5. OPERATING INSTRUCTIONS

5.1 Preparing Your Beverage

1. **Add Ingredients:** Pour your desired liquid mixture into the transparent barrel. The maximum liquid capacity is 62oz, and the minimum is 16oz. Ensure the mixture has a sugar content of **at least 5%** for optimal freezing. For alcoholic slushies, maintain an alcohol by volume (ABV) between **2.8% and 16%**. Stir your mixture thoroughly before pouring.
2. **Close Lid:** Securely place the lid on the barrel.

5.2 Selecting a Program

The Fesoiu Slushie Machine features 3 preset programs and 10 levels of texture control.

7. TROUBLESHOOTING

If you encounter issues with your Fesoiu Slushie Machine, please refer to the following common problems and solutions.

Problem	Possible Cause	Solution
Machine does not turn on.	Not plugged in; power outlet malfunction.	Ensure the power cord is securely plugged into a working outlet. Check the circuit breaker.
Beverage is not freezing or not slushy enough.	Insufficient sugar content; incorrect program/texture setting; liquid level too low/high.	<ul style="list-style-type: none"> ◦ Verify the mixture has at least 5% sugar content. Sugar substitutes are not recommended. ◦ Adjust the texture control to a higher level (e.g., 7-10 for harder slush). ◦ Ensure liquid is between 16oz (min) and 62oz (max) capacity. ◦ Allow sufficient time (15-45 minutes) for freezing.
Machine triggers an alarm.	Sugar content of the mixture is too low.	Add more sugar to your mixture to meet the minimum 5% requirement. Refer to the "Important Ingredient Tips" section.
Unusual noise during operation.	Parts not assembled correctly; foreign object in barrel.	Unplug the machine and check that all detachable parts (barrel, mixing blades) are correctly assembled. Ensure no foreign objects are in the barrel.
Dispensing spout is leaking.	Sealing ring improperly installed or damaged.	Unplug the machine, disassemble the dispensing mechanism, and check the sealing ring for proper placement or damage. Replace if necessary.
