3.2. Attaching the Tag

Use the provided durable steel loop to securely attach the tag to your luggage, backpack, or other items. The loop features a twist-lock mechanism for secure fastening.

1. Insert your personal information card into the privacy flap.
2. Thread the metal loop through the eyelet on the tag.
3. Twist the ends of the metal loop together to secure it.
4. Attach the tag to your desired item.
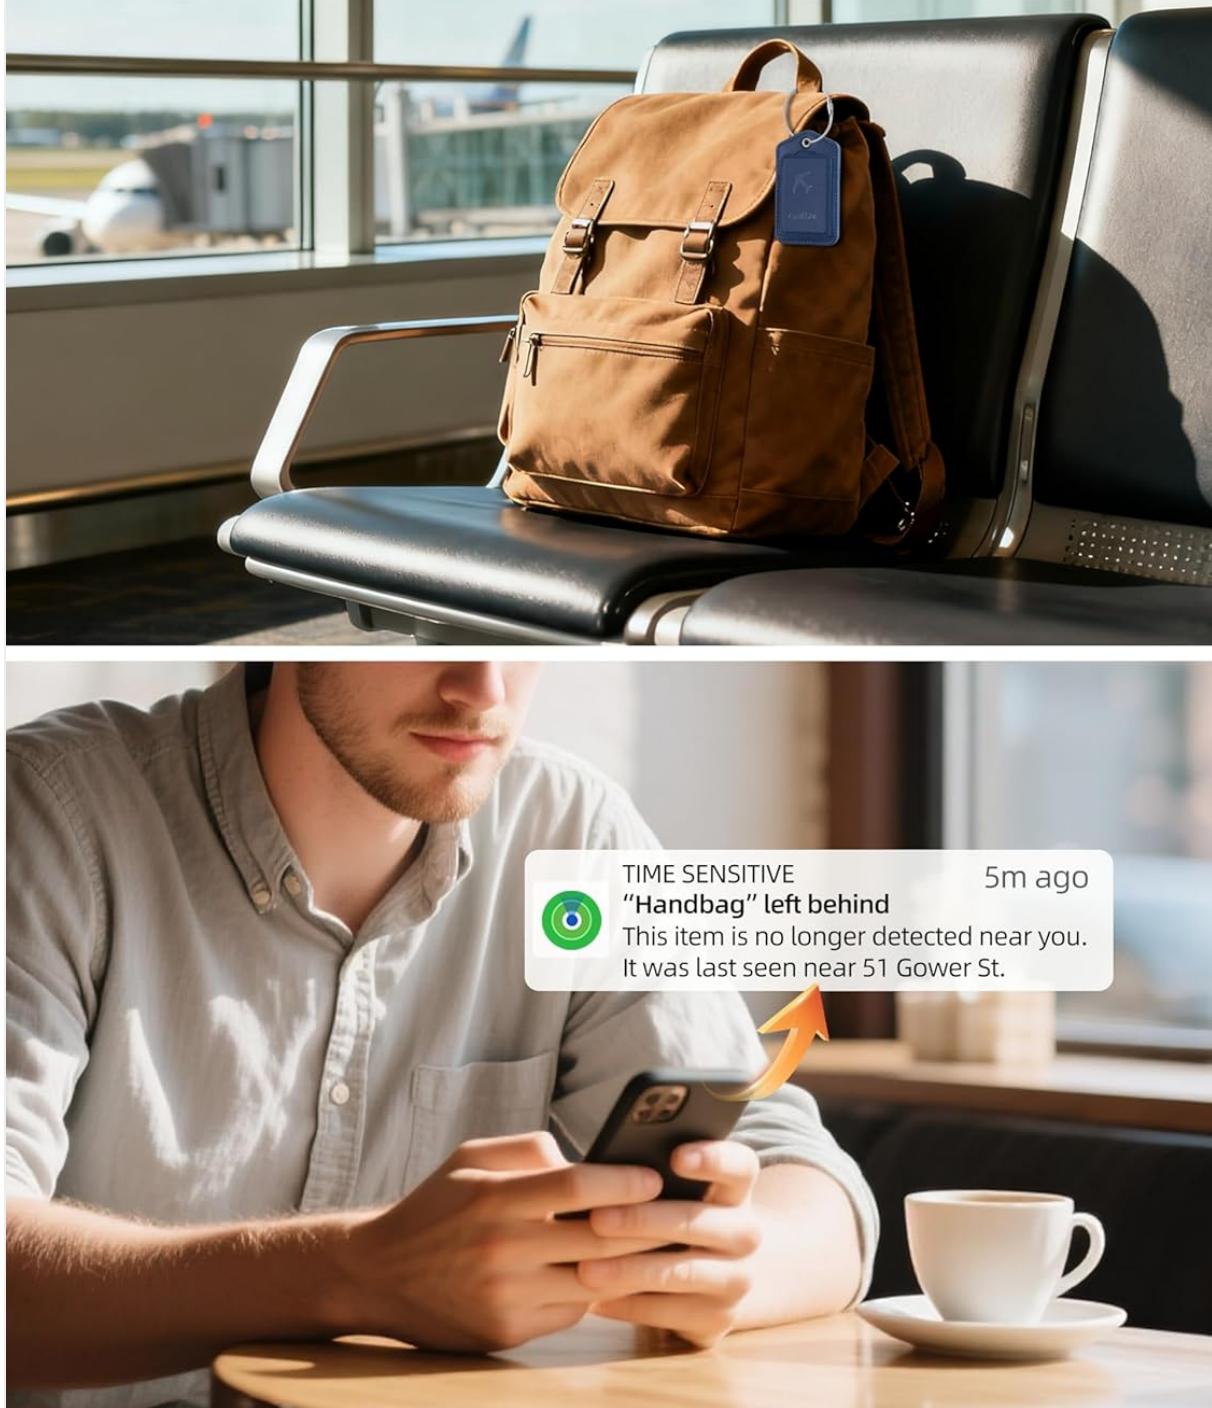

