TECPHILE Card Air Tag Tracker

TECPHILE InCard Finder Smart Tracker User Manual

Model: Card Air Tag Tracker

INTRODUCTION

The TECPHILE InCard Finder is a versatile smart tracker designed to help you locate your valuable items. It offers dual compatibility with both Apple Find My and Google Find My Device networks, providing broad tracking capabilities. Its ultra-slim, credit card-sized design allows for discreet placement in wallets, bags, and other personal items. This manual provides detailed instructions for setup, operation, and maintenance of your InCard Finder.

KEY FEATURES

- **Dual Network Compatibility:** Works with both Apple Find My (iOS) and Google Find My Device (Android) networks.
- **Long Battery Life:** Up to 5 years on Android devices and up to 3 years on iOS devices, with no recharging required.
- **Ultra-Slim Design:** Measures just 1.7mm thin, fitting seamlessly into wallet slots or passport covers.

Your Wallet's Invisible Guard

**Slim as a credit card fits right into
your wallet without adding bulk**

Image: A hand demonstrating how the ultra-slim InCard Finder fits discreetly into a wallet slot, highlighting its credit card-like dimensions.

- **Loud 90dB Alert:** Emits a clear audible alert to help locate items quickly, even in noisy environments.
- **IP68 Water and Dust Resistant:** Provides protection against spills, rain, and dust, ensuring durability.

IP68 Protection You Can Trust

Lightweight design with long-range tracking power.

Image: Two InCard Finder devices being splashed with water, demonstrating their IP68 water and dust resistance for various environments.

- **Global Finding Network:** Utilizes millions of Apple and Google devices worldwide for location tracking beyond Bluetooth range.

SETUP INSTRUCTIONS

Before you begin, ensure your smartphone has Wi-Fi or mobile data enabled.

1. Locate the button on the front of your InCard Finder.
2. Place the InCard Finder near your smartphone.
3. Press the button on the InCard Finder once. You will hear a beep, and an LED light will blink, confirming activation.
4. **For Android Devices:** A pop-up notification will appear on your phone. Follow the on-screen instructions to connect via Google Find My Device.
5. **For iOS Devices:** Open the Apple Find My app. Navigate to "Items" and select "Add Other Item" to connect to the Apple Find My network.

Switching Networks (Factory Reset)

To switch your InCard Finder between the Apple Find My and Google Find My Device networks, a quick factory reset is required. The procedure for this is typically detailed within the respective Find My applications or the device's support documentation. This allows for seamless transition if you change phone ecosystems or share the tracker.

OPERATING INSTRUCTIONS

Locating Your Item

- Using the App:** Open the Apple Find My app (for iOS) or Google Find My Device app (for Android) on your smartphone.
- View Location:** The app will display the last known location of your InCard Finder on a map.
- Play Sound:** If your item is nearby, select the "Play Sound" option within the app. The InCard Finder will emit a loud 80-90dB alert to help you pinpoint its exact location.

