JULIAQUA Automatic Aquarium Feeder (Model YA-788) Instruction Manual

This manual provides detailed instructions for the setup, operation, and maintenance of your JULIAQUA Automatic Aquarium Feeder, Model YA-788. Please read carefully before use.

INTRODUCTION

Thank you for choosing the JULIAQUA Automatic Aquarium Feeder. This device is designed to provide convenient and reliable feeding for your fish, turtles, and frogs, ensuring they are fed on schedule even when you are away. It features 4 automatic feeding modes and a manual feeding option.

Model
Y-788

Size
16.5X10.5CM

Feeding Modes
6/12/24/48H

Clamp Thickness
>22MM

Power Mode
AA battery

Feeder Capacity
200ML

Close-up of the control panel with 'Manual' button, 'Setting' button, and Timer LEDs indicating 6, 12, 24, and 48-hour intervals.

SETUP

1. Battery Installation

The feeder requires two AA batteries (not included).

1. Open the battery compartment.
2. Insert two AA batteries, ensuring correct polarity.
3. Close the battery compartment securely.

Note: The product is energy-efficient, and two batteries can last up to six months with daily use.

2. Food Loading

The feeder is suitable for various types of fish food, including flakes, pellets, powders, and strips.

1. Open the hopper opening.
2. Fill the universal feed container with your desired fish food.

3. Close the hopper opening.

Important: Do not turn the feeding case by hand.

3. Installation Methods

The feeder offers two installation options:

1. **Adjustable Clip Base:** Attach the feeder to an aquarium cover with a thickness of 1 to 25 mm using the adjustable clip.
2. **Flat Base:** Place the feeder directly on top of the aquarium using the flat base, utilizing any existing openings in the aquarium lid.

Caution: Always place the feeder above the water tank to prevent water infiltration.

Feed on Schedule Keep Fish Stress-Free

Max fixed thickness: 22mm

OPERATION

1. Setting Automatic Feeding Modes

The feeder provides 4 preset automatic feeding modes: every 6, 12, 24, or 48 hours.

1. Press the **"Setting"** button (right button on the control panel) repeatedly to cycle through the feeding intervals.
2. The corresponding LED light (6, 12, 24, or 48) will illuminate to indicate the selected interval.
3. The feeder will automatically dispense food at the chosen interval.

2. Manual Feeding

To dispense food manually at any time:

1. Press the **"Manual"** button (left button on the control panel).
2. The feeder will perform one rotation and dispense food immediately.

3. Adjusting Feeding Volume

The amount of food dispensed can be adjusted using the slider on the feeder.

1. Locate the slider mechanism on the feeder's food container.
2. Adjust the slider to increase or decrease the opening size, thereby controlling the quantity of food released per rotation.

Note: For smaller aquariums or fewer fish, start with the minimum setting and observe the amount dispensed.

MAINTENANCE

1. Cleaning

To prevent mold growth and ensure proper function, clean the feeder regularly.

1. Remove the food container from the main unit.
2. Empty any remaining food.
3. Clean the container and dispensing mechanism with a soft brush and warm water. Do not use harsh detergents.
4. Ensure all parts are completely dry before reassembling and refilling with food.

2. Battery Replacement

Replace batteries when the feeder's operation becomes inconsistent or the indicator lights dim.

1. Open the battery compartment.
2. Remove old batteries and dispose of them responsibly.
3. Insert new AA batteries, observing polarity.
4. Close the compartment.

3. Storage

If not using the product for an extended period, clean it thoroughly and remove the batteries before storing in a dry place.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Feeder not dispensing food	Batteries are low or incorrectly installed.	Replace batteries or check polarity.
Feeder not dispensing food	Food is clumped or stuck in the dispenser.	Clean the food container and dispensing mechanism. Ensure food is dry.
Feeder not dispensing food	Hopper opening is blocked.	Clear any obstructions from the hopper opening.
Too much/too little food dispensed	Feeding volume slider is incorrectly set.	Adjust the feeding volume slider to the desired amount.
Feeder stops working after a short period	Water infiltration.	Ensure the feeder is placed above the water tank. Clean and dry the unit thoroughly.
Automatic mode not activating	Incorrect setting.	Re-press the "Setting" button to select the desired interval (6/12/24/48 hours).

If problems persist, please contact customer support.
