SUNCREAT Universal Steel Hammock Stand Instruction Manual

Model: B0FNC6K9S4

INTRODUCTION

Thank you for choosing the SUNCREAT Universal Steel Hammock Stand. This manual provides essential information for the safe and efficient assembly, operation, and maintenance of your hammock stand. Please read these instructions carefully before use and retain them for future reference.

SAFETY INFORMATION

- **Weight Capacity:** Do not exceed the maximum weight capacity of 475 pounds (approximately 2-3 people). Overloading can cause structural failure and injury.
- **Stable Surface:** Always set up the hammock stand on a flat, level, and stable surface to prevent tipping.
- **Regular Inspection:** Before each use, inspect all components for wear, damage, or loose connections. Do not use if any part is compromised.
- **Children and Pets:** Keep children and pets away from the hammock stand during assembly and ensure they are supervised when near the hammock during use.
- **Weather Conditions:** Avoid using the hammock stand in strong winds or severe weather. Store indoors or cover during prolonged periods of non-use or inclement weather.
- **Hammock Compatibility:** Ensure your hammock is compatible with the stand's dimensions (9.5 to 14 feet long). An improperly sized hammock can lead to instability or sagging.

PACKAGE CONTENTS

Before assembly, verify that all parts are present and undamaged. If any parts are missing or damaged, please contact customer support.

- Hammock Stand Components (various steel tubes)
- 2 x S Hooks
- 2 x Steel Chains
- Assembly Hardware (screws, plastic protectors)

Heavy Duty Hammock Stand

Widened Tube

High Quality Screws

Reinforced Connector

Plastic Protector

Dimensions

Please check the length of your hammock before your purchase.

Fits any 9.5 ft. to 14 ft. hammocks

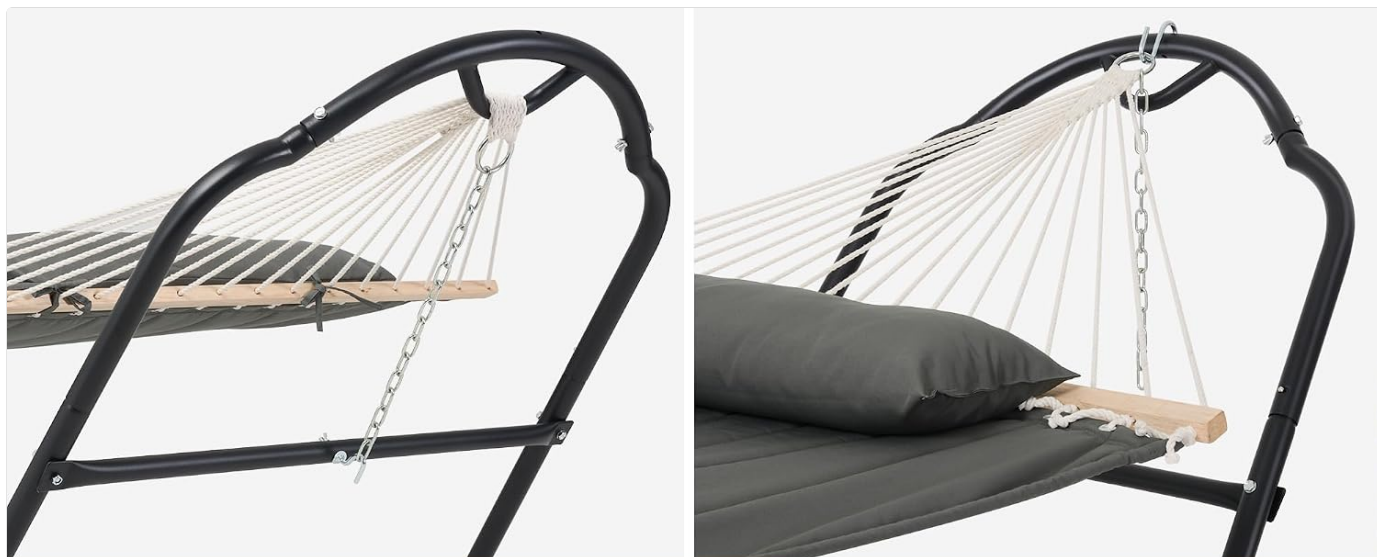

Image: Included hanging accessories, consisting of two steel chains and two S hooks, used for attaching and adjusting the hammock.

SETUP AND ASSEMBLY

The SUNCREAT Universal Steel Hammock Stand is designed for easy assembly without the need for additional tools. Follow these steps:

1. Unpack all components and lay them out on a clean, flat surface.
2. Connect the main frame sections by aligning the tubes and securing them with the provided screws. Ensure all connections are tight and secure.
3. Attach the widened arc poles to the main frame, ensuring the reinforced connectors are properly engaged.
4. Place the non-slip plastic protectors on the bottom of the stand's feet.
5. Once the stand is fully assembled, attach your hammock using the provided S hooks and steel chains. Adjust the chain length to achieve the desired hammock height and tension.

Dual-use for Hammocks of Different Size

OPERATING INSTRUCTIONS

This hammock stand is designed to provide a stable and comfortable support for various hammock types. It accommodates hammocks ranging from 9.5 to 14 feet in length.

Hammock Compatibility

The stand is compatible with Mayan, Brazilian, camping, or spreader bar style hammocks. When selecting a hammock, consider its material and stretch properties. Some rope or fabric hammocks may stretch significantly, causing them to hang lower than expected. Adjust the steel chains to compensate for hammock stretch and ensure adequate ground clearance.

Usage

Once your hammock is securely attached and adjusted, you can safely use the stand. Always enter and exit the hammock carefully. The stand's widened arc pole and reinforced structure contribute to its stability, supporting up to 475 pounds.

MAINTENANCE

Proper maintenance ensures the longevity and safe operation of your hammock stand.

- **Cleaning:** Wipe down the steel frame with a damp cloth and mild soap as needed. Avoid abrasive cleaners that could damage the finish.
- **Rust Prevention:** While the steel is designed for outdoor use, prolonged exposure to moisture can lead to rust. Dry the stand thoroughly after rain and consider applying a rust-inhibiting spray periodically.
- **Storage:** During off-season or extended periods of non-use, disassemble the stand and store it in a dry, protected area to prevent weather damage.
- **Hardware Check:** Periodically check all screws and connections to ensure they remain tight. Tighten any loose hardware.

TROUBLESHOOTING

Hammock Sags Too Low

- **Check Hammock Length:** Ensure your hammock is within the recommended length of 9.5 to 14 feet.
- **Adjust Chains:** Use the provided steel chains to shorten the hanging distance and raise the hammock.
- **Hammock Material:** Some hammock materials, especially rope or certain fabrics, may stretch significantly over time. Consider a less stretchy hammock if persistent sagging occurs.

Stand Feels Unstable

- **Level Surface:** Verify that the stand is placed on a completely flat and level surface. Uneven ground can cause wobbling.
- **Tighten Connections:** Re-check all assembly screws and connections to ensure they are fully tightened.
- **Weight Distribution:** Ensure weight in the hammock is distributed evenly and does not exceed the 475-pound capacity.

Missing or Damaged Parts

If you encounter missing parts or manufacturing defects, please contact SUNCREAT customer support immediately for assistance.

SPECIFICATIONS

Feature	Detail
Model Number	B0FNC6K9S4
Brand	SUNCREAT
