SINGCALL SC-R60 APE230

SINGCALL Wireless Portable Caregiver Pager Panic Alarm System SC-R60 APE230 Instruction Manual

Model: SC-R60 APE230 | Brand: SINGCALL

1. PRODUCT OVERVIEW

The SINGCALL Wireless Portable Caregiver Pager Panic Alarm System is designed to provide reliable communication for individuals needing assistance, such as the elderly, children, pregnant women, and patients. This system includes a portable receiver and emergency call buttons, offering peace of mind through its multi-ringtone options, adjustable volume, and long signal range.

- **Multi-Ringtones & Adjustable Volume:** Portable receiver with 32 ringtones and adjustable volume from 0-100dB. Set different ringtones per call button. Mute mode helps avoid disturbed sleep. LED flashing with ringtones (hearing-impaired friendly).
- **Long Signal Range:** Delivers stable signal transmission up to 100m/328ft in open areas.
- **IP55 Waterproof & Fast Charging/Battery Replacement:** Both the receiver and call button are IP55 waterproof rated, resisting dust, rain or water splashes. Rechargeable receiver charges fast via included cable. Call button battery is easy to replace.
- **Multiple Scenarios:** Suitable for hospital, nursing facility, care home, and clinic.
- **Emergency Button with Detachable Lanyard:** The call button features a removable neck lanyard for hanging or pocket storage. Wear or carry effortlessly.

5. Maintenance

5.1 Battery Replacement for Call Button

The call button uses a replaceable battery. To replace, carefully open the back panel using a small screwdriver, replace the 12V 23A battery, and re-secure the panel.

Your browser does not support the video tag.

Video: Step-by-step guide on how to replace the battery of the call button.

5.2 Cleaning and Care

Wipe the devices with a soft, dry cloth. Avoid using harsh chemicals or abrasive cleaners. The IP55 rating provides protection against dust and water splashes, but do not submerge the devices in water.

6. Troubleshooting

6.1 No Signal/Poor Range

- Ensure the receiver is powered on and charged.
- Check the call button battery and replace if necessary.
- Reduce the distance between the call button and the receiver.
- Avoid placing the receiver near large metal objects or other electronic devices that may cause interference.

6.2 Resetting to Factory Defaults

If you experience persistent issues or wish to clear all paired transmitters, you can reset the receiver to its factory default settings.

Your browser does not support the video tag.

Video: Instructions on how to delete all transmitters and restore the receiver to factory defaults.
