

## Outsunny 84H-225V00CG

# Outsunny 7' x 4' Outdoor Storage Shed Instruction Manual

Model: 84H-225V00CG | Brand: Outsunny

## INTRODUCTION

This manual provides detailed instructions for the assembly, operation, and maintenance of your Outsunny 7' x 4' Outdoor Storage Shed. Designed for efficient outdoor storage, this shed features a galvanized steel frame, double sliding doors, and integrated vents. Please read all instructions carefully before beginning assembly and retain this manual for future reference.

The shed is designed with horizontal wall panels for streamlined assembly, enhanced stability with seven support columns, and includes a foundation kit for a clean and sealed interior. The double sliding doors offer smooth access, and a padlock is included for security. Its compact 7' x 4' footprint provides ample storage without occupying excessive yard space.

## SETUP AND ASSEMBLY

**Important Safety Note:** Always wear gloves during assembly. Do not assemble in windy weather. For alignment of holes, do not tighten screws until fully assembled.

**Tools Required:** An electric drill, a ladder, and other tools mentioned in the manual are recommended.

Image: Initial assembly steps highlighting safety precautions and tool requirements.

1. **Pre-Assembly Checklist:** Before starting, ensure all parts are complete and undamaged. Refer to the parts list provided in your package.
2. **Base Frame Assembly:** Connect the base frame components (e.g., K46-1L, K68-1R, K46-2, T-F) using the provided screws (F1). Ensure diagonal distances are consistent for a square base.

3. **Side Panel Installation:** Mount the side panels (e.g., W5-C) onto the base frame using screws (F1). Assemble columns first, then wall panels from bottom to top.
4. **Top Frame Assembly:** Connect the top frame fittings (e.g., K46-3) and link them with the side panels using screws (F1).
5. **Rear Panel Installation:** Install the rear panels (e.g., W5) onto the K46-4 frame, ensuring flat-edged sheets are placed on top of fluted edges where they overlap. Secure with screws (F1, F2).
6. **Front Panel Installation:** Install the front panels (e.g., W3) onto the K46-4 frame, following the same overlap principle as the rear panels. Secure with screws (F1, F2).
7. **Roof Panel Installation:** Install the shed top frame (V2) and then the roof panels (e.g., K46-7L, K46-7M,

K46-7R) in the specified order. The first piece of tin at the top needs to extend beyond the wall by approximately 2.4 inches when installed. Secure with screws (F1, V2). Install K46-8 and K46-9 around the roof, and K46-10 at the highest part. Install corner pieces (GC) on the four corners of the roof.

8. **Door Assembly:** Combine the door panels (e.g., W5-K, W2-HL) to create the left and right doors. Install the latch (DC), hinges (DH), and door lock (GL) in their designated positions using screws (F1, F3).
9. **Door Installation:** Mount the assembled doors to the door frame using screws (F3).
10. **Final Touches:** Install protective caps (SL) for any exposed screws to ensure a neat finish and prevent injury.

## OPERATING INSTRUCTIONS

Your Outsunny storage shed is designed for ease of use and security.

- **Sliding Doors:** The shed features double sliding doors for smooth and wide access. Gently slide the doors

along their tracks to open and close.

- **Lockable Doors:** Use the included padlock to secure the doors, keeping your tools and equipment safe.
- **Ventilation:** The integrated vents promote air circulation, helping to prevent moisture buildup and maintain a fresh interior environment.
- **Ramp:** A small ramp is integrated for easy movement of wheeled equipment such as lawnmowers or wheelbarrows.

## MAINTENANCE

Regular maintenance will ensure the longevity and optimal performance of your storage shed.

- **Cleaning:** Clean the exterior and interior of the shed periodically with mild soap and water. Avoid abrasive cleaners that could damage the galvanized steel finish.
- **Fasteners:** Periodically check all screws and fasteners to ensure they are tight. Re-tighten as necessary to

maintain structural integrity.

- **Door Tracks:** Keep the sliding door tracks clear of debris to ensure smooth operation. Lubricate if needed.
- **Snow Load:** The shed is designed with a snow-bearing capacity of 30 kg/m<sup>3</sup>. In areas with heavy snowfall, it is advisable to clear excessive snow from the roof to prevent potential damage.

Image: Shed's snow-bearing capacity and structural support.

- **Ventilation:** Ensure the vents remain unobstructed to allow for proper air circulation and prevent condensation.

