Familiarize yourself with the projector's physical components:

1. **Projection Lens:** Emits the image.
2. **Power Button:** Turns the projector on/off.
3. **Focus Sensor:** Detects distance for auto-focus.
4. **Air Vents:** For cooling the device. Ensure these are not obstructed.
5. **HDMI Port:** Connects to external devices (laptops, gaming consoles).
6. **USB Port:** For media playback from USB drives.
7. **Audio Out (3.5mm Jack):** Connects to external speakers or headphones.
8. **DC Power Input:** Connects to the power adapter.
9. **Integrated Stand:** Allows for 360-degree rotation and angle adjustment.

4. SETUP

4.1 Initial Placement

1. Place the projector on a stable, flat surface.
2. Ensure there is adequate ventilation around the projector. Do not block air vents.
3. Adjust the integrated 360° rotating stand to achieve the desired projection angle and height. The projector can project onto walls, ceilings, or screens.

Image 4.1: Example of projector placement and use in a room.

4.2 Power Connection

1. Connect the power adapter to the DC Power Input port on the projector.
2. Plug the power adapter into a wall outlet.
3. Press the Power Button on the projector or remote control to turn it on.

4.3 Network Connection (Wi-Fi 6)

1. Once powered on, navigate to the "Settings" menu on the projector's interface.

2. Select "Network" or "Wi-Fi Settings".
3. Choose your Wi-Fi network from the list of available networks.
4. Enter the Wi-Fi password using the on-screen keyboard and remote control.
5. Confirm the connection.

4.4 Bluetooth Connection

1. Go to the "Settings" menu and select "Bluetooth".
2. Turn on Bluetooth. The projector will search for nearby Bluetooth devices.
3. Select your desired Bluetooth speaker or headphones from the list to pair.

5. OPERATING INSTRUCTIONS

5.1 Navigation

Use the provided remote control to navigate the projector's interface. The main screen provides access to installed applications, settings, and input sources.

Image 5.1: Remote control for the VOPLLS Q5 Projector.

5.2 Auto Focus and Keystone Correction

The VOPLLS Q5 features automatic focus and keystone correction. Upon startup or movement, the projector will automatically adjust the image for clarity and correct trapezoidal distortion. No manual adjustments are typically required.

5.4 External Device Connection (HDMI)

1. Connect one end of the HDMI cable to the HDMI port on the projector.
2. Connect the other end to the HDMI output port of your external device (e.g., laptop, game console).
3. On the projector's home screen, select the "HDMI" input source.

5.5 Screen Mirroring

The projector supports screen mirroring from compatible iOS and Android devices. Navigate to the "Screen Mirroring" option on the projector's interface and follow the on-screen instructions for your specific device.

6. MAINTENANCE

6.1 Cleaning the Lens

Gently wipe the projector lens with a soft, lint-free cloth specifically designed for optical surfaces. Do not use abrasive cleaners or excessive force.

6.2 Cleaning the Projector Body

Use a soft, dry cloth to clean the exterior of the projector. For stubborn marks, a slightly damp cloth can be used, followed by a dry cloth. Avoid getting moisture into any openings.

6.3 Ventilation

Regularly check that the air vents are clear of dust and debris to prevent overheating. Do not place the projector on soft surfaces that may block airflow.

6.4 Storage

When not in use for extended periods, store the projector in a cool, dry place, away from direct sunlight and extreme temperatures. Consider using the original packaging or a protective case.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
No Power	Power cable not connected; Power outlet faulty.	Ensure power cable is securely connected. Try a different power outlet.
No Image	Incorrect input source; Lens cap on; Device not connected.	Select correct input source (HDMI, App). Remove lens cap. Check device connections.
Blurry Image	Projector moved; Auto-focus obstructed.	Allow auto-focus to recalibrate. Ensure nothing is blocking the focus sensor.
Distorted Image (Trapezoid)	Projector not perpendicular to screen; Auto-keystone obstructed.	Allow auto-keystone to recalibrate. Ensure nothing is blocking the sensor.
No Sound	Volume too low; Muted; External audio device not connected/paired.	Increase volume. Unmute. Check Bluetooth connection or external audio cable.
Wi-Fi Connection Issues	Incorrect password; Router too far; Network interference.	Re-enter password. Move projector closer to router. Restart router.
