

LAUNCH X431 CRP919XBT

Launch X431 CRP919XBT ECU Coding OBD2 Scanner User Manual

Model: X431 CRP919XBT | Brand: LAUNCH

1. PRODUCT OVERVIEW

The Launch X431 CRP919XBT is an advanced ECU Coding OBD2 Scanner designed for comprehensive vehicle diagnostics. It features all-system bidirectional scanning capabilities, over 35 hot maintenance services, and supports modern protocols like CAN-FD and DoIP. Running on Android 10, this tool offers a fast and intuitive user experience for automotive professionals.

Image 1.1: The Launch X431 CRP919XBT diagnostic tablet and its accompanying VCI (Vehicle Communication Interface) module. The tablet features a large display, and the VCI module connects wirelessly to the tablet for vehicle communication.

2. What's in the Box

Verify that all items listed below are included in your package:

- CRP919XBT Main Unit (Diagnostic Tablet)
- VCI DBScar VII Module
- Carrying Case
- Diagnostic Cable
- Type A to Type C USB Cable
- Power Adapter
- Switching US/UK/EU Adapter
- Password Envelope

- User Manual
- Quick Start Guide

Image 2.1: An illustration showing the complete contents of the CRP919X BT package, including the main unit, VCI connector, cables, adapters, and documentation, all neatly organized within a carrying case.

3. SETUP

1. **Charge the Device:** Connect the CRP919XBT main unit to the power adapter using the provided Type A to Type C USB cable. Ensure the device is fully charged before first use.
2. **Power On:** Press and hold the power button on the tablet until the screen illuminates.
3. **Initial Configuration:** Follow the on-screen prompts to select your language, connect to a Wi-Fi network, and set up your time zone.
4. **VCI Connection:** Plug the VCI DBScar VII module into the vehicle's OBD-II port. The VCI will automatically establish a Bluetooth connection with the CRP919XBT main unit. Ensure the VCI indicator lights are active.
5. **Software Update:** Navigate to the 'Software Update' section on the main menu to download and install the latest software versions for optimal performance and vehicle coverage.

4. OPERATING INSTRUCTIONS

4.1. General Operation

The CRP919XBT operates on Android 10.0, providing a user-friendly interface. The 7-inch touchscreen allows for intuitive navigation through menus and functions. The device is powered by a 2GHz quad-core processor with 4GB RAM and 64GB storage, ensuring fast operation and ample space for diagnostic data and software.

Image 4.1.1: This image highlights the CRP919X BT's operational speed and ease of use, featuring its Android 10.0 OS, 2.0GHz 4-core processor, 4GB RAM, 64GB ROM, 7-inch screen, 8MP rear camera, 2.4GHz Wi-Fi, and 6300 mAh battery, enabling 13+ hours of work and one-touch diagnostics.

4.2. Wireless Diagnostics

The CRP919XBT utilizes a wireless VCI module for Bluetooth connectivity, allowing diagnostics up to 33 feet (10 meters) from the vehicle. This eliminates the need for a wired connection to the diagnostic port, providing flexibility and a cleaner workspace. A Type-A to Type-C USB cable can also be used for a wired connection if preferred.

Image 4.2.1: This graphic illustrates the wireless diagnostic capability of the CRP919X BT, showing the VCI module communicating with the tablet via Bluetooth, allowing the user to diagnose the vehicle from a distance of up to 33 feet (10 meters).

4.3. AutoVIN & Scan

The device supports one-touch AutoVIN functionality for vehicles manufactured from 2006 onwards. This feature automatically identifies the vehicle's make, model, and year, streamlining the diagnostic process. If AutoVIN fails, manual VIN input is available.

