7. Care and Maintenance

Proper care will ensure the longevity and appearance of your eclife bathroom vanity:

- **Cleaning the Cabinet:** Wipe the engineered wood surface with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that can damage the finish. Dry immediately after cleaning.
- **Cleaning the Sink:** Clean the undermount white basin with mild soap and water. Rinse thoroughly and wipe dry to prevent water spots and mineral buildup. Avoid using abrasive pads or strong chemical cleaners on the sink.
- **Faucet Care:** Clean the matte black faucet with a soft cloth and mild soap. Do not use abrasive cleaners, polishes, or waxes, as these can damage the finish.
- **Spills:** Immediately wipe up any spills on the vanity surface to prevent water damage or staining.
- **Humidity:** While the MDF and veneer are water-resistant, maintaining proper ventilation in the bathroom can help prolong the life of the vanity.

8. Troubleshooting

If you encounter issues with your vanity, consider the following common solutions:

- **Loose Doors:** If cabinet doors feel loose or misaligned, check the hinge screws and tighten them gently. Adjust the hinges as per the assembly instructions for proper alignment.
- **Water Leaks:** For any leaks around the faucet or drain, ensure all plumbing connections are securely tightened. If the issue persists, consult a professional plumber.
- **Scratches on Surface:** Minor scratches on the wood finish may be minimized with furniture polish or repair kits designed for engineered wood. For significant damage, contact customer support.
- **Difficulty with Assembly:** If you encounter difficulties during assembly, re-read the instruction manual carefully. Ensure all parts are oriented correctly. Contact customer support if you require further assistance.
