# Electactic 1500W Portable Oil-Filled Radiator Heater User Manual

MODEL: 36205HOR0

## 1. Important Safety Instructions

Please read this entire instruction manual before using your Electactic Portable Oil-Filled Radiator Heater. Failure to follow these instructions may result in fire, electric shock, injury to persons, or property damage. Keep this manual for future reference.

- Always plug heaters directly into a wall outlet/receptacle. Never use with an extension cord or relocatable power tap (outlet/power strip).
- This heater is hot when in use. To avoid burns, do not let bare skin touch hot surfaces. Use handles when moving this heater.
- Keep combustible materials, such as furniture, pillows, bedding, papers, clothes, and curtains at least 3 feet (0.9 m) from the front of the heater and keep them away from the sides and rear.
- Extreme caution is necessary when any heater is used by or near children or invalids and whenever the heater is left operating and unattended.
- Do not operate any heater with a damaged cord or plug or after the heater malfunctions, has been dropped or damaged in any manner. Discard heater, or return to authorized service facility for examination and/or repair.
- Do not use outdoors.
- To disconnect heater, turn controls to OFF, then remove plug from outlet.
- Do not insert or allow foreign objects to enter any ventilation or exhaust opening as this may cause an electric shock or fire, or damage the heater.
- To prevent a possible fire, do not block air intakes or exhaust in any manner. Do not use on soft surfaces, like a bed, where openings may become blocked.
- A heater has hot and arcing or sparking parts inside. Do not use it in areas where gasoline, paint, or flammable liquids are used or stored.
- Use this heater only as described in this manual. Any other use not recommended by the manufacturer may cause fire, electric shock, or injury to persons.
- This heater includes an Overheat Protection System and a Tip-Over Safety Switch that automatically shuts off the unit if it overheats or is accidentally knocked over.
- Ensure the heater is placed on a firm, level surface to prevent accidental tipping.

## 5. Maintenance

### 5.1 Cleaning

- Always unplug the heater from the power outlet and allow it to cool completely before cleaning.
- Wipe the exterior surfaces of the heater with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- Do not immerse the heater in water or allow water to drip into the interior of the heater.
- Clean the air intake and exhaust vents regularly with a vacuum cleaner or a soft brush to remove dust and lint.

### 5.2 Storage

- When not in use, store the heater in a cool, dry place.
- Utilize the built-in cord storage to neatly wrap the power cord, preventing tangles and damage.
- It is recommended to store the heater in its original packaging to protect it from dust and damage.

## 6. Troubleshooting

---

If your heater is not operating correctly, please refer to the following common issues and solutions:

Problem	Possible Cause	Solution
Heater does not turn on.	No power to the unit. Thermostat set too low. Tip-over switch activated.	Check if the power cord is securely plugged into a working outlet. Increase the thermostat setting. Ensure the heater is on a flat, stable surface and upright.
Heater turns off unexpectedly.	Overheat protection activated. Tip-over switch activated.	Unplug the heater, let it cool for 30 minutes, then clear any obstructions from vents. Re-plug and restart. Ensure the heater is on a flat, stable surface and upright.
Heater is not producing enough heat.	Heat setting too low. Thermostat set too low. Room size is too large for the selected setting.	Increase the heat setting (I, II, or III). Increase the thermostat setting. Use the 1500W (High) setting for larger rooms or consider using multiple heaters for very large spaces.

If the problem persists after trying these solutions, please contact Electactic customer support.
