## EasyKeys B29199

# EasyKeys Golf Cart Replacement Key for Yamaha B29199

Model: B29199

## INTRODUCTION

This manual provides instructions for the EasyKeys Golf Cart Replacement Key, specifically designed for Yamaha golf carts requiring the B29199 key code. This key is compatible with Yamaha Key Series B20000 - B29999. Please read these instructions carefully before use to ensure proper identification and function of your replacement key.

## PRODUCT OVERVIEW

The EasyKeys B29199 replacement key is a precision-cut brass key designed to operate ignition locks on compatible Yamaha golf carts. It is manufactured to match the original key specifications for the B29199 code within the B20000-B29999 series.

- **Material:** Brass
- **Compatibility:** Yamaha golf carts (B20000-B29999 series)
- **Key Code:** B29199

## IDENTIFYING YOUR LOCK CODE

Before using your replacement key, it is crucial to verify that your golf cart's lock code matches the B29199 code of this key. The lock code determines the correct key for your lock. You can typically find this code in one of the following locations:

# Where to Find Your Lock Code

On the Key

On the Lock Face

On a Label Inside/  
Behind the Lock

On the  
Cabinet/Door Label

## Important Notes

- Order by Manufacturer → Lock codes are manufacturer-specific.
- Key Cuts Differ → Even if codes look similar, they vary by brand.

*Image: Locations to find your lock code. The image displays examples of lock codes found on the key (e.g., FR322), on the lock face (e.g., FR322), on a label inside/behind the lock (e.g., CODE: G38), and on a cabinet/door label (e.g., HF321).*

1. **On the Original Key:** If you still possess the original key, the code is often stamped directly on the key blade or head.
2. **On the Lock Face:** The code may be engraved or printed on the visible face of the ignition lock cylinder.

- On a Label Inside/Behind the Lock:** For some models, the code might be on a sticker or label located inside the ignition assembly or behind the dashboard panel.
- On a Cabinet/Door Label:** Less common for golf carts, but some vehicles may have a code on a label within a compartment or door.

#### Important Notes:

- Lock codes are manufacturer-specific. Ensure your vehicle is a Yamaha.
- Key cuts differ by brand. Even if codes appear similar, they are not interchangeable across different manufacturers.

## OPERATING INSTRUCTIONS

Once you have confirmed that your golf cart requires a B29199 key, insert the replacement key into the ignition lock cylinder. Turn the key clockwise to the "ON" position to activate the golf cart's electrical system, and further to the "START" position to engage the starter motor. Turn counter-clockwise to the "OFF" position to power down the vehicle and remove the key.

## MAINTENANCE

This brass key requires minimal maintenance. Keep the key clean and free of debris. Avoid using excessive force when inserting or turning the key, as this can damage both the key and the lock cylinder. Store the key in a dry place to prevent corrosion.

## TROUBLESHOOTING

- Key does not insert smoothly:** Ensure the key is oriented correctly. Do not force it. Check the lock cylinder for obstructions.
- Key inserts but does not turn:** Double-check that the key code B29199 matches your lock. If the code matches, the lock cylinder may be worn or damaged, or the key may have been cut incorrectly. Contact EasyKeys support if you suspect a key cutting error.
- Key turns but golf cart does not start:** This indicates an issue with the golf cart's electrical system or engine, not the key itself. Consult your golf cart's service manual or a qualified technician.

## SPECIFICATIONS

Feature	Detail
Brand	EasyKeys
Model Name	B29199
Manufacturer	Yamaha (for compatible locks)
Material	Brass
Lock Type	Cam
Item Dimensions (L x W x H)	0.5 x 0.5 x 1 inches
Item Weight	0.25 Pounds (approx. 4 ounces)
Special Features	Custom Cut Key, Durable
