

## SHA CERLIN KKUU003

# SHA CERLIN King Size Lift Up Storage Bed Frame Instruction Manual

Model: KKUU003

## 1. INTRODUCTION

---

Thank you for choosing the SHA CERLIN King Size Lift Up Storage Bed Frame. This bed frame is designed to provide both comfort and practical storage solutions for your bedroom. Featuring a velvet upholstered, adjustable headboard and a hydraulic lift mechanism for under-bed storage, this frame combines modern elegance with functionality. This manual provides essential information for assembly, operation, maintenance, and safety to ensure optimal use of your new bed frame.

## 2. SAFETY INFORMATION

---

**Please read all safety warnings before assembly and use.**

- **Weight Capacity:** Do not exceed the maximum weight recommendation of 800 pounds for the bed frame.
- **Hydraulic Mechanism:** Exercise caution when operating the lift-up mechanism. Keep hands and fingers clear of moving parts to avoid injury.
- **Sharp Edges:** Be cautious of any potential sharp edges during assembly and when accessing the storage area.
- **Assembly:** Ensure all components are securely fastened according to the assembly instructions. Do not use power tools for tightening screws as this may damage the frame.
- **Children and Pets:** Keep children and pets away from the bed frame during assembly and when operating the lift mechanism.
- **Mattress Compatibility:** This bed frame is designed for a King size mattress. A box spring is not required.

## 3. PRODUCT FEATURES

---

- **Underneath Storage:** A gas lift design creates a large storage area under the bed, ideal for keeping suitcases, storage bags, and off-season belongings neatly organized, contributing to a tidy and clean room.
- **Adjustable Headboard:** The velvet vertical channel tufted headboard offers two height options, 42.5 and 46.5 inches, designed to accommodate mattresses of varying thicknesses and personal preference.
- **Easy Use Design:** The hydraulic lifting mechanism is built with sturdy metal and wood support for durability, allowing for effortless lifting of the frame by hand for quick access to under-bed storage.
- **User-Considered Structure:** A tightly wrapped frame holds the mattress and bedding in place, providing a neat appearance. The noise-free construction ensures a peaceful, undisturbed sleep every night.
- **Enclosed Underbed:** The enclosed design helps keep dust out and reduces cleaning time. It also prevents items from slipping under the bed, which is particularly helpful in homes with pets or frequent activity.

## 4. SETUP AND ASSEMBLY

The SHA CERLIN King Size Lift Up Storage Bed Frame is designed for easy installation. Please follow the detailed instructions provided in the separate assembly guide included with your product packaging. Ensure all parts are present before beginning assembly.

Lifting Mechanism

Easy Assembly Slats

Sturdy Metal Structure

**Figure 4.1:** Components of the bed frame, highlighting the lifting mechanism, easy assembly slats, and sturdy metal structure.

### Key Assembly Points:

1. **Unpack Components:** Carefully unpack all boxes and identify each part against the provided parts list.
2. **Frame Assembly:** Assemble the main bed frame structure, ensuring all bolts and connectors are tightened securely.
3. **Slat Installation:** The durable wooden slats easily snap into place without the need for additional tools or hardware. Ensure they are evenly spaced and firmly seated.
4. **Hydraulic Lift Bars:** Attach the hydraulic lift bars as instructed, ensuring they are correctly oriented for smooth operation.
5. **Headboard Attachment:** Secure the adjustable headboard to the frame. You can choose between two height settings (42.5 or 46.5 inches) to best suit your mattress and preference.
6. **Mattress Placement:** Once the frame is fully assembled and stable, place your King size mattress directly onto the slats. A box spring is not needed.

## 5. OPERATING INSTRUCTIONS

---

This bed frame offers convenient features for enhanced usability.

### 5.1. Using the Lift-Up Storage

# LARGE UNDERNEATH STORAGE SPACE

Suitcases

Storage Bags

Out-Season  
Belongings

**Figure 5.1:** The spacious under-bed storage area, accessible via the hydraulic lift mechanism.

To access the under-bed storage:

1. Remove any pillows or loose items from the bed surface.
2. Grasp the frame firmly at the foot end or sides.
3. Gently lift the mattress and frame upwards. The hydraulic mechanism will assist in lifting and holding the bed in an open position.
4. Place or retrieve items from the spacious storage area.
5. To close, gently push the frame downwards. The hydraulic system will smoothly lower the bed back into position. Ensure no objects or body parts are in the way during closing.

