## MAINTENANCE

- Keep the phone dry. Moisture can damage electronic circuits.
- Do not expose the phone to extreme temperatures. High temperatures can shorten the life of electronic devices and warp or melt certain plastics.
- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the phone. Wipe it with a soft, damp cloth.
- Handle the phone gently. Do not drop, knock, or shake it. Rough handling can break internal circuit boards and fine mechanics.
- Only use original or certified compatible batteries, chargers, and accessories.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Phone does not power on	Battery is low or not installed correctly.	Charge the battery. Ensure the battery is correctly inserted.
Cannot make or receive calls	No SIM card, SIM card not properly inserted, or no network signal.	Ensure SIM card is inserted correctly. Check network coverage. Contact your service provider.
Poor call quality / Low volume	Weak signal, speaker blocked, or volume too low.	Move to an area with better signal. Ensure speaker is not obstructed. Adjust call volume using side buttons.
Battery drains quickly	Frequent use, background applications, or old battery.	Reduce screen brightness. Close unused applications. Consider replacing the battery if it's old.
SOS function not working	SOS numbers not programmed or incorrect.	Verify and correctly program the emergency contact numbers in SOS settings.

If the problem persists after trying these solutions, please contact customer support.