## TROUBLESHOOTING

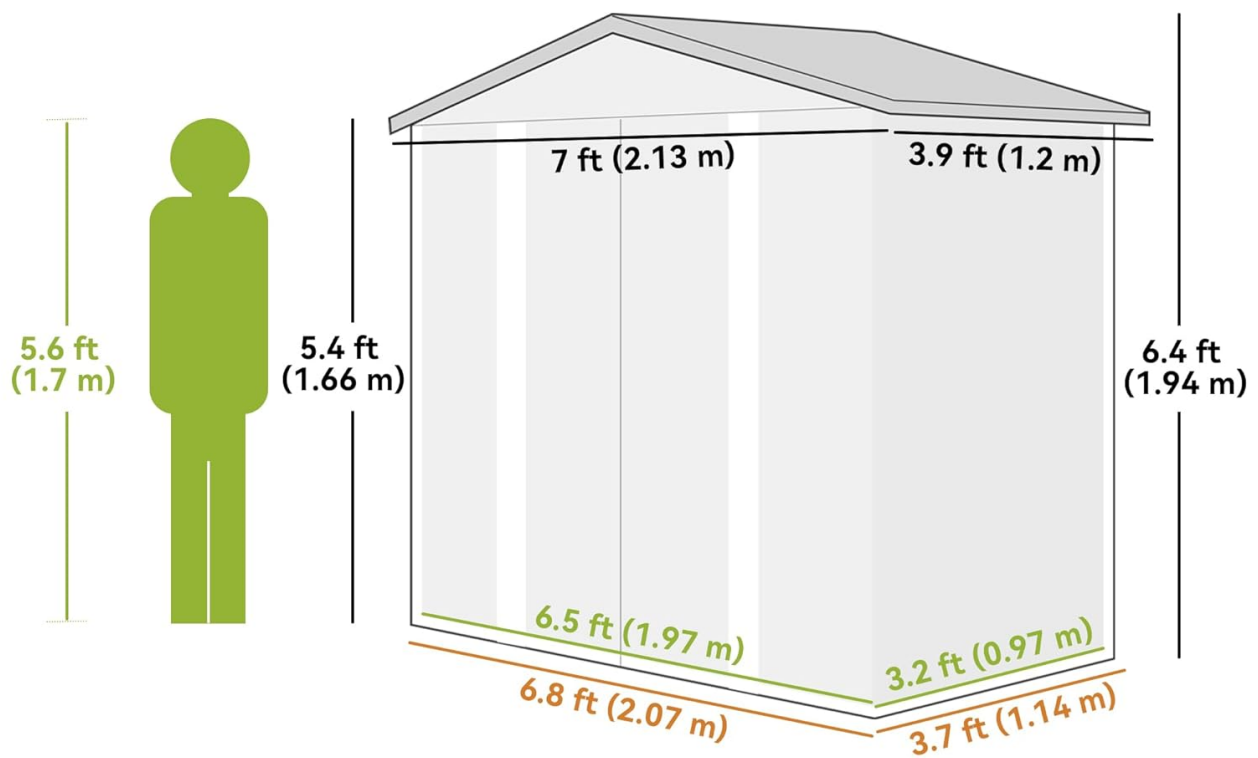

If you encounter any issues with your shed, refer to the following common problems and solutions:

- **Doors are Sticking:** Check the door tracks for any debris or obstructions. Clean the tracks and apply a silicone-based lubricant if necessary. Ensure the shed is level and the frame is square.
- **Water Leakage:** Verify that all roof panels are correctly overlapped and all screws are tightened. Ensure the foundation is properly sealed and any gaps are filled.

- **Instability:** Confirm that all frame components and panels are securely fastened. Ensure the shed is placed on a firm, level surface and anchored if required by local building codes.
- **Missing Parts:** If any parts are missing or damaged upon arrival, please contact customer support immediately.

## SPECIFICATIONS

| Feature                | Detail  |
|------------------------|---|
| Model Number           | 84H-225V00CG  |
| Brand                  | Outsunny  |
| Product Dimensions     | 120 x 213 x 194 cm (47.2 x 83.9 x 76.4 inches)                        |
| Item Weight            | 54.88 kg (121 Pounds)   |
| Material               | Galvanised Steel  |
| Color                  | Dark Grey   |
| Door Style             | Sliding Doors   |
| Water Resistance Level | Waterproof  |
| Assembly Required      | Yes   |
| Special Features       | Foundation Kit, 7 Support Columns, 2 Lockable Doors, Vents, Apex Roof |

#### Note:

Before purchasing this product, it is recommended to measure the foundation size first.
