7. TROUBLESHOOTING

Refer to the table below for common issues and their solutions.

Problem	Possible Cause	Solution
Chair is wobbly or unstable.	Uneven floor surface; loose bolts.	Adjust the foot pads on the base. Tighten all assembly bolts.
Cushion feels flat or uncomfortable.	Cushion needs fluffing; prolonged compression.	Fluff the cushion regularly. Allow it to expand naturally if recently unpacked.
Swivel mechanism is stiff.	Dust or debris in the mechanism; lack of lubrication.	Clean around the swivel mechanism. Apply a silicone-based lubricant if necessary (avoid oil-based lubricants).
