## 1. Safety Information

This product requires careful handling during assembly and installation. At least 2 people are needed for installation. Always ensure the ground is level before installation and follow the provided instructions to prevent injury or damage.

Keep all small parts and packaging materials away from children. Wear appropriate safety gear during assembly, such as gloves and eye protection.

## 2. Product Overview

The Devoko Plastic Storage Shed is designed to provide durable and weather-resistant storage for your garden tools, lawn equipment, and other outdoor items. Constructed from upgraded resin material, it offers enhanced durability compared to standard plastic sheds. The integrated floor helps protect contents from ground moisture.

Image 1: Devoko Plastic Storage Shed (Beige, 7.9x12.1 FT) with its lockable sliding doors and side window.

### Key Features:

- **Durable Resin Material:** Made from upgraded resin for enhanced weather resistance and longevity.
- **Integrated Floor:** Prevents moisture from the ground, keeping stored items dry and clean.
- **Spacious Interior:** Ample room for mowers, ladders, bikes, and garden tools.
- **Lockable Sliding Doors:** Provides security for your stored items (lock not included).
- **Sloped Roof:** Designed to prevent accumulation of rain and snow.
- **DIY Window Design:** Allows for flexible placement of windows to maximize natural light and visibility.
- **KICK-IT Installation System:** Simplifies wall-to-floor connection, reducing screw count.

### 3. Setup & Installation

Before beginning assembly, ensure you have a clear, level surface. The shed will arrive in multiple packages (typically 7). Verify all parts are present before starting. It is recommended that at least two people perform the installation due to the size and weight of the components.

#### Installation Steps:

1. **Prepare the Site:** Ensure the ground is completely level and clear of debris. An uneven surface can

compromise the shed's stability and structural integrity.

2. **Unpack Components:** Carefully unpack all boxes. Check the parts list against the included manual to ensure no parts are missing. If any parts are missing or damaged, contact Devoko customer support immediately.
3. **Assemble the Floor:** Follow the instructions to assemble the floor panels. Ensure they are securely connected and form a stable base.
4. **Install Walls (KICK-IT System):** Align the wall panels with the floor. The KICK-IT installation system allows for the wall to floor connection by aligning and gently kicking the wall base into place. Refer to the detailed manual for specific alignment points and techniques. Approximately 35% fewer screws are required for this step.
5. **Install Windows:** The shed features a DIY window design. Choose your preferred locations for the windows and install them according to the manual's instructions. This allows natural light into the shed.
6. **Assemble the Roof:** Construct and attach the roof panels. Ensure all roof components are securely fastened to prevent leaks and provide structural stability. The sloped design aids in water and snow runoff.
7. **Install Doors:** Attach the sliding doors. Ensure they operate smoothly and the locking mechanism functions correctly.
8. **Final Checks:** Review all connections and fasteners to ensure they are tight and secure. Confirm the shed is stable and level.

*Note:* The tool storage shed will be divided into 7 packages, which may arrive at different times. Please scan the QR code on the package or contact the seller for information about other packages if they do not arrive together.

## 4. Operation

---

### Using the Sliding Doors:

The shed is equipped with sliding doors for easy access. To open, gently slide the doors along their tracks. To close, slide them back until they meet. The doors are designed to be lockable; however, a padlock is not included and must be purchased separately to secure your items.

### Utilizing the Windows:

The strategically placed windows allow natural light to illuminate the interior of the shed, reducing the need for artificial lighting during the day and improving visibility.

## 5. Maintenance

---

Regular maintenance will extend the life and appearance of your Devoko Plastic Storage Shed.

- **Cleaning:** Clean the shed periodically with mild soap and water. Avoid abrasive cleaners or harsh chemicals, which can damage the resin material. Rinse thoroughly with clean water.
- **Door Tracks:** Keep the sliding door tracks clear of dirt, leaves, and debris to ensure smooth operation.
- **Structural Integrity:** Periodically check all fasteners and connections to ensure they remain tight. Inspect the roof and walls for any signs of damage or wear, especially after severe weather.
- **Drainage:** Ensure the area around the shed's base remains clear to allow for proper water drainage and prevent moisture buildup.

## 6. Troubleshooting

---

### Common Issues and Solutions:

- **Missing Parts or Boxes:** The shed ships in multiple packages. If you believe parts are missing or not all

boxes have arrived, please contact the seller with your order information.

- **Difficulty During Assembly:** Ensure the ground is level. Re-check the instruction manual for specific steps, especially for the KICK-IT system. If issues persist, contact the seller for assistance.
- **Doors Not Sliding Smoothly:** Check the door tracks for any obstructions (dirt, debris) and clean them. Ensure the shed is level, as an uneven base can affect door alignment.
- **Water Inside the Shed:** Verify that all roof and wall panels are correctly installed and sealed. Check for any cracks or damage to the resin material. Ensure proper drainage around the shed's base.

For further assistance, please contact Devoko customer support.

## 7. Specifications

Feature	Detail
Brand	Devoko
Model Number	25PS23-0404-812BG
Color	Beige
Material	Plastic, Resin
Product Dimensions (D x W x H)	144.3" x 91.27" x 94.5"
Item Weight	487 Pounds
Floor Area	96 Square Feet
Door Width	54.2 Inches
Door Height	68.5 Inches
Door Style	Sliding Doors
Water Resistance Level	Water Resistant
Weight Capacity Maximum	1300 Pounds
UV Protection	Yes
Assembly Required	Yes

## 8. Customer Support

For any questions regarding assembly, missing parts, or product functionality, please contact the seller directly through your purchase platform. Provide your order number and a detailed description of the issue for prompt assistance.

**Warranty Information:** Specific warranty details may be provided with your product packaging. Please refer to those documents or contact the seller for warranty-related inquiries.
