## 6. TROUBLESHOOTING

If you encounter issues with your Krisnorey BT609 adapter, please refer to the following troubleshooting tips:

- **No Bluetooth Icon/Device Not Detected:**

Ensure there are no built-in or external Bluetooth devices previously installed on your computer. If there are, disable all existing Bluetooth devices in "Device Manager" (as described in Section 3.1), then re-insert the BT609 adapter.

- **Pairing Issues:**

Make sure your target Bluetooth device is in pairing mode and within range. Try restarting both your computer and the Bluetooth device.

- **Intermittent Connection/Poor Range:**

The actual transmission range can be affected by physical obstructions (walls, metal objects) and wireless interference (e.g., Wi-Fi routers, other 2.4GHz devices). Try moving the adapter or your connected device to a different location. Ensure the antenna is positioned optimally.

- **Driver Problems (Windows 7):**

If using Windows 7, confirm that the correct drivers have been installed and your computer has been restarted after installation. Re-installing the drivers may resolve issues.

- **Incompatible Devices:**

Note that the BT609 adapter is not compatible with Windows 8/XP/Vista/Linux/MacOS/TV/Car Stereo/Home Stereo. It also does not work with ordinary 2.4GHz non-Bluetooth keyboards and mice.
