3. Package Contents

Verify that all items are present in the package:

- Redragon M695 Wired Gaming Mouse
- User Manual

4. Setup Instructions

Follow these steps to set up your Redragon M695 Gaming Mouse:

1. **Connect the Mouse:** Plug the USB connector of the Redragon M695 mouse into an available USB port on your computer.
2. **Driver Installation:** The operating system will typically install the necessary drivers automatically. Allow a few moments for this process to complete.
3. **Software Installation (Optional but Recommended):** For full customization, download the Redragon M695 software from the official Redragon website. Install the software by following the on-screen instructions.

5. Operating Instructions

5.1 DPI Adjustment

The M695 mouse features on-the-fly DPI adjustment. Use the dedicated DPI buttons located behind the scroll wheel to cycle through preset DPI levels.

- **Default DPI Levels:** 400 (Red), 800 (Blue), 1600 (Green), 2400 (Purple), 3200 (Yellow).
- **Custom DPI:** The software allows for fine-tuning DPI settings from 100 to 24,000.

5.2 Programmable Buttons

The M695 is equipped with 7 programmable buttons. These buttons can be assigned various functions, macros, or keybinds using the Redragon customization software.

- **Standard Buttons:** Left Click, Right Click, Middle Button (Scroll Wheel Click).
- **DPI Buttons:** DPI+ (increase DPI), DPI- (decrease DPI).
- **Side Buttons:** Forward, Backward.

5.3 Software Customization

The Redragon software provides comprehensive control over your mouse settings. After installation, launch the software to access options for:

- **Lighting:** Adjust RGB lighting effects, brightness, and speed.
- **Customize:** Reassign functions to any of the 7 programmable buttons.
- **DPI:** Create custom DPI profiles and set precise DPI values.
- **Macro:** Record and assign complex macro sequences to buttons.

6. Maintenance

To ensure the longevity and optimal performance of your Redragon M695 mouse, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the mouse surface. For optical sensor cleaning, use a cotton swab lightly dampened with isopropyl alcohol. Avoid harsh chemicals or abrasive materials.
- **Storage:** Store the mouse in a clean, dry environment away from extreme temperatures and direct sunlight.
- **Cable Care:** Avoid sharply bending or pulling the USB cable to prevent internal damage.

7. Troubleshooting

If you encounter issues with your Redragon M695 mouse, refer to the following common solutions:

Problem	Possible Solution
Mouse is not responding.	• Ensure the USB cable is securely plugged into a working USB port. • Try a different USB port on your computer. • Restart your computer. • Check if the mouse works on another computer to rule out a system-specific issue.

Problem	Possible Solution
DPI settings are not changing.	• Ensure the Redragon software is installed and running. • Verify that the DPI buttons are functioning correctly. • Reset mouse settings to default via the software.
Buttons are not programmable.	• Ensure the Redragon software is installed and updated to the latest version. • Confirm that you are saving the changes within the software after remapping buttons. • Try running the software as an administrator.
Mouse movement is erratic or inaccurate.	• Clean the optical sensor at the bottom of the mouse. • Ensure you are using the mouse on a suitable surface (e.g., a mouse pad). • Check for any physical obstructions around the sensor.
