Sellrich B0FLY88VL4

Sellrich 9-inch Single DIN Car Stereo User Manual

Model: B0FLY88VL4

INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your Sellrich 9-inch Single DIN Car Stereo. This unit features a 9-inch IPS touch screen, wireless CarPlay, Android Auto, Bluetooth, AM/FM/RDS radio, USB connectivity, and support for a backup camera. Please read this manual thoroughly before use to ensure proper functionality and safety.

PACKAGE CONTENTS

Verify that all items are present in the package:

- Single DIN Car Stereo Unit
- Backup Camera
- Power Cable
- User Manual
- Horn Cable

Wireless Carplay Android Auto & Mirrorlink

This image provides the physical dimensions of the Sellrich 9-inch Single DIN Car Stereo, showing both front and side views with measurements in centimeters and inches. It also lists the package contents, including the power cable, horn cable, user manual, and the 12-LED rear camera.

INSTALLATION GUIDE

Wiring Connections

This car stereo operates on a 12V power supply. Ensure your vehicle's electrical system is compatible. For vehicles with a 24V system, a voltage converter is required (not included).

If the clock and presets are lost after turning off the vehicle, it indicates that the constant power (B+) and accessory power (ACC) wires are incorrectly connected. To resolve this, swap the red ACC wire and the yellow B+ wire. The yellow wire must be connected to a constant 12V power source (always hot battery post) to retain settings.

Backup Camera Installation

Connect the included HD backup camera according to the following steps:

1. Connect the **red cable (1)** of the camera power wire to the positive pole of the car's reversing light cable.
2. Connect the **black cable (2)** of the camera power wire to the negative pole of the car's reversing light cable.
3. Connect the **Reversing Trigger Wire Cable (4)** (often pink in color) from the stereo harness to the red cable (3) which is an extension of the video input wire.
4. Connect the video signal cable (5) from the camera to the 'CAMIN' input on the stereo unit.

Camera

This image illustrates two key features: the top section shows the automatic display of the backup camera feed on the stereo screen when reversing, complete with parking guidelines. The bottom section highlights the steering wheel control functionality, showing a steering wheel with integrated buttons and the corresponding setup interface on the stereo.

For complex wiring or if you are unsure about the installation process, professional installation is recommended.

OPERATING INSTRUCTIONS

Power On/Off

To power on the unit, turn your vehicle's ignition to the ACC or ON position. The stereo will automatically power on. To power off, turn the ignition to the OFF position.

Touch Screen Interface

The 9-inch IPS touch screen allows for intuitive control. Tap icons to select functions, swipe to navigate menus, and use pinch-to-zoom gestures where applicable.

Wireless CarPlay and Android Auto

Connect your smartphone wirelessly to access CarPlay or Android Auto. This allows for navigation, music playback, hands-free calls, and text messaging directly from the stereo screen using voice commands like "Hey Siri" or "OK Google".

This image illustrates the main screen of the Sellrich car stereo showing the wireless CarPlay and Android Auto interfaces. It highlights various compatible applications like Spotify, YouTube Music, Phone, Waze, Calendar, and HeartRadio. Smaller panels below demonstrate different display modes for CarPlay maps, music, and combined views, as well as the Android Auto interface.

Bluetooth Connectivity

Pair your mobile device via Bluetooth for hands-free calling and audio streaming. The built-in Bluetooth module allows you to import contacts and play your favorite playlists directly through the car's speakers.

This image shows the Sellrich car stereo's Bluetooth interface, featuring a dial pad for making hands-free calls. Below, the FM radio interface is displayed, illustrating the frequency tuning and station selection options.

AM/FM/RDS Radio

Access local radio stations using the integrated AM/FM/RDS tuner. The RDS (Radio Data System) feature provides additional information such as station name and traffic updates where available. Scan for stations and save your preferred frequencies as presets.

USB Port Functions

The USB port serves multiple functions: fast charging for your mobile devices and playback of media files from a USB flash drive. Simply connect your device or drive to the USB port to access these features.

This image demonstrates the customizable 7-color backlight feature of the Sellrich car stereo, with various color options displayed on the left side of the screen. It also highlights the USB port, showing its use for connecting a USB drive for media transfer and playback, as well as for fast charging mobile devices.

Mirror Link and Online Video

Utilize the Mirror Link function to display your smartphone's screen directly on the stereo. This allows for viewing navigation apps, videos (for passengers only), or other content from your phone on the larger 9-inch display. The unit also supports direct online video playback.

This image features the Sellrich car stereo's 7-band equalizer (EQ) interface, allowing users to fine-tune audio frequencies for different music genres like User, Pop, Classic, Rock, and Jazz. The background visually suggests the capability for online video playback.

EQ Audio Adjustment

Customize your audio experience with the built-in 7-band equalizer. Adjust frequency bands to enhance bass for hip-hop, clarify treble for podcasts, or select from preset modes like Pop, Classic, Rock, and Jazz to match your listening preferences.

Steering Wheel Control

If your vehicle supports steering wheel controls, you can configure them to operate the stereo. This allows you to adjust volume, skip tracks, answer calls, or mute navigation without taking your hands off the steering wheel.

Backup Camera Operation

When the vehicle is shifted into reverse, the stereo automatically displays a clear, night-vision feed from the included HD backup camera. Parking guidelines appear on the screen to assist with safe maneuvering into parking spaces.

MAINTENANCE

To ensure the longevity and optimal performance of your car stereo, follow these maintenance guidelines:

- **Cleaning the Screen:** Use a soft, dry, lint-free cloth to clean the touch screen. Avoid using abrasive cleaners, solvents, or chemical sprays, as these can damage the screen surface.
- **General Cleaning:** Keep the unit free from dust and debris. Use a soft brush or compressed air to clean vents and buttons.
- **Temperature:** Avoid exposing the unit to extreme temperatures, direct sunlight for prolonged periods, or high humidity.
- **Software Updates:** Check the manufacturer's website periodically for any available software updates to improve performance and add new features.

TROUBLESHOOTING

If you encounter issues with your Sellrich car stereo, refer to the following common problems and solutions:

- **Problem:** Clock and presets are lost after turning off the vehicle.
Solution: This indicates incorrect wiring of the constant power (B+) and accessory power (ACC) wires. Swap the red ACC wire and the yellow B+ wire. Ensure the yellow wire is connected to a constant 12V power source.
- **Problem:** No power to the unit.
Solution: Check the power cable connections and ensure they are securely attached. Verify the vehicle's fuse for the stereo is not blown.
- **Problem:** No sound from the speakers.
Solution: Check all speaker wire connections. Ensure the volume is not muted or set to zero. Verify the correct audio source is selected.
- **Problem:** Wireless CarPlay/Android Auto not connecting.
Solution: Ensure Bluetooth and Wi-Fi are enabled on your smartphone. Try forgetting the device on both the stereo and your phone, then attempt to re-pair. Check for any software updates for your phone or the stereo.
- **Problem:** Backup camera not displaying.
Solution: Verify all camera wiring connections, especially the reversing trigger wire. Ensure the camera itself is receiving power.

SPECIFICATIONS

Feature	Description
Brand	Sellrich
Package Dimensions	9.06 x 5.51 x 3.94 inches
Item Weight	2.2 pounds
Connectivity Technology	Bluetooth
Controller Type	Carplay
Special Feature	7-color Backlight, Online Video & Same Screen Display, 9 inch HD IPS Touch Screen, AM/FM/RDS Radio, Built-In Bluetooth, Wireless Carplay Android Auto
