SHA CERLIN Queen Bed Frame Instruction Manual

Model: AK-42116-14

INTRODUCTION

Thank you for purchasing the SHA CERLIN Queen Bed Frame. This manual provides detailed instructions for assembly, operation, maintenance, and troubleshooting to ensure safe and proper use of your new bed frame. Please read this manual thoroughly before beginning assembly and retain it for future reference.

Safety Information

Always follow the assembly instructions carefully to prevent instability or collapse. Do not exceed the maximum weight capacity of 900 pounds to ensure the safety and longevity of the bed frame. Keep all small parts and packaging materials away from children.

PACKAGE CONTENTS AND COMPONENTS

Before assembly, verify that all components listed below are present and undamaged. If any parts are missing or damaged, please contact customer support.

- Bed Frame components
- Headboard (Adjustable, Velvet Upholstered, Diamond Button Tufted with Metal Studs)
- Wooden Slats
- Hardware Pack (screws, bolts, tools if included)

Figure 1: Exploded view of bed frame components. This image illustrates the various parts included in the package, such as the headboard, side rails, footboard, center support, and wooden slats, along with their approximate positions for assembly.

SETUP AND ASSEMBLY

Assembly is designed to be straightforward. It is recommended to assemble the bed frame with two people. Ensure you have enough space and a clean, flat surface.

Tools Required:

- Included Allen Wrench (if applicable)
- Phillips Head Screwdriver (not always needed, check instructions)

