ASSEMBLY INSTRUCTIONS

The MISTBUY WW2 Army Tank Building Set includes two distinct models: the German Panzer IV and the Soviet T-34. Each tank has its own dedicated instruction booklet. Follow the step-by-step visual guides provided in these booklets for a smooth assembly process.

1. **Unpack Components:** Carefully open the packaging and sort the numbered bags according to the instruction booklet for the tank you wish to build first.
2. **Follow Visual Steps:** Each instruction booklet contains detailed, step-by-step illustrations. Pay close attention to the arrows indicating where pieces should be placed and the highlighted new pieces for each step.
3. **Build the Chassis:** Begin by constructing the base and track mechanisms for your chosen tank.
4. **Assemble the Turret:** Follow the instructions to build the tank's turret, including the cannon and any internal mechanisms for lights or rotation.
5. **Integrate Electronics:** Install the included batteries into the designated compartment for the LED combat lights as shown in the instructions.

6. **Final Assembly:** Attach the completed turret to the tank chassis. Ensure all parts are securely connected.

OPERATING INSTRUCTIONS

Once assembled, your MISTBUY tank models offer several interactive features:

- **LED Combat Lights:** To activate the authentic LED combat lights, locate and press the designated button on the tank's turret. Press again to turn off.
- **Turret Rotation:** The tank's turret can be rotated 360 degrees. Use the rear knob on the turret to manually turn it to your desired position.
- **Movable Tracks:** The tank features sliding tracks. Gently roll the tank on a flat surface to observe the realistic movement of the tracks.

MAINTENANCE

- **Cleaning:** To clean your tank models, gently wipe them with a dry, soft cloth. Avoid using water or chemical cleaners, as these may damage the plastic or electronic components.
- **Storage:** Store the models in a cool, dry place away from direct sunlight to prevent discoloration or warping of the plastic blocks.
- **Battery Replacement:** If the LED lights dim or stop working, replace the nonstandard batteries. Refer to the assembly instructions for the battery compartment location.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Missing pieces	Packaging error or lost during unpacking.	Carefully check all packaging materials. Contact MISTBUY customer support if pieces are genuinely missing.
LED lights not working	Batteries are dead or incorrectly installed.	Ensure batteries are inserted with correct polarity. Replace batteries if necessary. Verify all connections to the light unit.
Turret does not rotate smoothly	Parts are not correctly aligned or are obstructed.	Review the assembly steps for the turret. Ensure no pieces are blocking the rotation mechanism.
Tracks do not move freely	Track links are too tight or obstructed.	Check for any misaligned or jammed track links. Ensure the wheels are properly attached and can spin freely.
