Detailed diagram of the camera's buttons and ports.

4. SETUP

4.1. Battery Installation and Charging

The camera comes with two rechargeable 1000mAh batteries. Ensure at least one battery is charged before use.

1. Open the battery cover located on the side of the camera.
2. Insert a charged battery into the compartment, ensuring the metal contacts align. The battery is designed with a notch to prevent incorrect insertion.
3. Close the battery cover securely.
4. To charge, connect the camera to a power source using the provided Type-C USB cable. The indicator light will show charging status. A steady bright red light indicates charging, while a dim, flickering light indicates an issue.

Easy Battery Installation & Charging Tips

Step 1: Open battery cover.

Step 2: Insert battery (metal side)

INSTALLING THE BATTERY

Correct: Bright red, steady

Wrong: Dim red, flickering

CHARGING LIGHT STATUS

Steps for battery installation and charging status indicators.

4.2. SD Card Insertion

A 32GB SD card is included for storage. Insert it into the designated slot next to the battery compartment until it clicks into place.

5. OPERATING INSTRUCTIONS

5.1. Power On/Off

- **Power On:** Press and hold the power button for 1 second.
- **Power Off:** Press and hold the power button for 1 second. The camera will also automatically shut down after a preset period of inactivity to conserve battery.

5.2. Taking Photos

The camera captures 56MP photos with natural color and clear details.

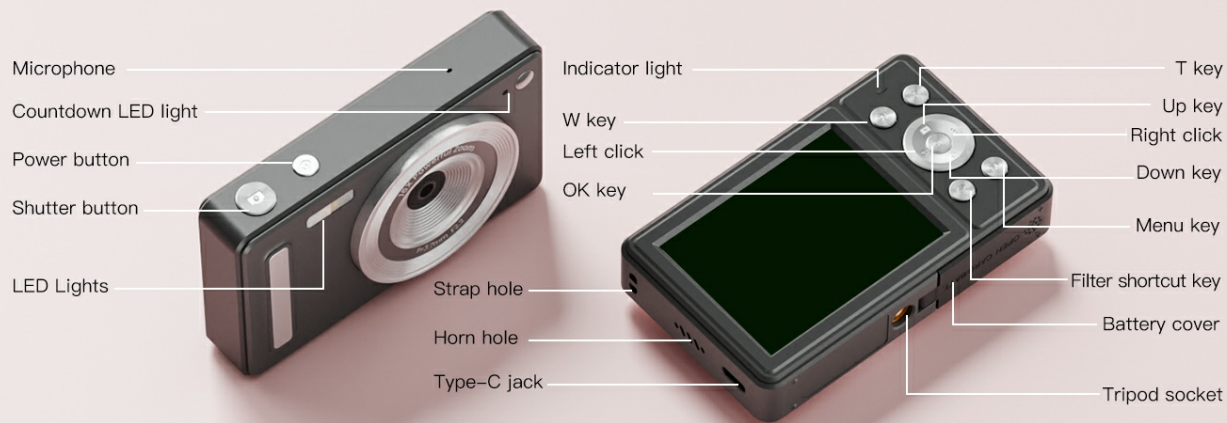

- **Shutter Button:** Press the shutter button to take a photo.
- **16X Digital Zoom:** Use the W/T buttons to zoom in or out on your subject.
- **Anti-Shake:** This feature helps stabilize your shots, reducing blur from camera movement.
- **Face Detection:** The camera can automatically detect and focus on faces.
- **Self-Timer:** Set a delay (2s, 5s, or 10s) before taking a photo, useful for group shots or selfies.
- **Filters:** Explore 20 fun filters to add artistic effects to your photos.
- **Scene Modes:** Choose from 7 scene modes (e.g., Auto, Scenery, Portrait, Night Portrait, High Sensitivity, Beach) to optimize settings for different environments.
- **Built-in Flash:** Use the flash for bright and clear photos in low-light conditions.

Self Timer

Utilize 16X digital zoom to capture distant subjects.

Get to Know Your Camera

The anti-shake function helps keep your photos clear and sharp.

Set the self-timer for convenient photo capture.

Select from various scene modes to enhance your photos.

5.3. Recording Videos

Capture smooth FHD 1080P videos.

- Switch to video mode using the mode button.
- Press the shutter button to start and stop recording.

Record full HD 1080P videos to capture life in motion.

5.4. Viewing and Deleting Content

Use the navigation buttons to browse through your photos and videos. The menu button allows you to delete individual items or all content.

6. CONNECTING TO A COMPUTER

The camera can be connected to a computer for file transfer or used as a webcam.

- **File Transfer:** Connect the camera to your computer using the Type-C USB cable. The camera will appear as a removable disk, allowing you to easily transfer photos and videos.

- **Webcam Function:** When connected to a computer, the camera can be selected as a webcam for live streaming or video calls.

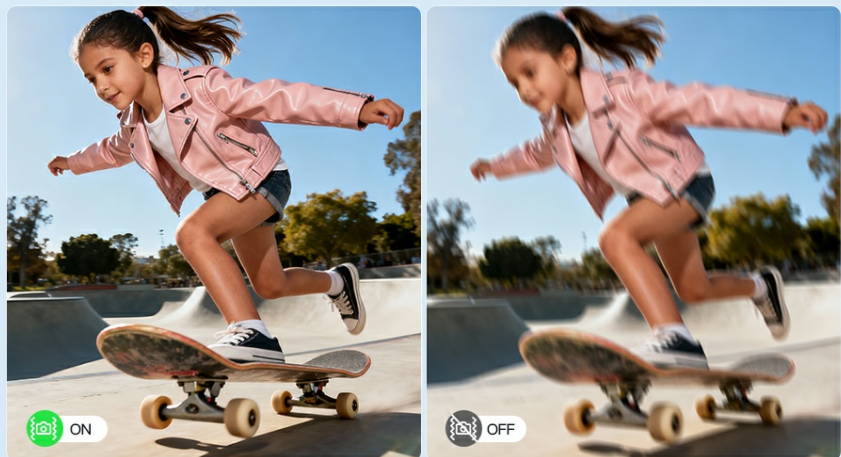

Built-in Flash Light

Capture bright and clear photos, even in low light.

Easily transfer files to your computer using the included USB-C cable.

Anti-Shake Function

Keeps your shots clear and sharp, even when you're on the move.

Use the camera for webcam live streaming or video calls.

7. MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the camera body. For the lens, use a specialized lens cleaning cloth and solution.
- **Battery Care:** To prolong battery life, fully charge the batteries before first use and store them in a cool, dry place when not in use. The auto power-off function helps conserve battery during idle periods.
- **Storage:** Store the camera in its protective bag when not in use to prevent scratches and damage.

8. TROUBLESHOOTING

If you encounter issues with your camera, refer to the following common solutions:

Problem	Solution
Camera does not power on	Ensure the battery is correctly inserted and fully charged.
Cannot take photos/videos	Check if the SD card is inserted correctly and has sufficient free space. Ensure the battery has enough charge.
Images are blurry	Ensure the anti-shake function is enabled. Hold the camera steady while shooting. Check lighting conditions.
Camera freezes	Remove and reinsert the battery to reset the camera.
Files not transferring to computer	Ensure the Type-C USB cable is securely connected to both the camera and the computer. Try a different USB port or cable.
