ORICO AP3-2A2U1C-US

ORICO Pocket Power Strip AP3 User Manual

Model: AP3-2A2U1C-US

1. INTRODUCTION

Thank you for choosing the ORICO Pocket Power Strip AP3. This compact and versatile power strip is designed to provide convenient power access for your electronic devices, especially during travel. It features multiple outlets and USB ports in a portable design.

2. SAFETY INFORMATION

Please read and understand all safety instructions before using this product. Failure to follow these instructions may result in electric shock, fire, or damage to the product.

- This power strip is designed for use with 125V electrical systems. If your device requires a different voltage (e.g., 220V), a suitable transformer and adapter must be used.
- Do not exceed the maximum power rating of 1250W (10A, 125V).
- This product is designed without surge protection, making it suitable for use on cruise ships where surge protectors are often prohibited.
- Keep out of reach of children.
- Do not disassemble, modify, or attempt to repair the device.
- Avoid exposure to water or high humidity.
- Ensure the plug is fully inserted into the wall outlet.
- Unplug the power strip when not in use for extended periods.

3. PRODUCT FEATURES & OVERVIEW

The ORICO Pocket Power Strip AP3 offers a 5-in-1 charging solution with a compact, travel-friendly design.

Wrapped Around Pocket Power Strip

Wrap-around Design

Pocket Size

30% Smaller

Easy to Carry-on

Figure 3.1: The ORICO Pocket Power Strip AP3 features a unique wrap-around cord design for compact storage.

3.1 Key Features:

- **5-in-1 Power Solution:** Includes 2 AC outlets, 2 USB-A ports, and 1 USB-C port.

- **Compact & Portable:** Smaller than a mobile phone, with a wrap-around cord design for easy packing. Dimensions: 4.13 x 1.77 x 2.55 inches; Weight: 8.11 oz.

- **45° Flat Plug:** The angled flat plug design prevents blocking adjacent outlets and fits easily behind furniture.

- **Cruise Approved:** Designed without surge protection, making it compliant with most cruise line regulations.

- **Comprehensive Protection:** Built-in safeguards against short circuit, over-heat, over-current, and over-voltage. Constructed with a fire-resistant PC shell.

Small Extension Cord for Travel

Figure 3.4: The 45-degree flat plug design ensures it doesn't obstruct other outlets.

Cruise Essentials

No Surge Protection

FCC Certification

Cruise Approved

Figure 3.5: This power strip is cruise approved due to its non-surge protection design.

Figure 3.6: Versatile for use in travel, dorms, hotels, and office environments.

4. SETUP

1. **Unwrap the Cord:** Gently uncoil the integrated 3.7 ft power cord from around the power strip body. The cord is secured by a flexible strap.

2. **Plug into Wall Outlet:** Insert the flat plug into a standard 125V AC wall outlet. The 45-degree angle of the plug allows for easy access in tight spaces.

3. **Ready for Use:** The power strip is now ready to power and charge your devices.

5. OPERATING INSTRUCTIONS

The ORICO Pocket Power Strip AP3 allows you to charge up to five devices simultaneously.

- **Using AC Outlets:** Plug your devices (e.g., laptop chargers, desk lamps) into the two standard AC outlets.
- **Using USB-A Ports:** Connect your USB-A compatible devices (e.g., smartphones, power banks, smartwatches) to the two USB-A ports.
- **Using USB-C Port:** Connect your USB-C compatible devices (e.g., tablets, newer smartphones, laptops) to the single USB-C port.

Important Note: Always ensure that the total power consumption of all connected devices does not exceed 1250W.

6. MAINTENANCE

- **Cleaning:** Disconnect the power strip from the wall outlet before cleaning. Use a dry, soft cloth to wipe the surface. Do not use liquid cleaners or abrasive materials.
- **Storage:** When not in use, coil the power cord neatly around the power strip and secure it with the integrated strap. Store in a cool, dry place away from direct sunlight and extreme temperatures.
- **Inspection:** Periodically inspect the power strip and cord for any signs of damage, such as frayed wires or cracked casing. Discontinue use if any damage is found.

7. TROUBLESHOOTING

- **No Power to Devices:**
  - Ensure the power strip is securely plugged into a functioning wall outlet.
  - Check if the total power consumption of connected devices exceeds the 1250W limit. Unplug some devices if necessary.
  - Test the wall outlet with another device to confirm it has power.

- **Device Not Charging via USB:**
  - Ensure the USB cable is properly connected to both the power strip and the device.
  - Try a different USB port or cable to rule out a faulty connection.
  - Verify that your device is compatible with the USB-A or USB-C port.
