FIXR PG01

FIXR Dog Grooming Vacuum PG01 Instruction Manual

MODEL: PG01

Introduction

The FIXR Dog Grooming Vacuum PG01 is an all-in-one pet grooming kit designed to simplify pet care at home. This device combines powerful vacuum suction with various grooming tools, including a hair clipper and shedding brush, to efficiently capture pet hair and dander during grooming sessions. Its low-noise operation ensures a comfortable experience for your pet, while the integrated vacuum system minimizes mess and simplifies cleanup.

Safety Information

- This product is designed for use with 110-120V voltage only. For regions with 220-230V, a transformer is required.
- Do not inhale damp substances with the vacuum.
- Keep the device and accessories out of reach of children and pets when not in use.
- Ensure all attachments are securely connected before operation.
- Regularly clean filters to maintain optimal performance and prevent overheating.

Package Contents

Verify that all items listed below are included in your package:

- Pet Grooming Vacuum ×1
- Grooming Brush ×1
- Electric Clipper ×1
- Clipper Limit Combs (3mm, 9mm, 16mm, 24mm) ×4
- Cleaning Brush ×1

Setup

1. **Connect the Hose:** Insert one end of the premium hose into the vacuum unit's suction port until it clicks securely into place.
2. **Attach the Desired Tool:** Select the appropriate grooming tool (e.g., grooming brush, electric clipper, cleaning brush, or crevice tool) and attach it to the other end of the hose. Ensure it is firmly connected.
3. **Power Connection:** Plug the power cord into a standard 110-120V electrical outlet.
4. **Power On:** Press the power button on the vacuum unit to turn it on.
5. **Select Suction Level:** Use the suction level control button to choose one of the three available suction settings (Silent, Standard, Strong) based on your pet's comfort and grooming needs.

Operating Instructions

Always ensure your pet is calm and comfortable before beginning any grooming session. Start with the lowest suction setting and gradually increase if needed.

1. Grooming Brush

- Attach the grooming brush to the hose.
- Gently brush your pet's coat in the direction of hair growth. The vacuum will simultaneously collect loose fur, reducing shedding and preventing tangles.
- The brush features safe metal pins designed to soothe and fluff the fur.

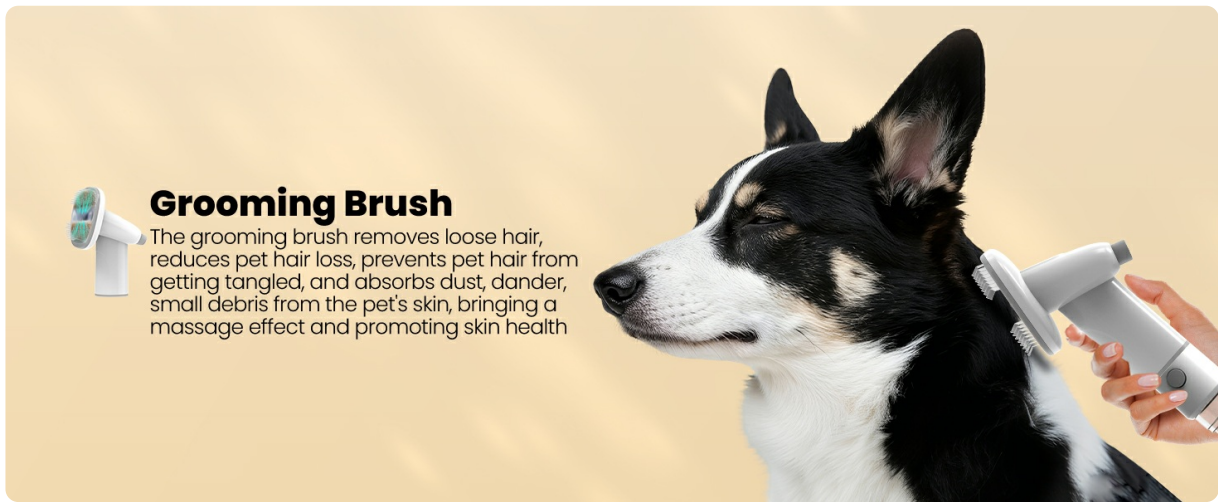

Image: A person using the grooming brush attachment on a dog, demonstrating how loose hair is collected by the vacuum.

2. Electric Clippers

- Attach the electric clipper to the hose.
- Select one of the four clipper limit combs (3mm, 9mm, 16mm, 24mm) and attach it to the clipper head to achieve the desired hair length.
- Turn on the vacuum and the clipper. Gently trim your pet's hair. The vacuum will immediately suck in the trimmed hair, ensuring a mess-free experience.

4 Guide Combs Sizes

Image: The electric clippers with four different guide combs (3mm, 9mm, 16mm, 24mm) for precise trimming.

3. Cleaning Brush

- Attach the cleaning brush to the hose.
- Use this brush to remove pet hair from clothing, furniture, carpets, and other surfaces after grooming.

4. Crevice Tool

- Attach the crevice tool to the hose.
- This tool is ideal for reaching pet hair and dust in tight spaces, such as sofa cracks, corners, and under furniture.

Maintenance

1. Emptying the Dustbin

- The vacuum features a 1.8L large-capacity dustbin.
- To empty, simply pull the dustbin out from the main unit.
- Open the lid and pour out the collected fur and debris.

2. Cleaning the HEPA Filter

- Remove the dustbin from the vacuum unit.
- Take out the HEPA filter and sponge filter from the dustbin.
- Rinse both filters under tap water until clean.
- Allow the filters to air-dry completely before reinstalling them. Ensure they are fully dry to prevent damage to the vacuum.
- The filter must be installed before operating the vacuum.

Troubleshooting

- **No Power:** Ensure the power cord is securely plugged into a working electrical outlet. Check if the power button is pressed.
- **Weak Suction:** Verify that the dustbin is not full and the filters are clean and properly installed. Check for any blockages in the hose or attachments.
- **Unusual Noise:** Turn off the device immediately. Check for any foreign objects in the hose, attachments, or inside the vacuum unit. Ensure all parts are correctly assembled.
- **Attachments Not Working:** Ensure the attachment is correctly and firmly connected to the hose.

Specifications

Feature	Detail
