

Bellemave B0FM822WP9

Bellemave Twin Floor Bed with Door and Fence (Gray)

Model: B0FM822WP9 | Brand: Bellemave

INTRODUCTION

Thank you for choosing the Bellemave Twin Floor Bed. This manual provides essential information for the safe assembly, operation, and maintenance of your new floor bed. This low-profile bed is designed with safety rails and a functional door, offering a secure and accessible sleeping environment for children.

The bed features integrated slats that elevate the mattress from the floor, promoting air circulation and hygiene. For alternative use, the slats can be removed, allowing a foam board or mattress to be placed directly on the floor, converting the space into a play area.

SAFETY INFORMATION

- **Adult Assembly Required:** This product requires adult assembly. Keep small parts away from children during assembly.
- **Weight Limit:** The maximum weight capacity for this bed is 250 pounds. Do not exceed this limit.
- **Regular Inspection:** Periodically check all bolts, screws, and fasteners to ensure they are tight and secure. Retighten as necessary.
- **Placement:** Position the bed away from windows, cords, and other potential hazards.
- **Mattress Compatibility:** Use a standard twin-size mattress that fits snugly within the bed frame to prevent gaps.
- **Door Safety:** Ensure the door latch is securely closed when the bed is in use to prevent accidental opening.

PACKAGE CONTENTS

Please verify that all components are present before beginning assembly. If any parts are missing or damaged, please contact customer support.

- Bed Frame Panels (Headboard, Footboard, Side Rails)
- Slats (8 pieces)
- Door Panel with Hinges
- Hardware Pack (screws, bolts, Allen wrench)
- Instruction Manual

SETUP (ASSEMBLY INSTRUCTIONS)

Follow these steps carefully for proper assembly. It is recommended to assemble the bed with two adults.

1. **Unpack and Identify Parts:** Lay out all components on a soft, clean surface to prevent scratches. Identify each part using the provided parts list (if included in your physical manual).
2. **Assemble Side Rails:** Attach the side rails to the headboard and footboard using the provided bolts and an Allen wrench. Ensure all connections are secure but do not overtighten initially.
3. **Install Slats:** Place the bed slats across the assembled frame. Secure each slat to the side rails using the designated screws. Ensure slats are evenly spaced and firmly attached. These slats provide mattress support and elevate it from the floor.
4. **Attach Door Panel:** Connect the door panel to the designated opening on the side rail using the pre-attached hinges. Ensure the door swings freely and the latch mechanism aligns properly.
5. **Final Tightening:** Once all components are in place, go back and securely tighten all bolts and screws. Do not overtighten to avoid damaging the wood.

OPERATING (USAGE GUIDELINES)

- **Mattress Placement:** Place a twin-size mattress directly on the installed slats. The slats provide ventilation and keep the mattress off the floor.
- **Door Functionality:** The small door can be opened and closed for easy access. Ensure the latch is engaged when the door is closed to secure the sleeping area.
- **Door Removal:** If desired, the door can be removed by detaching its hinges from the bed frame. This allows for an open access design.
- **Slats Removal for Play Area:** For a floor-level play space, the slats can be removed. Place a foam board or mattress directly on the floor within the bed frame.
- **Low Profile Design:** The bed's low height and surrounding rails are designed to provide a safe and accessible environment for young children.

MAINTENANCE

- **Cleaning:** Wipe the bed frame with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, which can damage the wood finish.
- **Dusting:** Regularly dust the bed frame to prevent buildup.
- **Hardware Check:** Periodically inspect all screws, bolts, and connections. Tighten any loose hardware to maintain stability and safety.
- **Avoid Moisture:** Keep the bed in a dry environment. Prolonged exposure to moisture can cause damage to the wood.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Bed feels unstable or wobbly.	Loose hardware.	Check and tighten all bolts and screws. Ensure all connections are secure.

Problem	Possible Cause	Solution
Slats make cracking noises under weight.	Weight exceeding capacity; uneven weight distribution; loose slat connections.	Ensure the total weight on the bed does not exceed 250 pounds. Verify all slats are securely fastened. If issues persist, contact customer support.
Door does not close or latch properly.	Misaligned hinges or latch; obstruction.	Check hinge alignment and adjust if necessary. Ensure no objects are obstructing the door's path. Verify the latch mechanism is free of debris.
Wood has an unusual odor.	New product odor from manufacturing or finish.	Allow the bed to air out in a well-ventilated room for a few days. The odor should dissipate over time.

SPECIFICATIONS
