SAFETY INFORMATION

Adherence to the following safety guidelines is crucial for preventing injury and ensuring the longevity of your bunk bed:

- Always use the guardrails on the upper bunk.
- Be cautious of pinch points on the stairs.
- Do not exceed the weight capacity of 200 lbs for the upper bed and 250 lbs for the lower bed.
- Adult assembly is required to ensure stability and prevent collapse.
- Ensure all connections are securely tightened before use and periodically check for tightness.
- Do not allow children under 6 years of age on the upper bunk.
- Use only mattresses that are 6 inches thick or less to maintain proper guardrail height.

SETUP AND ASSEMBLY

The Giantex Full Over Full Bunk Bed requires adult assembly. An installation manual with detailed step-by-step

instructions and diagrams is included with your purchase. Please refer to this manual for specific assembly procedures.

Before You Begin:

- Verify all parts are present by comparing them with the parts list in the included manual. The product typically ships in two boxes.
- Clear a spacious area for assembly. It is recommended to assemble the bed in the room where it will be used, as its size may prevent it from fitting through standard door frames once assembled.
- Gather necessary tools as specified in the assembly manual.

Assembly Tips:

- Follow the instructions sequentially.
- Do not overtighten screws until all components are loosely fitted, then tighten securely.
- Seek assistance from another adult for easier and safer assembly.
