

## VOLLYC 2PACK-PUMP

# VOLLYC 25L Travel Vacuum Bags with Pump Instruction Manual

Model: 2PACK-PUMP

## INTRODUCTION

Thank you for choosing the VOLLYC 25L Travel Vacuum Bags with Pump. This product is designed to optimize your packing space, protect your belongings, and offer versatile storage solutions for travel and home use. This manual provides essential information for the proper setup, operation, and maintenance of your vacuum bags and pump.

## PACKAGE CONTENTS

Please verify that all items are present in your package:

- 2 x VOLLYC 25L Travel Vacuum Bags
- 1 x Electric Vacuum Pump
- 1 x USB-C Charging Cable
- Various Nozzles/Attachments for pump (for inflation/deflation of other items)

This image displays the complete VOLLYC 25L Travel Vacuum Bag set, including two white vacuum bags and the compact orange electric pump.

## SETUP

### 1. Charging the Pump

Before first use, fully charge the electric vacuum pump. Connect the provided USB-C charging cable to the pump and a suitable power source (e.g., wall adapter, power bank). The indicator light will show charging status and turn off when fully charged.

### 2. Preparing the Vacuum Bag

1. Locate the oversized sealed zipper on the bag.
2. Open the zipper completely.
3. Fold and place your clothing or other soft items neatly inside the bag. Avoid overfilling, as this can hinder proper compression and sealing.
4. Carefully close the zipper, ensuring it is fully sealed across the entire length to prevent air leakage. Use the T-puller if available to ensure a tight seal.

VOLLYC EZY SET

# PACK SMARTER, SAVE BIGGER.

A user is shown carefully placing folded clothes into the open VOLLIC vacuum bag, preparing it for compression.

## OPERATING INSTRUCTIONS

### 1. Vacuum Compression

1. Ensure the bag's main zipper is completely sealed.
2. Locate the grey plug on the bag's valve and open it.
3. Attach the electric pump firmly onto the valve opening. Ensure a snug fit.
4. Press the power button on the pump to start the vacuuming process. The pump will automatically extract air from the bag.
5. Allow the pump to operate until the bag is compressed to your desired level, or until the pump automatically stops.
6. Once compression is complete, quickly remove the pump and firmly close the grey plug on the bag's valve to maintain the vacuum seal.

## Crush Space with 85% Compression

This image illustrates the significant space saving achieved by the VOLLYC vacuum bags, showing a large stack of clothes before compression and the same clothes reduced to a compact size after vacuuming.

The compact VOLLYC electric pump is shown attached to the vacuum bag's valve, actively compressing the contents.

## 2. Inflation Mode (for other items)

The electric pump can also be used to inflate various items such as small air mattresses, cushions, or sports equipment. Select the appropriate nozzle attachment and connect it to the **inflation port** of the pump. Press the power button to begin inflation.

## 3. Lighting Mode

The pump features an integrated flashlight. To activate, press and hold the power button for a few seconds. The light has multiple brightness settings; press the button briefly to cycle through them. The pump also has a small handle for hanging, allowing it to function as a lantern.

# EZYPACK

This image highlights the multi-functional capabilities of the VOLLYC pump, showcasing its use for inflation, deflation of vacuum bags, and as a portable light source.

## 4. 2-in-1 Design: Suitcase Liner or Backpack

The VOLLYC vacuum bags are designed for versatility. They can be used as space-saving inner liners within your suitcase or backpack. Additionally, the bags feature auxiliary points for attaching shoulder straps (sold separately or included in some kits) to convert them into a waterproof backpack for daily carry or outdoor adventures.

# Space for Your Entire Journey

25L-EZY SET'S roomy design fits days worth of clothes

A compressed VOLLIC vacuum bag is shown being neatly placed inside a suitcase, demonstrating its function as a space-saving liner.

## MAINTENANCE

### Care and Cleaning

- **Vacuum Bags:** Wipe the bags with a damp cloth and mild soap if necessary. Rinse thoroughly and allow to air dry completely before storage. Do not machine wash or tumble dry.
- **Electric Pump:** Keep the pump dry and clean. Wipe with a dry cloth. Do not submerge the pump in water.
- **Storage:** Store the vacuum bags and pump in a cool, dry place away from direct sunlight and extreme temperatures.

## TROUBLESHOOTING

### Common Issues and Solutions

- **Bag not compressing fully:**
  - Ensure the main zipper is completely and securely sealed across its entire length.

- Check that the grey plug on the valve is fully open before attaching the pump.
  - Verify the pump is firmly attached to the valve without any gaps.
  - Avoid overfilling the bag; items should be able to flatten.
- **Air re-enters the bag after compression:**
    - Double-check that the main zipper is perfectly sealed. Even a small gap can cause air leakage.
    - Ensure the grey plug on the valve is firmly and completely closed immediately after removing the pump.
    - Inspect the bag for any punctures or tears.
  - **Pump not turning on:**
    - Check the pump's battery level and recharge if necessary.
    - Ensure the power button is pressed correctly (a short press for vacuum/inflation, a long press for lighting).

## SPECIFICATIONS

<b>Brand</b>	VOLLYC
<b>Model</b>	2PACK-PUMP
<b>Capacity</b>	25 Liters per bag
<b>Material</b>	70D Nylon and TPU Composite
<b>Waterproof Rating</b>	IPX7 (Zipper)
