4. SETUP

Before first use, ensure the device is fully charged. To attach a nozzle:

1. Align the desired nozzle with the air outlet.
2. Rotate the nozzle clockwise until it is securely mounted.
3. To remove, rotate counter-clockwise and pull off.

5. OPERATING INSTRUCTIONS

The GOOLOO F3 features a simple one-button operation for power and speed control.

1. **Power On/Off:** Press and hold the power button for 2 seconds to turn the device on or off.
2. **Adjust Speed:** Once powered on, short press the power button to cycle through the three speed settings (Gear 1, Gear 2, Gear 3). The LED indicators will show the current speed.
3. **Charging:** Connect the included Type-C cable to the charging port on the device and to a compatible USB power adapter. The LED indicators will show charging status. Do not use the device while charging.

Usage Tips:

- Select the appropriate nozzle for the cleaning task. The short nozzle is ideal for general dusting, while the flat and long nozzles are better for reaching tight spaces or concentrating airflow.
- For delicate electronics, start with Gear 1 to avoid potential damage. Increase speed as needed for stubborn dust.
- Maintain a safe distance from the object being cleaned to prevent accidental contact.

6. MAINTENANCE

To ensure optimal performance and longevity of your GOOLOO F3 Electric Air Duster, follow these maintenance guidelines:

- **Cleaning the Device:** Wipe the exterior of the duster with a soft, dry cloth. Do not use harsh chemicals or abrasive cleaners.
- **Nozzle Care:** Clean nozzles periodically to prevent blockages. If dust accumulates inside, gently

blow air through them or wipe with a cloth.

- **Storage:** Store the device in a cool, dry place away from direct sunlight and extreme temperatures. Ensure it is turned off before storing.
- **Battery Care:** For best battery life, avoid fully discharging the battery frequently. Charge the device when the battery indicator is low. If storing for an extended period, charge it to about 50% every 3-6 months.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Device does not turn on.	Battery is depleted.	Charge the device using the provided Type-C cable.
Weak airflow.	Low battery or incorrect speed setting.	Charge the device. Ensure the device is set to a higher speed (Gear 2 or 3).
Device stops unexpectedly.	Overheat protection activated or 3-minute idle auto-off.	Allow the device to cool down if it feels warm. Turn the device off and on again.
Nozzle is loose.	Nozzle not properly attached.	Re-align and rotate the nozzle clockwise until it is secure.
