SETUP

Follow these steps to prepare your RC car for operation:

1. **Install Car Batteries:** Locate the battery compartment on the underside of the Bugatti Divo RC car. Open the compartment cover and insert 3 AA batteries, ensuring correct polarity (+/-). Close the cover securely.
2. **Install Remote Control Batteries:** Locate the battery compartment on the back of the 2.4GHz remote control. Open the compartment cover and insert 3 AA batteries, ensuring correct polarity (+/-). Close the cover securely.
3. **Power On:** Turn on the RC car using the power switch, usually located on the underside or rear of the car. Turn on the remote control using its power switch.
4. **Pairing:** The car and remote should automatically pair. If they do not, turn both off and then on again. Ensure they are within close proximity during pairing.

OPERATING INSTRUCTIONS

Once set up, you are ready to operate your Bugatti Divo RC car:

- **Forward/Backward:** Use the left joystick or trigger on the remote control to move the car forward or backward.
- **Steering:** Use the right joystick or steering wheel on the remote control to turn the car left or right.
- **2.4GHz Control:** The 2.4GHz frequency provides responsive, interference-free control, allowing for precise maneuvers and long-distance operation.
- **Working Lights:** The RC car features functional headlights and taillights for enhanced realism during operation.

MAINTENANCE

Proper maintenance will extend the life and performance of your RC car:

- **Cleaning:** Use a soft, dry cloth to wipe down the car after use. Avoid water or harsh chemicals, as these can damage electronic components.
- **Battery Care:** Always remove batteries from both the car and the remote control when not in use for extended periods to prevent leakage and corrosion. Dispose of used batteries responsibly.
- **Storage:** Store the RC car and remote in a cool, dry place away from direct sunlight and extreme temperatures.
- **Inspection:** Periodically check for loose screws, damaged parts, or debris caught in the wheels.

TROUBLESHOOTING

If you encounter issues, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Car does not respond to remote.	Low batteries in car or remote; Car/remote not powered on; Not paired.	Replace batteries; Ensure both are switched ON; Turn both off and on again to re-pair.
Poor range or intermittent control.	Interference from other 2.4GHz devices; Low batteries.	Move to an open area away from other wireless devices; Replace batteries.
Car moves slowly or lights are dim.	Low batteries in the car.	Replace the car batteries.
Physical damage upon arrival.	Shipping damage.	Contact the retailer or manufacturer immediately for assistance or replacement.

SPECIFICATIONS