Image 3.2: Step-by-step visual guide for attaching the metal loop to the luggage tag and securing it to luggage.

3.3. Pairing with Apple Find My

The ExtreLife Luggage Tag integrates with the Apple Find My network.**Note: Android devices are not supported.**

1. Ensure your iPhone or iPad has Two-Factor Authentication enabled in Settings.
2. Turn on the "Find My" app and Bluetooth on your iOS device.
3. Press the power button on the luggage tag once to turn it on.
4. Open the Find My app on your iOS device, navigate to "Items," then "Add New Item," and select

"Other Supported Items." Follow the on-screen prompts to connect.

5. Name your item (e.g., "ExtreLife's Luggage") and choose an emoji to represent it.

4. OPERATING INSTRUCTIONS

4.1. Tracking Location

Once paired, you can view the real-time location of your luggage tag on the map within the Apple Find My app. This allows you to pinpoint its exact whereabouts, whether it's across town or at a busy airport.

Image 4.1: An iPhone and Apple Watch showing the luggage tag's location on the Find My map, illustrating its tracking capability.

4.2. Playing a Sound

If your luggage is nearby but out of sight, use the "Play Sound" feature in the Find My app to emit an audible alert from the tag. This helps you quickly locate it, for example, on a crowded baggage carousel. The Bluetooth range for this feature is approximately 160ft/50m.

4.3. Separation Alerts

Receive instant notifications on your iOS device if you accidentally leave your luggage behind. This feature helps prevent loss by alerting you when the tag separates from your device's proximity.

Image 4.3: An iPhone displaying a "Left-Behind Alert" notification, indicating the luggage tag has been separated from the user.

4.4. Lost Mode and Sharing

In the event your luggage is lost, you can enable Lost Mode in the Find My app to display your contact information to anyone who finds it. You can also securely share the tag's location with trusted family members or travel companions.

Image 4.4: A map interface showing the shared location of a tracked item between multiple users.

4.5. Privacy Protection

The tag features a magnetic privacy cover that conceals your personal information card. This protects your details from unauthorized viewing while still allowing the tag to be identified if necessary.

Wireless Rechargeable Battery
## Up to 6 months with a single charge

5. MAINTENANCE

5.1. Battery Care

To ensure continuous tracking, periodically check the battery level of your luggage tag via the Find My app. Recharge the tag wirelessly when the battery is low. The tag is designed for long battery life, lasting up to 6 months on a single charge.

5.2. Cleaning

Wipe the PU leather surface with a soft, damp cloth. Avoid using harsh chemicals or abrasive materials that could damage the finish.

6. TROUBLESHOOTING

- **Tag Not Pairing:** Ensure the tag is powered on (press the button once). Verify that Bluetooth and the Find My app are enabled on your iOS device. Check that Two-Factor Authentication is active in your Apple ID settings.
- **Inaccurate Location or No Updates:** Confirm the tag's battery is charged. Ensure your iOS device has an active internet connection (Wi-Fi or cellular data). The accuracy of location tracking relies on the Apple Find My network, which uses nearby Apple devices to relay location data.
- **Sound Not Playing:** Make sure the tag is within Bluetooth range of your iOS device (approx. 160ft/50m). Check your device's volume settings.
- **Android Device Compatibility:** This product is designed exclusively for the Apple Find My network and is not compatible with Android devices.
