Homiflex Cat Wall Shelves Instruction Manual

Model: MAHfleUhqnl | Brand: Homiflex

INTRODUCTION

Thank you for choosing the Homiflex Cat Wall Shelves. This modular wall-mounted cat furniture set is designed to provide a stimulating and comfortable environment for your feline companions, maximizing vertical space in your home. This manual provides essential information for safe installation, proper use, and maintenance of your cat wall shelves.

SAFETY INFORMATION

Please read and understand all instructions before assembly and use. Failure to follow these instructions may result in injury or damage to the product or property.

- Ensure the wall surface is suitable for mounting and can support the weight of the shelves and your cat(s). Consult a professional if unsure.
- Always locate wall studs or use appropriate wall anchors for secure installation.
- Regularly inspect all components for wear, damage, or loose connections. Tighten fasteners as needed.
- Keep small parts and packaging materials away from children and pets during assembly.
- Do not exceed the recommended weight capacity (refer to specifications).
- This product is intended for indoor use only.

PACKAGE CONTENTS

Verify that all components listed below are present before beginning assembly. If any parts are missing or damaged, please contact Homiflex customer support.

- 1 x Cat Condo
- 1 x Cat Bed/Perch
- 1 x Cat Tunnel
- 2 x Bridge Ladders
- 3 x Scratching Posts (sisal-wrapped)

- 8 x Wall Steps/Platforms
- Mounting Hardware (screws, wall anchors, brackets)
- Assembly Instructions (visual step-by-step guide)