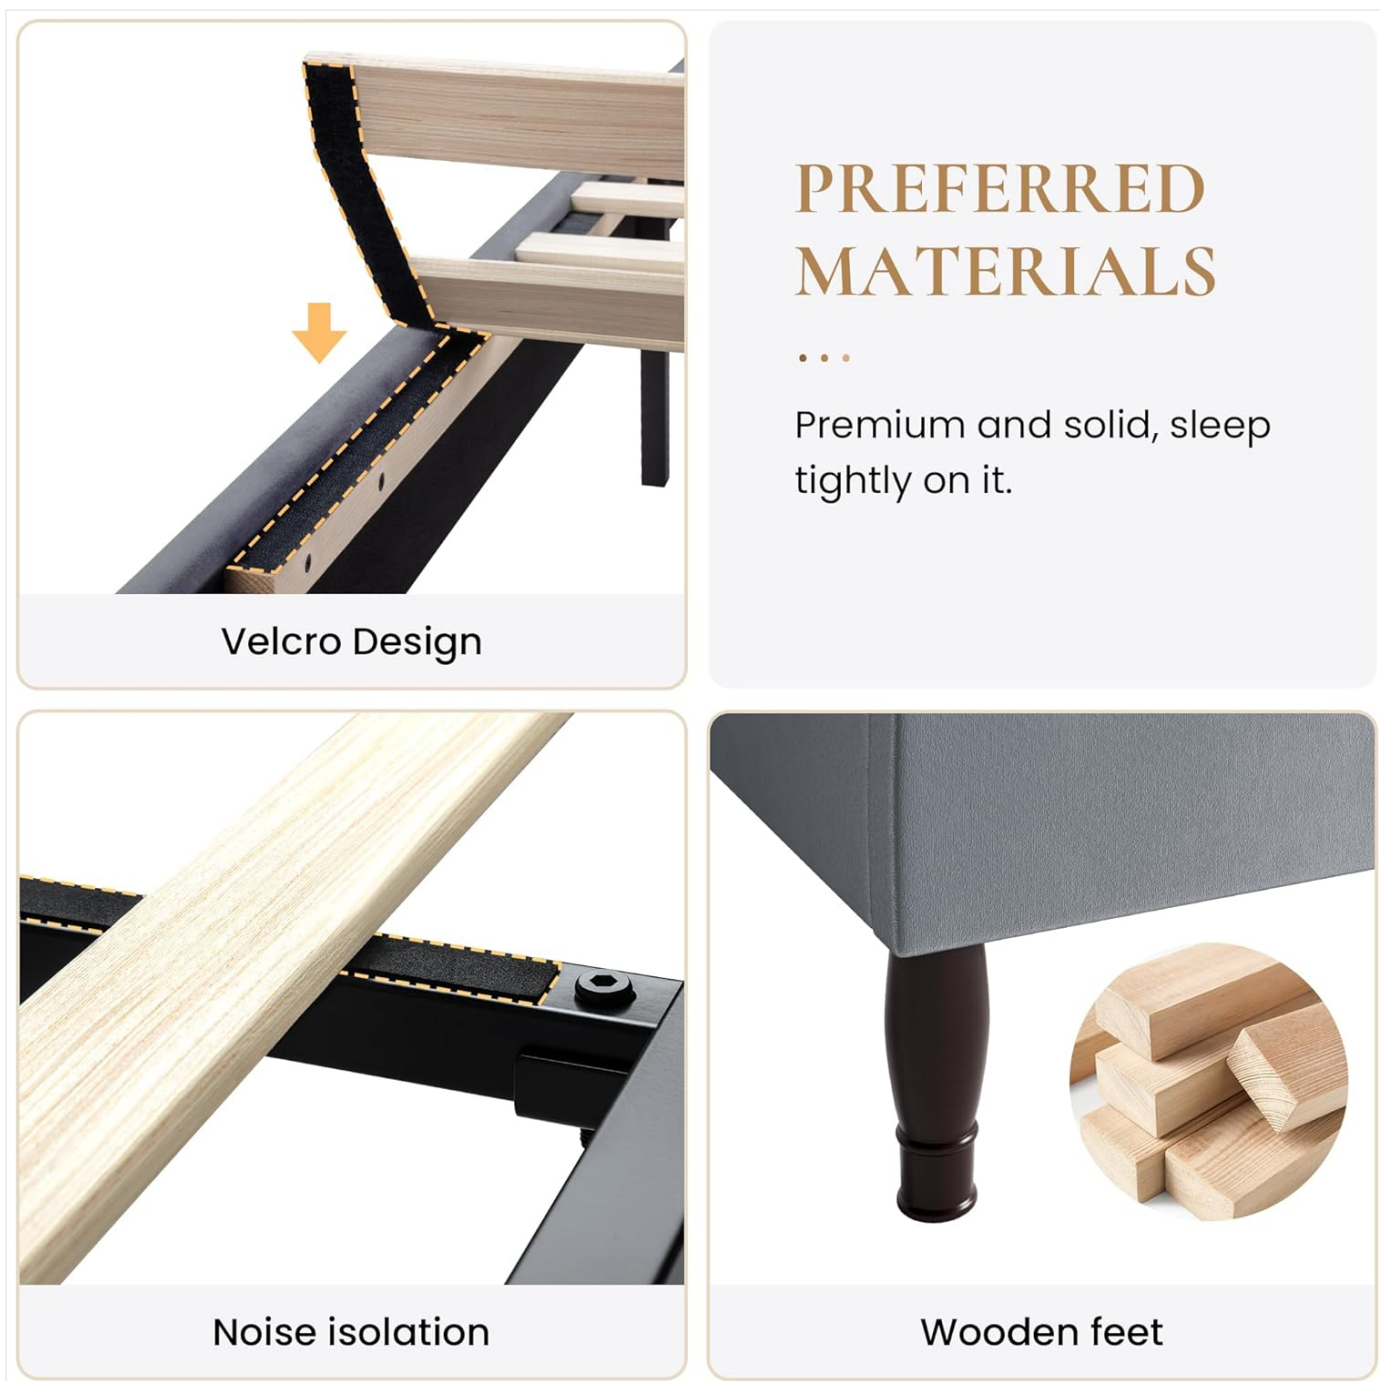

Assembly Steps:

1. **Unpack and Identify Parts:** Carefully remove all components from the packaging. Lay them out on a soft, clean surface to prevent scratches. Refer to the parts list in your included instruction manual to identify each piece.