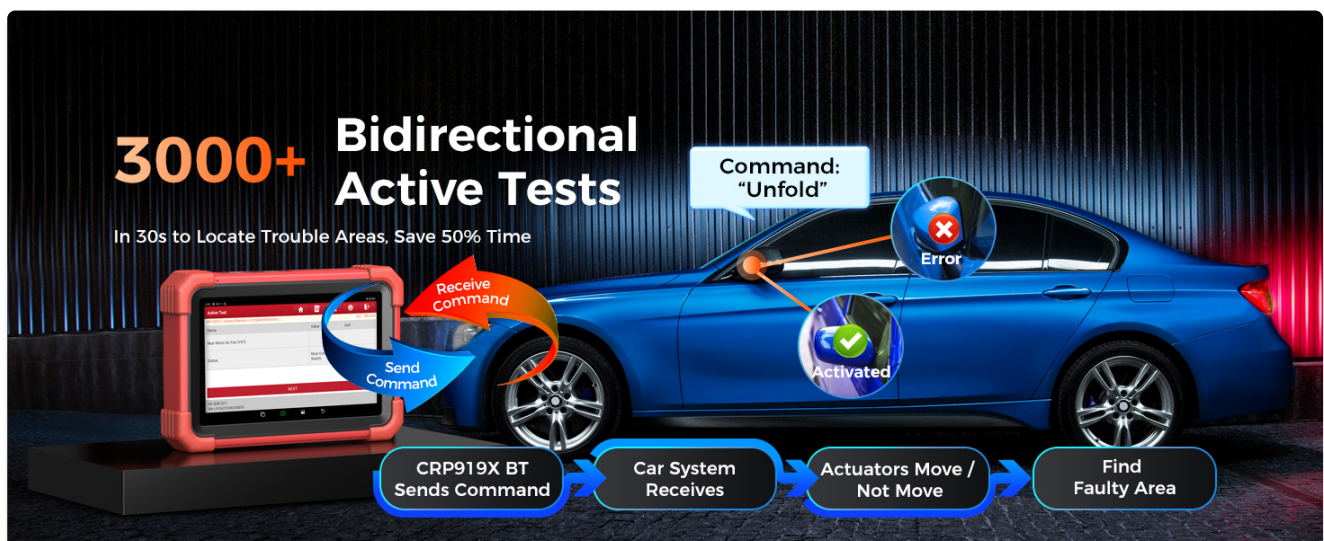

Image 4.3.1: A visual representation of the one-touch AutoVIN & Scan function, demonstrating how the CRP919X BT automatically reads vehicle details, simplifying the diagnostic initiation process.

4.4. All System Diagnostics

The CRP919XBT performs a comprehensive scan of all available electronic control units (ECUs) in the vehicle. It can read and clear over 8,000 Diagnostic Trouble Codes (DTCs) from systems such as ABS, SRS (airbag), engine, automatic transmission (AT), PCM, ECM, EPS, PDM, TPM, and BCM. Real-time data streams can be viewed in various formats to quickly pinpoint faults.

All-System Bi-directional Diagnostics

Image 4.4.1: This graphic illustrates the all-system bidirectional diagnostic capabilities, showing the scanner communicating with various vehicle modules like TCM, ABS, SRS, and ECM, and performing active tests on components such as windows, mirrors, throttle, and fans.

4.5. ECU Coding (Online/Offline)

This function allows for advanced vehicle customization and repair. It can address DTCs related to actuator circuit breaks, install new modules, and modify vehicle settings such as one-touch windows or sport-style lighting. It also enables closing unneeded settings like seat-belt chimes. ECU coding is available for various brands including Mercedes-Benz, BMW, Volkswagen, Audi, GM, Ford, and Porsche. Always back up vehicle data before performing coding operations.

4.6. Active Tests (Bidirectional Control)

The CRP919XBT supports over 3000 active tests, enabling direct command sending from the scan tool to vehicle components. This allows technicians to test solenoids, actuators, and other components while they are still installed in the vehicle. This function helps in quickly identifying whether a component is faulty or if there is a wiring issue, covering items like fans, lights, horn, doors, windows, brakes, throttle, A/C, clutches, mirrors, cameras, pumps, and valves. Compatibility varies by vehicle model.

Image 4.6.1: This image depicts the bidirectional control functionality, showing the scanner sending commands to a vehicle to activate or deactivate components for diagnostic purposes, helping to locate faulty areas.

4.7. Hot Services (Maintenance Functions)

The device offers over 35 hot reset and maintenance services, including but not limited to:

- EPB (Electronic Parking Brake) Reset
- Oil Reset
- DPF (Diesel Particulate Filter) Regeneration
- SAS (Steering Angle Sensor) Calibration
- TPMS (Tire Pressure Monitoring System) Reset
- BMS (Battery Management System) Reset
- Injector Coding

4.8. Graphic Live Data

The CRP919XBT allows for the display of live data streams in multiple formats, including analog gauge, plain text, waveform graph, and digital gauge. It can display up to 8 multiple PIDs (Parameter IDs) on one screen simultaneously, facilitating detailed analysis of vehicle performance. Data can be recorded, played back, and screenshots can be taken for further review or sharing.

