ASSEMBLY INSTRUCTIONS

Assembly is designed to be straightforward and can typically be completed by one person in approximately 20 minutes. Follow these steps carefully.

Step 1: Prepare the Area and Unpack

Clear a spacious area for assembly. Unpack all components and lay them out on a soft, clean surface to prevent scratches.

Step 2: Assemble the Main Frame

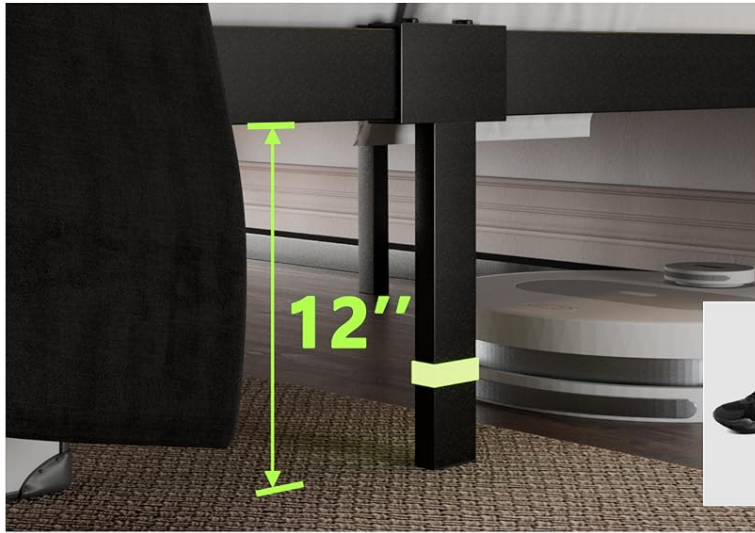

The footrest and headboard sections of the main frame are designed for quick connection. Connect these pieces using the provided hardware. Ensure all connections are snug but do not overtighten initially.

Step 3: Install the Steel Slats

Insert the heavy-duty steel slats into the designated buckles on the bed frame. Press them firmly until they click into place. This 'one-click' buckle system secures the slats without requiring additional tools and helps prevent noise.

Ample Under-bed Storage Space

The crossbars at the end of the bed will keep your storage boxes, luggage and other items well regulated and ordered.

Step 4: Final Tightening and Safety Checks

Once all components are in place, go back and securely tighten all bolts and screws. Ensure the frame is stable and level. The frame includes EVA mute foam strips to prevent noise and anti-scratch protection, and soft foam corners for added safety.

USAGE GUIDELINES

Mattress Placement

Place your full-size mattress directly onto the steel slats. A box spring is not required for this platform bed frame.

Under-bed Storage

The bed frame provides 12 inches of clearance underneath, offering ample space for storage boxes, luggage, or other items. This helps maintain a tidy living space.

MAINTENANCE

- **Cleaning the Headboard:** The faux leather headboard is water and oil proof, and stain resistant. Wipe clean with a damp cloth and mild soap if necessary. Avoid harsh chemicals.
- **Cleaning the Frame:** Wipe the metal frame with a soft, dry cloth. For tougher spots, a slightly damp cloth can be used, followed by immediate drying.

- **Regular Checks:** Periodically inspect all bolts and connections to ensure they remain tight. Tighten as needed to maintain stability and prevent noise.
- **Avoid Excessive Moisture:** Do not expose the bed frame to excessive moisture or humidity, as this can affect the material and finish.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Bed frame is squeaking or making noise.	Loose connections; slats not fully engaged.	Tighten all bolts and screws. Ensure all slats are securely clicked into their buckles. The EVA mute foam should minimize noise.
Bed frame feels unstable or wobbly.	Loose hardware; uneven floor.	Re-tighten all assembly hardware. Ensure the bed is on a level surface. If the floor is uneven, use shims under the legs.
Missing parts during unboxing.	Packaging error.	Contact Feonase customer support immediately with your purchase details.
