Gevi IMN-1005WCN

Gevi Adella Nugget Ice Maker User Manual

MODEL: IMN-1005WCN

1. Introduction

Thank you for choosing the Gevi Adella Nugget Ice Maker. This manual provides essential information for the safe and efficient operation, maintenance, and troubleshooting of your new appliance. Please read it thoroughly before first use and retain it for future reference.

The Gevi Adella Nugget Ice Maker is designed to produce chewable nugget ice, also known as pellet ice, which is ideal for cooling beverages and retaining their flavor. With a 1-gallon side tank and a daily production capacity of up to 40 lbs, it ensures a continuous supply of ice for your home or party needs.

2. Product Overview & Components

3. Setup

Proper setup ensures optimal performance and longevity of your ice maker.

3.1 Placement

- Place the ice maker on a flat, stable surface.
- Ensure adequate space around the unit for proper ventilation (refer to dimensions: 15.8"D x 10.8"W x 16.6"H).
- Avoid direct sunlight or heat sources.

3.2 Initial Cleaning

Before first use, it is crucial to clean the ice maker to remove any manufacturing residues.

1. Remove the ice basket and ice scoop.
2. Wash the ice basket and scoop with mild detergent and warm water. Rinse thoroughly.
3. Add water to the side tank up to the MAX line.
4. Press and hold the 'CLEAN' button for 3 seconds to start the self-cleaning cycle.
5. Once the self-cleaning cycle is complete, drain the water from the unit using the drain hoses at the back.
6. Repeat the self-cleaning process once more.

For a detailed guide on initial operation and cleaning, please watch the video below:

Video 3.1: The Operation Video Before Normal Use of Adella. This video provides a comprehensive guide on the initial operation and preparation of the Gevi Adella Nugget Ice Maker before its first normal use, including cleaning procedures.

3.3 Discarding Initial Ice

The first few batches of ice produced may contain residual impurities from the manufacturing process. It is recommended to discard the first 2-3 batches of ice.

4. Operating Instructions

Follow these steps to start making fresh nugget ice.

4.1 Adding Water

Ensure the side water tank is filled with clean, potable water. The 1-gallon capacity allows for extended ice production without frequent refills.

Side Mega Tank is Must

A super large capacity water tank that can add 1250ml of water. Simplicity to Add Water

Figure 4.1: The ice maker features a convenient 1-gallon side water tank, reducing the frequency of refills and simplifying the water addition process.

4.2 Starting Ice Production

1. Plug the ice maker into a grounded electrical outlet.
2. Press the 'START' button to begin the ice-making cycle. The indicator light will illuminate.
3. The first batch of ice typically takes about 15 minutes to produce.

4.3 Ice Full Detection

The Gevi Adella Nugget Ice Maker is equipped with a smart infrared sensor that detects when the ice basket is full. Once full, the machine will automatically pause ice production to prevent overflow.

5. Maintenance and Cleaning

Regular cleaning and maintenance are essential to ensure hygienic ice production and prolong the lifespan of your appliance.

5.1 Self-Cleaning Function

Utilize the integrated self-cleaning function regularly to prevent limescale buildup and maintain cleanliness.

1. Ensure the ice basket is empty.
2. Fill the side water tank with clean water.
3. Press and hold the 'CLEAN' button for 3 seconds to activate the self-cleaning cycle.
4. Once the cycle is complete, drain the water from the unit.

5.2 Manual Cleaning

- Periodically clean the ice basket, water tank, and internal components with a soft cloth and mild, food-safe detergent.
- Rinse all components thoroughly with clean water.
- For hard-to-reach areas, use the provided cleaning brush.

5.3 Descaling

To minimize limescale buildup, especially in hard water areas, consider using a water scale inhibitor. Contact Gevi customer service for a complimentary sample after purchase.

6. Troubleshooting

If you encounter issues with your Gevi Adella Nugget Ice Maker, refer to the following common solutions.

6.1 False Low-Water Alarm

If the low-water alarm activates despite the water tank being full, it might be a false alarm caused by a clogged filter or pump inlet.

1. Turn off the ice maker.
2. Remove and thoroughly clean the filter.
3. Use a toothpick to gently rotate the water inlet area to check for blockages.
4. Reinstall the filter.
5. Fill the sink to one-third of its capacity, ensuring the water level is above the filter. Let it stand for 1 hour.
6. Restart the ice maker. If the alarm disappears and ice production resumes, the problem is resolved.

For a visual guide on resolving the false low-water alarm, please watch the video below:

Video 6.1: Solve the False Low-Water Alarm Issue on Your Adella Ice Maker. This video provides step-by-step instructions on how to diagnose and resolve a false low-water alarm issue on your Gevi Adella Nugget Ice Maker, including filter cleaning and water level checks.

6.2 Other Issues

If the issue persists or you encounter other problems not covered here, please contact Gevi customer support for further assistance.
