately measure room temperature.
"Do Not Cover" warning is visible on the unit.	This is a standard safety marking.	This is a permanent safety label. Ensure the heater is never covered during operation.

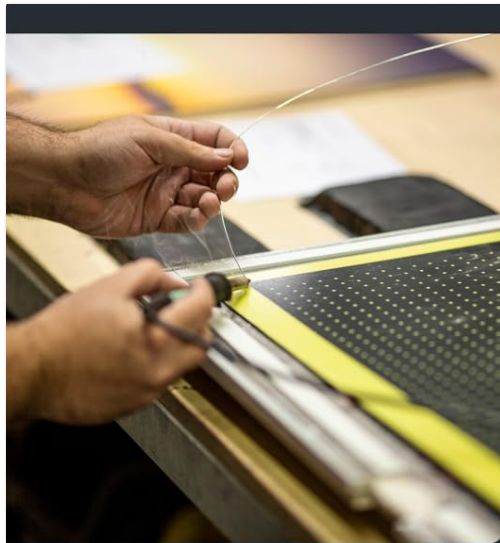

SPECIFICATIONS

Feature	Detail
Model	800W Smart Dual Space Heater
Power Output	800 Watts
Recommended Room Size	114–171 ft ²
Product Dimensions	0.51"D x 39.37"W x 23.62"H
Item Weight	19.8 pounds
Color	White
Mounting Type	Wall mount / Floor-standing
Special Features	Digital Display, Overheat Protection, Wi-Fi Enabled, Remote Control, Detachable Towel Rack