Product Size

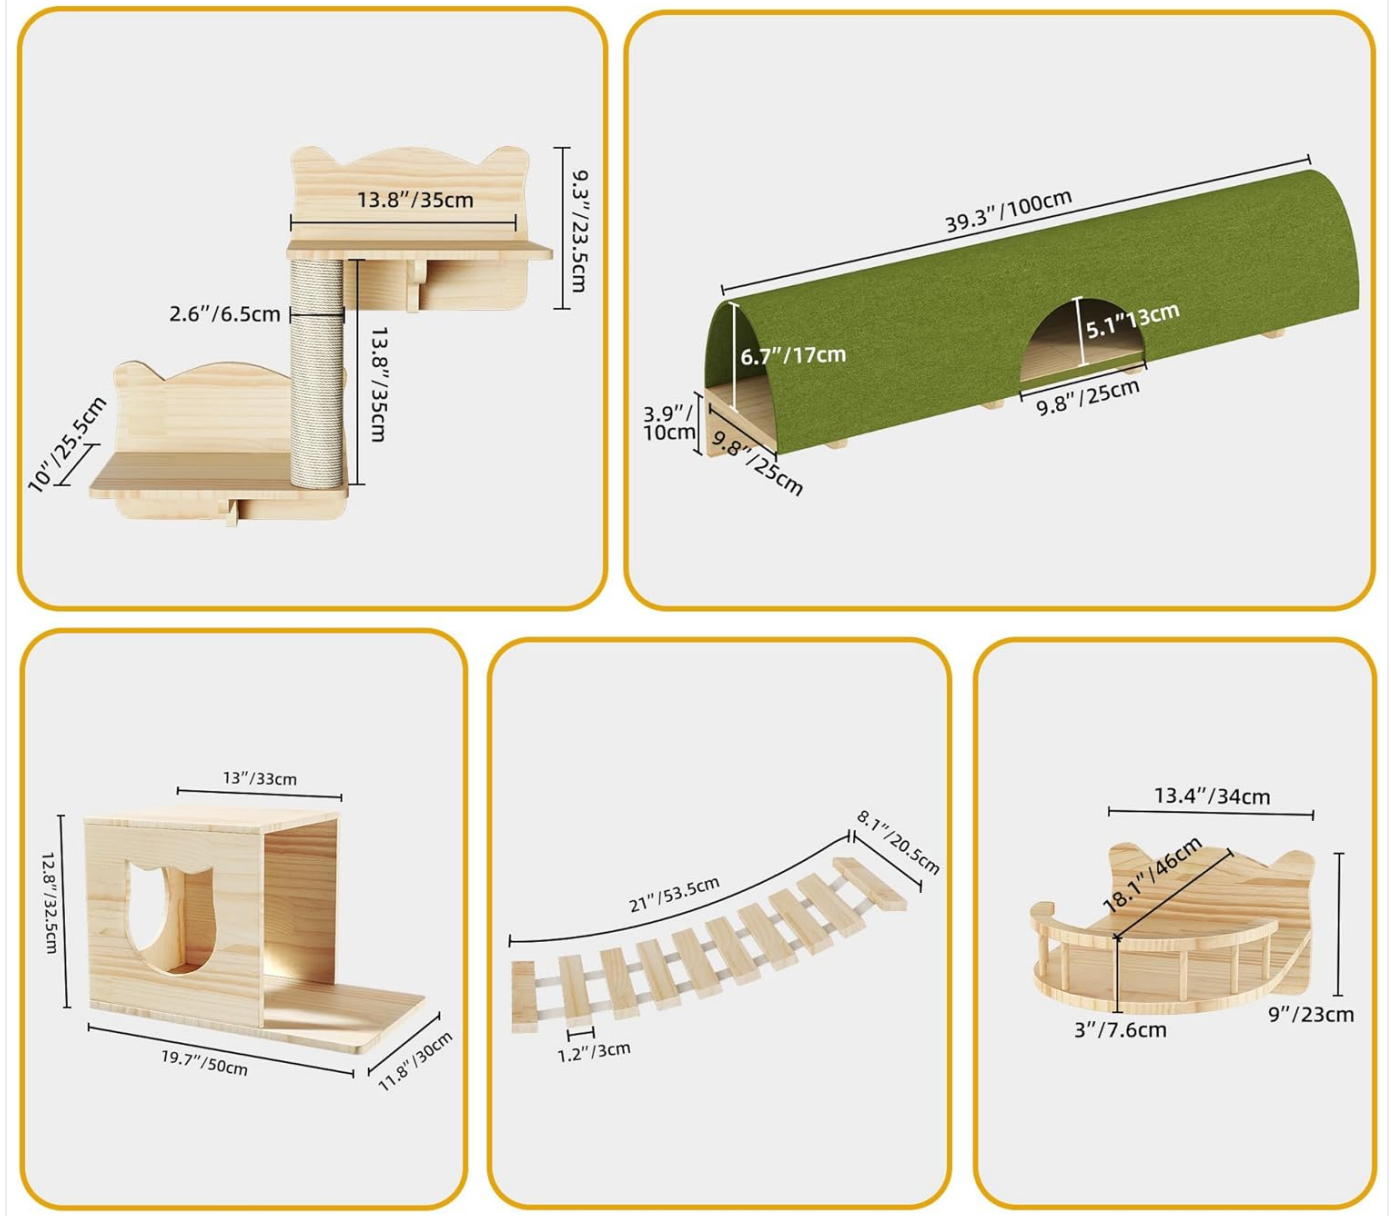

Figure 1: Product Size Diagram. This image illustrates the individual dimensions of the various components included in the Homiflex Cat Wall Shelves set, such as the cat house, tunnel, scratching post, bridge, and elevated perch.

SPECIFICATIONS

Brand	Homiflex
Model Name	Cat Wall Shelves
Model Number	MAHfleUhqnl

Color	Burlywood (Natural Wood)
Mounting Type	Wall Mount
Assembly Required	Yes
Recommended Use	Indoor
Approximate Overall Package Weight	37.5 Pounds (17 kg)
Cat Condo Dimensions (LxWxH)	19.7" x 11.8" x 12.8" (50cm x 30cm x 32.5cm)
Cat Tunnel Dimensions (LxWxH)	39.3" x 9.8" x 6.7" (100cm x 25cm x 17cm)
Bridge Ladder Length	21" (53.5cm)

Note: Individual component dimensions are approximate. Refer to the included visual assembly guide for precise measurements and layout recommendations.

SETUP AND INSTALLATION

The Homiflex Cat Wall Shelves are designed for quick assembly. No special tools are required beyond standard household tools like a drill, level, and screwdriver.

Before You Begin:

- **Identify Wall Type:** Determine if your wall is drywall, plaster, concrete, or wood. This will dictate the type of wall anchors needed.
- **Locate Studs:** For maximum security, mount components directly into wall studs using a stud finder. If studs are not available, use appropriate heavy-duty wall anchors (included for standard drywall).
- **Plan Layout:** Arrange the components on the floor or mark their positions on the wall to visualize the desired climbing path for your cat(s). Consider your cat's agility and size.
- **Gather Tools:** You will need a pencil, measuring tape, level, drill, and screwdriver.

