6. TROUBLESHOOTING

If you encounter any issues with your SEDETA Electric Standing Desk, please refer to the following common troubleshooting steps:

- **Desk Not Moving:** Check if the power cord is securely plugged into both the desk and the wall outlet. Ensure the safety switch on the charging port is in the 'ON' position. Try performing a reset using the RST button on the control panel.
- **Uneven Movement:** Ensure the desk is not overloaded and weight is evenly distributed. Perform a reset to recalibrate the lift mechanism.
- **Noise During Operation:** A low noise level (below 45 dB) is normal. If you experience excessive or unusual noise, ensure all assembly bolts are tightened and nothing is obstructing the lift columns.
- **Charging Port Not Working:** Verify the charging station's power switch is on. Check if the main power cord is connected. Test with different devices and cables.

If the problem persists after attempting these steps, please contact customer support.
