## 5. OPERATING INSTRUCTIONS

### 5.1 Using the Drawers

The dresser features three fabric drawers designed for organized storage. Each drawer has a faux leather front and a comfortable pull handle. To open, gently pull the handle. To close, push the drawer back into the frame until it is fully seated. Avoid forcing drawers if they encounter resistance.

## 5.2 Using the Charging Station

The integrated power strip provides convenient access to electrical power. Plug the dresser's main power cord into a standard wall outlet. You can then use the following:

- **AC Outlets:** Two 125V/12A AC outlets are available for powering small appliances or charging devices.
- **USB Ports:** Two 5V-2A USB ports are provided for charging smartphones, tablets, and other USB-powered devices.

Ensure that the total power draw of connected devices does not exceed the rated capacity of the power strip.

## 6. MAINTENANCE

Regular maintenance helps prolong the life of your dresser:

- **Cleaning:** Wipe the wood top and metal frame with a soft, damp cloth. For fabric drawers, use a slightly damp cloth and mild soap if necessary, then air dry. Avoid harsh chemicals or abrasive cleaners.

- **Fastener Check:** Periodically check all screws and bolts to ensure they remain tight. Re-tighten as needed to maintain stability.
- **Electrical Components:** Keep the power strip clean and free of dust. Do not spill liquids on the outlets or USB ports.

## 7. TROUBLESHOOTING

---

If you encounter issues with your dresser, refer to the following common problems and solutions:

- **Dresser is wobbly:**  
*Solution:* Ensure the dresser is on a level surface. Adjust the adjustable feet to stabilize the unit. Check all assembly screws and re-tighten if loose. Confirm the anti-tip device is securely installed.
- **Drawers do not slide smoothly:**  
*Solution:* Ensure the drawers are inserted correctly and are not overloaded. Check for any obstructions within the drawer slots.
- **AC outlets or USB ports are not working:**  
*Solution:* Verify that the dresser's main power cord is securely plugged into a functional wall outlet. Check if the wall outlet itself is receiving power (test with another device). Ensure no circuit breakers have tripped. Do not exceed the maximum load capacity of the power strip.
