

MGI Zip Navigator AT

MGI Zip Navigator AT All-Terrain Remote Golf Cart

USER MANUAL

INTRODUCTION

Welcome to the MGI Zip Navigator AT User Manual. This guide provides essential information for the setup, operation, and maintenance of your MGI Zip Navigator AT All-Terrain Remote Golf Cart. Designed for various golf course terrains, from flat to mountainous, this electric golf caddy offers a smooth and quiet ride, allowing you to focus on your game. It features a powerful twin 230-watt motor, a 36-hole lithium battery system, and advanced digital electronics for precise control.

Image: The MGI Zip Navigator AT All-Terrain Remote Golf Cart displayed with its included accessories. These accessories typically include a golf towel, a portable power bank, a USB charging cable, the remote control, a cup holder, and an umbrella holder. The golf cart itself is shown in both its upright, ready-to-use configuration and a folded, compact state for storage or transport.

SETUP

Unfolding and Folding

- **Zip Fold Technology:** The innovative one-piece frame engineered zip fold system makes setup quick and easy. The newly engineered system is 12% lighter and 25% smaller for easy transport and space savings.
- **Inverting Rear Wheels for Storage:** The All-Terrain rear wheels can be inverted on the axle to reduce the size of the Zip Navigator AT when folded. To invert, press the Quick Release Button on the wheel hub, remove the wheel from the axle, invert it so the wheel hub protrudes away from the axle, then press the Quick Release Button and release once the wheel is fitted on the axle.
- **5th Foldable Rear Wheel:** The MGI Zip Navigator AT comes standard with a 5th foldable rear wheel. This wheel must be unfolded into position at all times when the Zip Navigator AT is in use to reduce damage and provide

ultimate stability. Clean this wheel regularly.

- **Quick Release Rear Wheels:** To secure the rear wheels, press the Quick Release Button on the wheel hub. You will hear a "click" when the wheel is properly secured.

Battery and Remote Charging

- **Initial Battery Charging:** Before first use, fully charge the 36-hole Lithium Battery overnight.
 1. Plug the AC lead into a power point; the Green LED illuminates to indicate charger power is on.
 2. Plug the charger output connection into the connector on the front of the battery; the RED LED illuminates to indicate the battery is charging.
 3. When the charging LED indicator turns green, the battery is fully charged and ready for use (up to 36 holes).
- **Connecting the Battery:** Position the battery on the MGI Zip Navigator AT and push down to secure it. Push the handle down to connect the battery to the Zip Navigator. The Zip Navigator will not move when the battery is connected; it will only start when the speed control is switched on.
- **Charging the Battery After Use:** Disconnect the battery by lifting the handle. The battery can be left on or removed from the Zip Navigator AT for charging. Follow the same charging steps as for initial charging.
- **Remote Control Charging:** Fully charge the remote control overnight before first use using the provided USB cord. The top left UNLOCK button will flash while charging. When a full charge is complete the the green light will stay on and stop flashing. The remote control can also be charged via the USB port underneath the Top Handle of the Zip Navigator during play.

OPERATING INSTRUCTIONS

Drive Position & Free Wheel

The MGI Zip Navigator AT allows the rear wheels to be in two positions, determined by where the wheel is locked on the axle in either of the two grooves.

- **Drive Position:** Used during normal operation of the Zip Navigator.
- **Free Wheel Position:** Used to freely push the Zip Navigator if you experience battery or Zip Navigator issues on the course.

Advanced Digital Electronics & Remote Control

The Zip Navigator AT features an advanced digital display and a remote control for easy navigation.

- **Display Settings:** The display shows variable speed control (1-20) and 4 color-coded battery levels (Battery on top left, Remote Control on top right) indicating a full charge.
- **Distance Modes:** Two resettable distances (Distance A & B) are available in Yards or Meters. A total odometer in Miles or Kilometers is also displayed.
- **USB Charging Port:** Located underneath the top handle, this port allows you to charge your devices during play or when the battery is on.
- **Remote Control Operation:** The remote control allows you to navigate the golf cart. Use the directional arrows to move forward, backward, left, and right. The red button is used to stop the cart. The UNLOCK and LOCK buttons control the remote's functionality.

MAINTENANCE

- **Cleaning:** Keep your Zip Navigator AT clean by using an air compressor (like a shoe cleaning station) to remove grass, moisture, or debris. Use a cloth with warm water and mild detergent for general cleaning. **Do not hose down**

your Zip Navigator AT under any circumstances, as it contains electronic components.

- **Battery Base:** Clean the battery base when the battery is removed from the Zip Navigator AT.
- **Rear Wheel Axles:** The rear wheel axles need to be lubricated regularly. Apply a small amount of petroleum jelly or light grease to the rear wheel axles.

TROUBLESHOOTING

If you encounter any issues with your MGI Zip Navigator AT, please refer to the following general guidelines:

- **Power Issues:** Ensure the battery is fully charged and properly connected. Check that the speed control is switched on.
- **Remote Control Unresponsive:** Verify the remote control is charged. Ensure it is unlocked and within range of the golf cart.
- **Movement Issues:** Check that the wheels are properly secured and in the correct drive position. Ensure no debris is obstructing the wheels or motor.
- For persistent issues or problems not covered here, please contact MGI customer support for assistance.

SPECIFICATIONS

Feature	Detail
Brand	MGI
Motor	Twin 230 Watt Motor
Battery Type	36 Hole Lithium Click & Go Lithium Battery System
Folded Dimensions (Inverted Rear Wheels)	27.55 X 18.5 x 16.5 Inches
