PINDOWS PDS-G652

PINDOWS Minimalist Quartz Analog Watch G652N1 User Manual

Model: PDS-G652

1. INTRODUCTION

This manual provides essential instructions for the proper setup, operation, and maintenance of your PINDOWS Minimalist Quartz Analog Watch, model G652N1. Please read this guide thoroughly to ensure optimal performance and longevity of your timepiece.

2. PRODUCT OVERVIEW

The PINDOWS G652N1 is a minimalist quartz analog watch designed for everyday elegance. It features a gold-tone case, a clear dial with easy-to-read numerals, and a comfortable black leather strap. The watch is equipped with a reliable Japanese quartz movement and a luminous dial for visibility in low-light conditions.

Key Features:

- **Accurate Japanese Quartz Movement:** Ensures precise timekeeping.
- **30M Water Resistance:** Suitable for daily splashes, hand washing, and rain. Not suitable for swimming or diving.
- **Luminous Dial:** Provides visibility in low-light environments after exposure to light.
- **Comfortable Leather Strap:** Soft and adjustable for a secure fit.
- **Stainless Steel Back Cover:** Corrosion-resistant and tightly sealed for durability.

Encounters Collection

The combination of a legible dial and classic contours defines our signature aesthetic.

3. SETUP

Setting the Time:

1. Locate the crown on the right side of the watch case.
2. Gently pull the crown outwards until you feel a click. This is the time-setting position.
3. Rotate the crown clockwise or counter-clockwise to adjust the hour and minute hands to the correct

time.

4. Once the time is set, push the crown back into its original position to engage the movement and start the watch.

Illustration of the watch crown and the action to pull it out for time adjustment.

Adjusting the Strap:

The leather strap features a traditional buckle clasp. Adjust the strap by selecting the appropriate hole for a comfortable and secure fit on your wrist. Ensure the watch is not too tight to allow for proper circulation, nor too loose to prevent it from sliding excessively.

4. OPERATING INSTRUCTIONS

Timekeeping:

Once the time is set and the crown is pushed in, your PINDOWS watch will accurately display the time using its quartz movement. The watch features hour, minute, and second hands.

Luminous Dial Function:

The watch dial is designed with luminous material to provide visibility in low-light conditions. To activate this feature, expose the watch to a bright light source, such as sunlight or indoor lighting, for at least 30 minutes. The luminous material will absorb the light and glow in the dark for a period afterward.

Encounters Collection

The luminous dial glowing in a dark environment, ensuring clear visibility.

5. MAINTENANCE

Water Resistance:

Your PINDOWS watch has a water resistance rating of 30 meters (3 ATM). This means it is suitable for daily use and can withstand splashes from washing hands or exposure to rain. It is important to note that this watch is **not designed for swimming, showering, or diving**. Avoid pressing the crown or operating the watch underwater.

Information regarding the watch's 30M water resistance, suitable for splashes but not immersion.

Cleaning:

To clean your watch, gently wipe the case and strap with a soft, dry cloth. For the leather strap, avoid excessive moisture and harsh chemicals, which can damage the material. If the watch comes into contact with saltwater, rinse it lightly with fresh water and dry immediately.

Battery Replacement:

The watch is powered by a long-lasting quartz battery. When the watch stops or the second hand begins to skip, it indicates that the battery needs replacement. Battery replacement should be performed by a qualified watch technician to ensure the water resistance seal is maintained.

6. TROUBLESHOOTING

Watch Not Keeping Time:

- **Check the Crown:** Ensure the crown is fully pushed in after setting the time. If it is pulled out, the watch will not run.
- **Battery:** If the watch has stopped completely, the battery may need to be replaced. Refer to the 'Battery Replacement' section under Maintenance.

Luminous Dial Not Glowing:

- The luminous material requires exposure to light to charge. Ensure the watch has been exposed to a bright light source for at least 30 minutes before expecting it to glow in the dark.

7. SPECIFICATIONS