4.9. CAN-FD/DoIP Support

The scanner is compatible with CAN-FD and DoIP protocols, ensuring support for newer vehicle models. An optional DoIP adapter may be required for full DoIP functionality.

Image 4.9.1: A graphic indicating the CRP919X BT's compliance with DoIP and CAN-FD protocols, essential for diagnosing modern vehicles.

4.10. FCA SGW Access

The CRP919XBT supports FCA AutoAuth, allowing direct connection and coding for 2018+ FCA vehicles without the need for an additional 12+8 cable.

Image 4.10.1: This image highlights the FCA SGW (Security Gateway) Access feature with AutoAuth, indicating that the scanner can connect to 2018+ FCA vehicles without special cables.

4.11. V.A.G Guided Function

The device includes built-in V.A.G (Volkswagen Audi Group) step-by-step guides to assist with complex diagnostic and service procedures for compatible vehicles.

5. MAINTENANCE

5.1. Battery Management

The CRP919XBT is equipped with a 6,300 mAh Lithium Polymer battery, providing over 14 hours of continuous operation. To prolong battery life, avoid extreme temperatures and fully charge the device regularly. The device supports USB-C super charge, allowing use with standard car chargers or power banks.

Image 5.1.1: This image highlights the device's 6300 mAh battery, emphasizing its capability for 14 hours of all-day work and USB-C super charging.

5.2. Software Upgrades

The purchase of the CRP919XBT includes 2 years of free software upgrades. Regular updates ensure the scanner remains compatible with new vehicle models and gains additional features and optimizations. Connect the device to a Wi-Fi network and navigate to the 'Software Update' section to check for and install available updates.

6. TROUBLESHOOTING (FAQs)

Q: Does the CRP919XBT support diesel, hybrid, and European models?

A: Yes, it supports these models. For specific compatibility, it is recommended to contact technical support with your vehicle's make, model, and year.

Q: Can it perform ECU coding and active tests?

A: Yes, the CRP919XBT is a bidirectional scan tool that supports both ECU coding and active tests.

Q: Is the device wireless, and what is its battery life?

A: Yes, it operates wirelessly via Bluetooth. The 6,300mAh battery provides approximately 14 hours of runtime.

Q: Can it read transmission and airbag trouble codes?

A: Yes, it can read over 8,000 fault codes across all vehicle systems, including transmission and airbag (SRS) systems.

Q: Is it compatible with 2020+ new models?

A: Yes, it supports CAN FD protocol and includes 2 years of free upgrades to ensure compatibility with newer models. For technical assistance, you can reach out to Tech_Launchoriginal@outlook.com.

FAQs of CRP919X BT

Does it support diesel, hybrids & European models?

Yes. Better message us to check compatibility before buying.

Can it perform ECU coding & active tests?

Yes. It is a bidirectional scan tool featuring **ECU Coding**.

Is it wireless? What's the battery life?

Yes. Bluetooth wireless operation; **14-hour** runtime (**6,300mAh** battery).

Can it read transmission & airbag trouble codes?

Yes. Reads **8,000+** fault codes across all systems.

Is it compatible with 2020+ new models?

Yes. CAN FD + **2-year upgrades** (renew weekly). Tech. Assistance: **Tech_Launchoriginal @ outlook, com**

FAQs for LAUNCH CRP919X BT

Q: I connected LAUNCH TECH USA but didn't receive support.

A: You can contact us directly via Amazon or our Customer
Service Team at launch-aftersales@outlook.com. Please note
that our products are original from LAUNCH TECH CO., LTD,
the headquarters of LAUNCH. While LAUNCH TECH USA is a
branch in the USA, we are competitors and they do not provide
after-sales service for products purchased online. Feel free to
reach out to us for any assistance.

Q: My CRP919X BT won't charge or turn on.

A: You can try fast booting the scanner and use the original
USB cable for charging:

Press the power and volume "+" buttons simultaneously until
the tablet vibrates, entering "Fast Mode."

Select the Recovery mode interface using the volume buttons,
confirm with the power button.

Choose "wipe data/factory reset" and then "wipe cache
partition," confirming each step with "yes."

Afterward, power off and then normally power on the device.

Q: How do I register the CRP919X BT?

A: To register, select "New Registration," follow the steps to
create an account, and activate the VCI. Use the password
envelope included in the package.
