- **Unstable Structure:** If the bed feels wobbly after assembly, re-check all connections. Ensure every bolt and screw is fully tightened. Verify that the bed is placed on a level surface.
- **RGB Lighting Not Working:** Check that the LED strip is properly connected to its power source and that the power adapter is plugged into a functional outlet. Ensure the remote control (if applicable) has working batteries.
- **USB Port Not Charging:** Verify that the USB port's power cable is securely connected and that the power source is active. Try a different USB cable or device to rule out device-specific issues.