2. **Assemble the Headboard:** Attach the headboard legs to the main headboard panel using the provided hardware. Ensure all bolts are finger-tight initially.
3. **Connect Side Rails:** Attach the side rails to the headboard and footboard. The footboard is typically integrated with the side rails or a separate piece. Ensure the velvet upholstered side faces outwards.
4. **Install Center Support:** Secure the center support beam(s) and legs to the bed frame. This provides crucial stability for the slats and mattress.
5. **Place Wooden Slats:** Lay the wooden slats across the bed frame. The slats feature a Velcro design for easy and secure placement, preventing movement and noise. Ensure they are evenly spaced and secured.
6. **Adjust Headboard Height:** The headboard is adjustable. You can set it to different heights (45.3", 47.2", 49.2") to accommodate various mattress thicknesses. Adjust before fully tightening all bolts.
7. **Final Tightening:** Once all components are in place and aligned, systematically tighten all bolts and screws using the provided tools. Do not overtighten.

Figure 2: Adjustable Headboard. This image demonstrates how the headboard can be adjusted to different heights (45.3", 47.2", 49.2") to suit various mattress thicknesses, providing customizable comfort and style.

Velcro Design

PREFERRED MATERIALS

...

Premium and solid, sleep tightly on it.

Noise isolation

Wooden feet

Figure 3: Preferred Materials and Design Features. This image highlights key features such as the Velcro design for securing bed slats, ensuring noise isolation, and the sturdy wooden feet that provide strong support.

OPERATION

The SHA CERLIN Queen Bed Frame is designed for straightforward use once assembled. It accommodates a Queen size mattress without the need for a box spring.

Mattress Placement:

Place your Queen size mattress directly onto the wooden slats. The sturdy slat support system is designed to provide ample support for your mattress, eliminating the need for a box spring.

Headboard Adjustment:

If you need to adjust the headboard height after initial assembly, carefully loosen the bolts connecting the headboard to the frame, adjust to the desired height (45.3", 47.2", or 49.2"), and then re-tighten the bolts securely.

HEIGHT ADJUSTABLE HEADBOARD

Figure 4: Mattress Compatibility. This image shows that the bed frame is designed for use with a mattress only, typically 8-14 inches thick, and does not require a box spring.

MAINTENANCE AND CARE

Proper maintenance will extend the life and appearance of your bed frame.

- **Cleaning:** Wipe the bed frame with a dry cloth to remove dust and debris. For the velvet upholstered headboard, gently blot any spills immediately with a clean, dry cloth. Avoid using harsh chemicals or abrasive cleaners.
- **Regular Inspection:** Periodically check all bolts and screws to ensure they remain tight. Re-tighten if necessary to maintain stability and prevent squeaking.
- **Weight Capacity:** Do not exceed the maximum weight capacity of 900 pounds. Distribute weight evenly across the bed frame.
- **Moving the Bed:** When moving the bed frame, lift it rather than dragging it to prevent damage to the legs and frame structure.

TROUBLESHOOTING

This section addresses common issues you might encounter.

Problem	Possible Cause	Solution
Bed frame is wobbly or unstable.	Loose bolts or screws. Uneven floor.	Ensure all assembly bolts are securely tightened. Check if the floor is level; use shims under legs if necessary.
Squeaking noises.	Loose connections. Slats rubbing against frame.	Re-tighten all bolts. Ensure slats are properly seated and the Velcro is engaged. The EVA mute bar design helps prevent noise.
Headboard not adjusting properly.	Obstruction or misaligned holes.	Ensure no fabric or material is obstructing the adjustment mechanism. Verify alignment of holes before inserting bolts.
Parts missing or damaged upon arrival.	Shipping damage or packaging error.	Contact SHA CERLIN customer support immediately with your purchase details and a description of the issue.

SPECIFICATIONS

Feature	Detail
Model Number	AK-42116-14