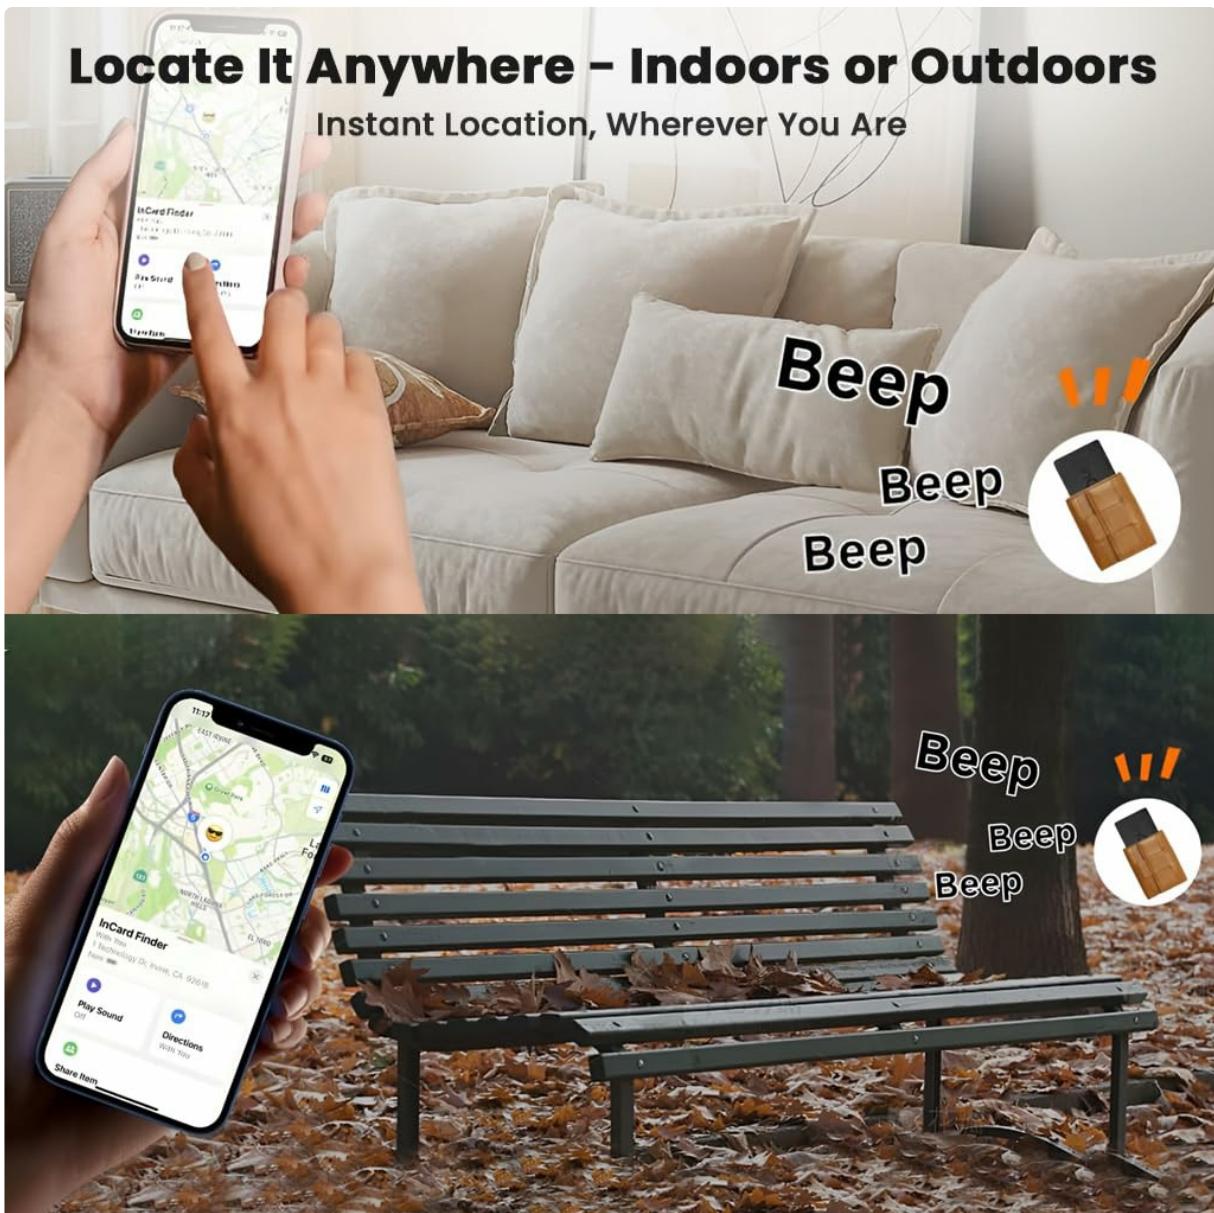

Image: A user interacting with their smartphone to locate the InCard Finder, with visual cues indicating sound alerts both indoors (on a sofa) and outdoors (on a park bench).

Global Tracking

The InCard Finder leverages the extensive Apple Find My and Google Find My Device networks. If your item is out of Bluetooth range, the location will be updated anonymously by other Apple or Google devices that come within range of your InCard Finder. This crowd-sourced network allows for tracking over long distances, ensuring your valuables can be located virtually anywhere.

Maintenance

The TECPHILE InCard Finder is designed for minimal maintenance. It features a non-rechargeable, non-replaceable internal battery with an estimated lifespan of up to 5 years for Android devices and 3 years for iOS devices. No charging or battery replacement is required during its operational life.

To ensure optimal performance, keep the device clean and free from excessive dirt or debris. While it is IP68 water and dust resistant, prolonged submersion or exposure to harsh chemicals should be avoided.

Troubleshooting

- **Device Not Connecting:**

- Ensure Bluetooth is enabled on your smartphone.
- Verify your phone has an active internet connection (Wi-Fi or mobile data).
- Perform a factory reset on the InCard Finder and attempt to re-pair.
- Ensure the InCard Finder is within Bluetooth range of your phone during initial pairing.

- **Sound Alert Not Loud Enough:**

- The sound can be muffled if the InCard Finder is deeply embedded in a wallet or bag. Try to move the item to a more open area.
- The 90dB alert is designed to be audible in most environments, but extreme noise levels may reduce its effectiveness.

- **Inaccurate Location:**

- Location accuracy depends on the density of the Find My network in the area. In remote locations, updates may be less frequent.
- Ensure your phone's location services are enabled for the Find My app.

- **Battery Life Concerns:**

- The battery is designed for long-term use (up to 5 years Android, 3 years iOS) and is non-replaceable. If the device is no longer functioning after this period, it has reached the end of its battery life.

Specifications

Brand	TECPHILE
Model	Card Air Tag Tracker
Product Dimensions	8.56 x 5.8 x 0.17 cm
Item Weight	12 g
Material	PVC

Connectivity Technology	Bluetooth
Supported Application	Apple Find My, Google Find My Device
Special Features	Location History, Real Time Tracking, Up to 5 Years battery life, Water Resistant (IP68)
Battery Average Life	Up to 5 Years (Android), Up to 3 Years (iOS)
Batteries Required	No (Internal, non-replaceable)
Country of Origin	China