## 5.2. Adjusting the Headboard Height

## TWO-LEVEL HEIGHT-ADJUSTABLE HEADBOARD 42.5-46.5 inches

Adjust the headboard height to your liking.

46.5"

42.5"

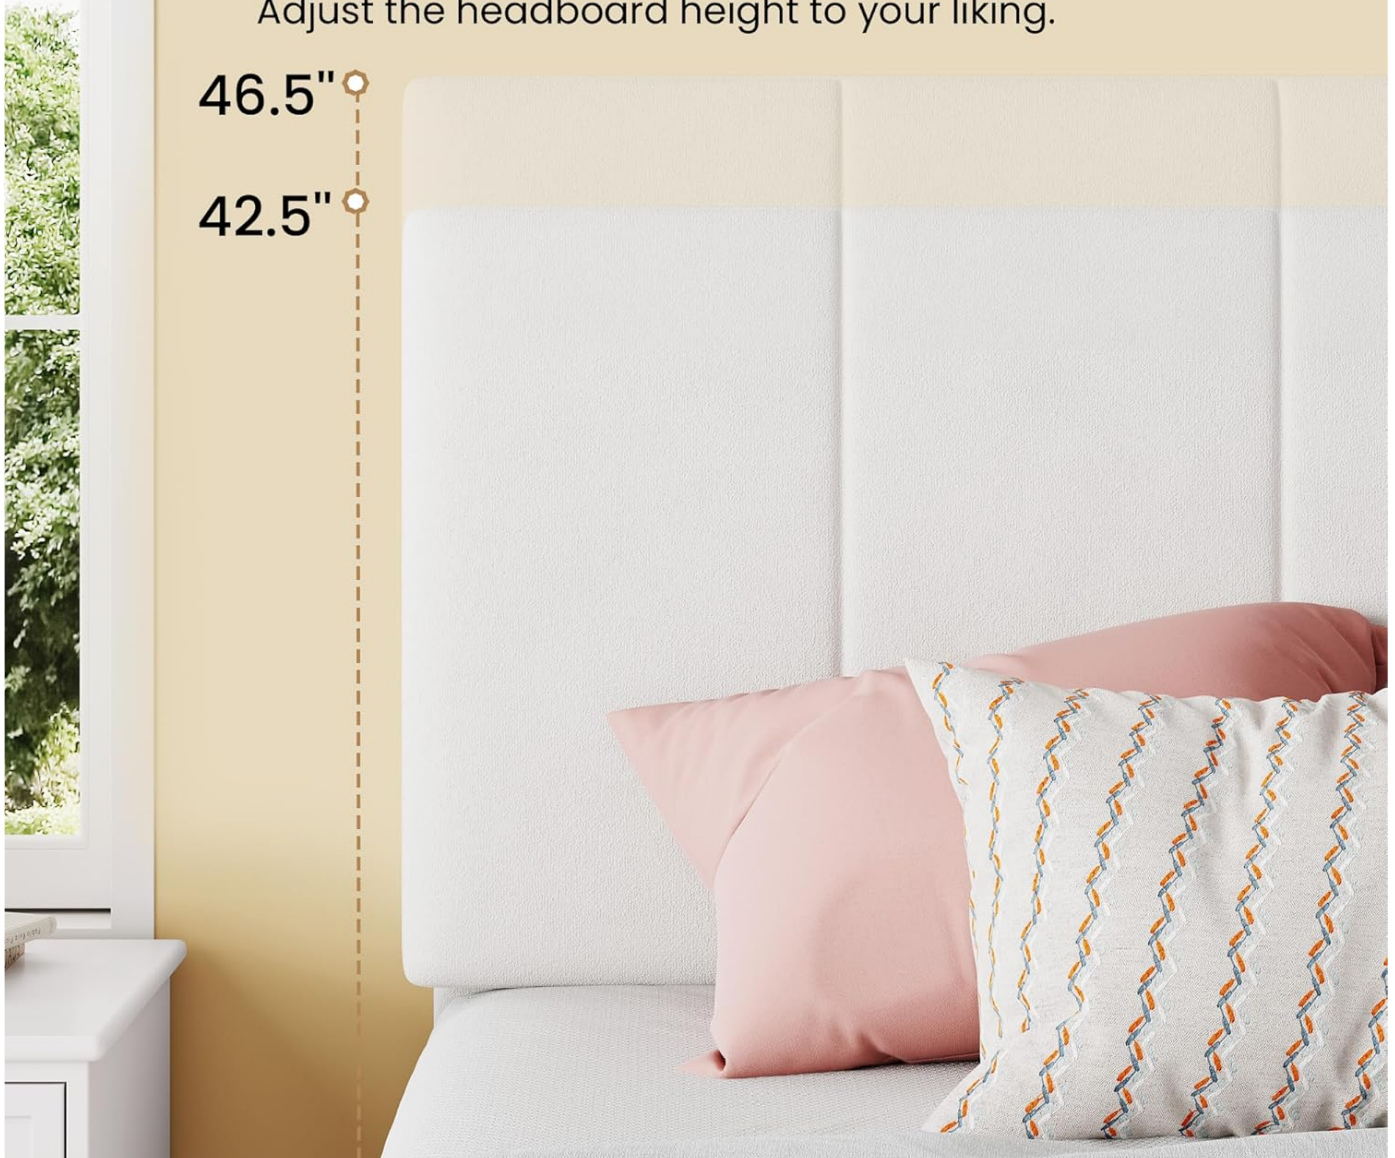

Figure 5.2: Headboard height adjustment options.

The headboard can be set to two different heights:

- **Lower Setting:** 42.5 inches
- **Higher Setting:** 46.5 inches

To adjust the headboard height, you will need to partially disassemble the headboard from the main frame and reattach it at the desired height setting. Refer to your assembly guide for specific instructions on how to safely detach and reattach the headboard at the alternative height.

## 6. MAINTENANCE

Proper care will extend the life and appearance of your SHA CERLIN bed frame.

- **Upholstery Care:** For the velvet upholstery, regularly vacuum with a soft brush attachment to remove dust and debris. For spills, blot immediately with a clean, dry cloth. For stubborn stains, consult a professional upholstery cleaner. Avoid harsh chemicals or abrasive cleaners.

- **Frame Cleaning:** Wipe down the metal and wood components with a damp cloth and mild soap if necessary. Dry immediately with a clean cloth.
- **Hardware Check:** Periodically check all bolts and screws to ensure they remain tight. Re-tighten if necessary to maintain stability and prevent squeaking.
