• Stylus Care:

- The stylus (needle) is delicate. Handle it with extreme care.
- Clean the stylus periodically using a soft brush, brushing gently from back to front.
- A worn or damaged stylus can damage your records and degrade sound quality. Replace the stylus if it appears bent, chipped, or if sound quality deteriorates significantly.

• Record Care:

- Always handle records by their edges or label. Avoid touching the grooves.
- Store records vertically in their sleeves in a cool, dry place.
- Clean records regularly with a dedicated record cleaning brush or solution to remove dust and static.

7. TROUBLESHOOTING

If you encounter issues, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
No power	AC adapter not connected or power outlet not active.	Ensure AC adapter is securely connected and the power outlet is functional. Check the Power/Volume knob is turned on.

Problem	Possible Cause	Solution
No sound from speakers	Volume too low, wrong function mode, or external speakers connected.	Increase volume. Ensure Function Selector is set to "Phono" for records or "Bluetooth" for streaming. If using RCA line-out, sound will come from external speakers, not built-in ones.
Distorted or poor sound quality	Dirty stylus, dirty record, incorrect speed, or damaged stylus.	Clean stylus and record. Verify correct playback speed. Consider replacing the stylus if damage is suspected.
Record skipping	Dirty or scratched record, turntable not level, or damaged stylus.	Clean record. Ensure turntable is on a level surface. Inspect stylus for damage.
Bluetooth pairing failure	Turntable not in pairing mode, device too far, or device already paired with another unit.	Ensure Function Selector is set to "Bluetooth" and indicator is flashing. Move device closer. Disconnect from other Bluetooth devices.
