NOMAD NM014780858

NOMAD Universal Cable for Apple Watch and USB-C Devices

MODEL: NM014780858

Introduction and Overview

The NOMAD Universal Cable is a versatile 1.5-meter USB-C charging solution designed to power your Apple Watch, AirPods, iPhone, and other USB-C compatible devices. Featuring an integrated Apple Watch charging puck and supporting up to 100W power delivery, this cable streamlines your charging setup for both daily use and travel.

NOMAD

1.5m | Made with Kevlar®

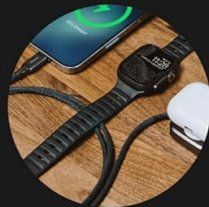

Universal Cable for Apple Watch

**Integrated
cable tie**

**Apple Watch
Fast Charger**

**Kevlar®
reinforcement**

Kevlar® is a trademark of affiliates of DuPont de Nemours, Inc. used under license by Nomad Goods.

*Does not include 65W Slim Power Adapter

Product Features

- **Universal Compatibility:** This cable is engineered to fast-charge your Apple Watch, AirPods, and a wide range of USB-C devices simultaneously, making it an ideal all-in-one charging solution.
- **Integrated Apple Watch Charging Puck:** A built-in, Apple-certified charging puck allows for convenient and fast charging of your Apple Watch.
- **Durable Construction:** The cable features a robust nylon weave and Kevlar reinforcement, designed to withstand daily wear and tear. Connectors are equipped with metal overmolds for enhanced durability.
- **High-Speed Power Delivery:** Capable of delivering up to 100W of power, ensuring quick and efficient charging for devices such as laptops, smartphones, and other accessories.
- **Silicone Cable Tie:** An integrated, non-detachable Liquid Silicone Rubber (LSR) tie is included for easy and secure cable management, preventing tangles.

Made with Kevlar®

100W for Fast Charging

RF Shield for Fast Sync

Thick Moisture Barrier

Made with Kevlar® & Nylon

Setup

1. **Connect to Power Source:** Plug the main USB-C end of the NOMAD Universal Cable into a compatible power adapter. For optimal performance and dual-device charging, a power adapter with at least 20W output is recommended. The cable supports up to 100W.
2. **Charge Apple Watch:** Place your Apple Watch onto the integrated magnetic charging puck. Ensure it is properly aligned for charging to begin.
3. **Charge USB-C Device:** Connect the USB-C plug located on the Apple Watch puck to your desired USB-C compatible device, such as an iPhone, iPad, MacBook, or AirPods charging case.

Operating Instructions

The NOMAD Universal Cable offers flexible charging options for various Apple and USB-C devices.

- **Simultaneous Charging:** The cable is designed to charge an Apple Watch and another USB-C device concurrently. For instance, you can connect the main USB-C end to a power adapter, place your Apple Watch on its puck, and then plug your iPhone into the USB-C port on the puck.

- **Device-to-Device Charging:** You can utilize a compatible USB-C device (e.g., iPad Pro, MacBook, or even an iPhone 15 or newer) as a power source to charge your Apple Watch. Simply plug the Apple Watch puck's USB-C connector directly into your device's USB-C port, then place your Apple Watch on the puck.
- **Wireless AirPods Charging:** For AirPods cases that support wireless charging, you can place them directly on the Apple Watch charging puck to charge them wirelessly. This can be done while simultaneously charging another wired USB-C device.

Maintenance

- **Cleaning:** Keep the cable and connectors clean and free from dust or debris. Use a soft, dry cloth for cleaning.
- **Cable Management:** Utilize the integrated silicone cable tie to neatly coil and secure the cable when not in use or during travel. This helps prevent tangling and damage.
- **Storage:** Store the cable in a cool, dry place. Avoid extreme temperatures or direct sunlight.
- **Handling:** Avoid excessive bending or sharp angles, especially near the connectors, to maintain the cable's integrity and prolong its lifespan.

Silicone Cable Tie

An integrated cable tie allows you to manage your cable at home or on-the-go. Built with near-indestructible Liquid Silicone Rubber (LSR), the tie won't fray or tear with everyday use.

Troubleshooting

- **Device Not Charging:**
 - Ensure both ends of the cable are securely plugged into the power source and the device.
 - Verify that your power adapter provides sufficient wattage for the connected devices. For dual charging, a minimum of 20W is recommended.
 - Check for any debris or obstructions in the USB-C ports or on the Apple Watch charging puck.
- **Apple Watch Not Fast Charging:**

- Confirm that your power adapter is capable of delivering at least 20W of power.
- Ensure your Apple Watch model supports fast charging.

- **Cosmetic Wear on Puck (Carbide Version):**

- The darker finish on the Apple Watch puck may show minor cosmetic wear or scratches over time with regular use. This is typically superficial and does not affect the charging functionality of the device.

Specifications

| | |
|-----------------------------|--|
| Brand | NOMAD |
| Model | NM014780858 |
| Cable Length | 1.5 meters |
| Connector Type | USB Type C (both ends) |
| Power Delivery | Up to 100W |
| Apple Watch Charging | Fast charging supported, Apple certified |
| Cable Material | Kevlar reinforced nylon weave |
| Integrated Feature | Silicone cable tie |
| Compatible Devices | Apple Watch, AirPods, iPhone, iPad, MacBook, and other USB-C devices |
| Data Transfer Rate | 480 Megabits Per Second |

What's in the Box

- 1x NOMAD Universal Cable for Apple Watch (1.5m, Carbide)
