MAINTENANCE

Regular cleaning and proper care will ensure the longevity and appearance of your Homary bathroom vanity.

Countertop Care:

The sintered stone countertop is scratch-resistant and water-repellent, making it easy to maintain.

Scratch-Resistant, Water-Repellent Countertop

The scratch-resistant and water-repellent sintered stone countertop is easy to clean.

- Wipe spills immediately with a soft, damp cloth.
- For general cleaning, use a mild, non-abrasive cleaner and a soft cloth.
- Avoid harsh chemicals, abrasive pads, or acidic cleaners, as these can damage the surface.
- Do not place extremely hot items directly on the countertop without protection.

Cabinet and Drawer Care:

- Clean the white finish with a soft, damp cloth and mild soap.
- Avoid excessive moisture, especially around edges and seams.
- Periodically check and tighten any loose hardware on drawers and cabinet doors.

Sink Care:

- Clean ceramic sinks with non-abrasive cleaners to prevent scratching.
- Rinse thoroughly after cleaning to remove any residue.

TROUBLESHOOTING

If you encounter any issues with your vanity, please refer to the following common solutions:

- **Loose Drawers/Doors:** Check and tighten the screws on hinges and drawer slides.
- **Water Leaks:** Inspect all plumbing connections under the sink. Tighten any loose fittings or replace worn washers/seals. If leaks persist, consult a professional plumber.
- **Stains on Countertop:** For stubborn stains, use a specialized cleaner recommended for sintered stone. Always test on an inconspicuous area first.
- **Scratches:** While the countertop is scratch-resistant, deep scratches may require professional repair.
