SETUP: ASSEMBLY INSTRUCTIONS

Follow these steps carefully to assemble your roomfitters Metal Twin Size House Platform Bed. It is recommended to have two people for assembly.

Tools Required:

- Allen Wrench (included)

1. **Unpack and Identify Parts:** Carefully remove all components from the packaging. Lay them out on a soft, clean surface to prevent scratches. Refer to the "Package Contents" section to identify each part.

2. **Assemble the Base Frame:**

   Connect the two Side Rails (B) to one Headboard/Footboard Frame Section (A) using the provided bolts and washers. Do not fully tighten the bolts yet. Repeat for the second Headboard/Footboard Frame Section (A).

3. **Attach the Top Horizontal Bar:**

Secure the Top Horizontal Bar (D) between the two Headboard/Footboard Frame Sections (A) at the top of the house structure. Use the appropriate bolts and washers. Ensure it is centered and level.

4. **Install Support Slats:**

Place the Support Slats (C) across the Side Rails (B). Ensure they are evenly spaced and securely seated in their designated slots or attached with provided fasteners. The slats form the mattress support.

5. **Final Tightening:**

Once all parts are assembled, go back and fully tighten all bolts using the Allen wrench. Do not overtighten, but ensure all connections are firm and secure. The frame should feel stable.

6. **Inspect:**

Perform a final inspection to ensure all parts are correctly installed and tightened. The bed frame is now ready for use.

OPERATING INSTRUCTIONS

General Use

- Place a standard twin-size mattress directly onto the support slats. A box spring is not required.

- The unique triangular frame design includes a horizontal board at the top, which can be used for hanging lightweight decorative items or towels. Do not hang heavy objects that could compromise stability.

- The low-profile design and X-shaped safety railings are intended to provide a secure sleeping environment, especially for younger users.

MAINTENANCE

Cleaning and Care

- **Regular Cleaning:** Wipe the metal frame with a dry cloth to remove dust.

- **Spot Cleaning:** For spills or marks, wipe with a damp cloth. Avoid abrasive cleaners or harsh chemicals, as these can damage the finish.

- **Hardware Check:** Periodically (e.g., every 3-6 months) check all bolts and screws to ensure they remain tight. Re-tighten if necessary to maintain structural integrity.

- **Avoid Moisture:** Keep the bed frame in a dry environment to prevent rust or damage to the metal.

TROUBLESHOOTING