Step-by-Step Assembly:

1. **Unpack and Identify Parts:** Carefully remove all components from the packaging. Use the included visual assembly guide to identify each numbered part and hardware.
2. **Assemble Individual Components:** Follow the visual instructions to assemble the cat condo, tunnel, and scratching posts. These typically involve attaching panels with screws.
3. **Mark Wall Positions:** Hold each assembled component against the wall in your planned layout. Use a pencil to mark the drilling points for the mounting brackets. Use a level to ensure horizontal alignment.
4. **Drill Pilot Holes:** Using a drill bit appropriate for your wall type and anchor size, drill pilot holes at the marked positions.
5. **Install Wall Anchors (if needed):** If not drilling into studs, insert the appropriate wall anchors into the pilot holes.
6. **Mount Brackets:** Attach the mounting brackets to the wall using the provided screws, ensuring they are securely fastened.
7. **Attach Components to Brackets:** Securely attach the assembled cat condo, tunnel, scratching posts, steps, and perches to their respective wall brackets. Ensure all connections are tight and stable.
8. **Connect Bridge Ladders:** Attach the bridge ladders between platforms or components as per your desired layout, ensuring they are taut and secure.

9. **Final Inspection:** Double-check all screws and connections for tightness. Gently test the stability of each component before allowing your cat to use the shelves.

Figure 2: Example Installation. This image displays a fully assembled Homiflex Cat Wall Shelves system in a home environment, showcasing how various components can be arranged to create an engaging vertical space for cats.

OPERATING INSTRUCTIONS (USING THE CAT WALL SHELVES)

The Homiflex Cat Wall Shelves provide a multi-level environment for your cat's natural instincts to climb, explore, and rest.

- **Encourage Exploration:** Initially, you may need to encourage your cat to use the shelves. Place treats or favorite toys on different levels to entice them.
- **Scratching Posts:** The sisal-wrapped posts are designed for scratching. Encourage your cat to use them to maintain claw health and protect your furniture.
- **Elevated Perches and Condo:** Cats naturally seek high vantage points. The perches and enclosed condo offer secure spots for napping, observing their surroundings, and feeling safe.
- **Bridge Ladders and Steps:** These components facilitate movement between different levels, promoting exercise

and agility.

- **Cat Tunnel:** The tunnel provides a hidden space for play, rest, and a sense of security.

Figure 3: Multi-Level Interaction. This image depicts a cat actively using the multi-level design of the shelves, illustrating how cats can jump and navigate between different platforms.

Figure 4: Cat Tunnel Use. This image shows two cats utilizing the 39.3-inch cat tunnel component, demonstrating its function as a secure and engaging space for feline activity.

COMFORTABLE ELEVATED SPOT

Provide Cats with Climbing, Playing, Napping,
and Resting Opportunities

Figure 5: Elevated Resting Spot. This image features a cat relaxing on one of the elevated perches, illustrating the comfort and security provided by these high vantage points.

MAINTENANCE

Regular maintenance will ensure the longevity and safety of your Homiflex Cat Wall Shelves.

- **Cleaning:** Wipe wooden surfaces with a damp cloth. For sisal scratching posts, use a vacuum cleaner to remove loose fur and debris. Avoid harsh chemicals.
- **Inspection:** Periodically check all mounting points, screws, and connections for tightness. Re-tighten any loose fasteners.
- **Wear and Tear:** Inspect sisal rope for significant fraying or damage. While durable, sisal will wear over time with regular scratching.
- **Structural Integrity:** Ensure all wooden components remain stable and free from cracks or splinters.

TROUBLESHOOTING

Common Issues and Solutions:

- **Shelves feel wobbly after installation:**
 - Ensure all mounting screws are fully tightened.
 - Verify that appropriate wall anchors were used for your wall type and that they are correctly installed.
 - If possible, re-mount into a wall stud for increased stability.
- **Cat is not using the shelves:**
 - Place favorite treats, toys, or catnip on different levels to encourage exploration.
 - Ensure the shelves are installed in a quiet, accessible location where your cat feels safe.
 - Consider the height and spacing between components; some cats prefer smaller jumps.
- **Sisal scratching post is heavily worn:**
 - This is normal wear. Replacement sisal rope can often be purchased or re-wrapped. Contact Homiflex support for replacement options.