- **Hydraulic System:** The hydraulic lift mechanism is designed for durability and generally requires no special maintenance. If you notice any issues with lifting or lowering, contact customer support. Do not attempt to lubricate or disassemble the hydraulic cylinders yourself.
- **Under-bed Area:** The enclosed design helps keep dust out, but occasional cleaning of the storage area is recommended.

## 7. TROUBLESHOOTING

---

If you encounter any issues with your bed frame, refer to the following common solutions:

Problem	Possible Cause	Solution
Bed frame is wobbly or squeaks	Loose hardware; uneven floor	Check and tighten all bolts and screws. Ensure the bed is on a level surface.
Hydraulic lift mechanism is difficult to operate	Too much weight on the bed; mechanism not fully engaged	Ensure the mattress is the only item on the bed when lifting. Check if the mechanism is properly installed. If issues persist, contact customer support.
Mattress slides on the frame	Protective device not installed or incorrectly positioned	Ensure the anti-slip metal pins (if included) are correctly installed at the foot of the bed to prevent mattress movement.
Headboard is not stable	Loose connections; incorrect height adjustment	Verify that the headboard is securely bolted to the frame at the chosen height setting.

If you are unable to resolve an issue using the troubleshooting guide, please contact SHA CERLIN customer support for assistance.

## 8. SPECIFICATIONS

---

# KING SIZE

Recommend Mattress Height: 10"~14"
