Key Features:

- **Fast Ice Production:** Produces ice in approximately 5 minutes, with a daily output of up to 40 lbs.
- **Soft Nugget Ice:** Creates chewable, pellet-style ice.
- **Self-Cleaning Function:** Automated cleaning for hygiene.
- **Compact Design:** Space-saving dimensions for countertops.
- **Water Recycling System:** Melts ice is reused to minimize water waste.

Setup

1. Placement

Place the ice maker on a stable, level surface. Ensure there is adequate space (several inches) on the sides and back of the unit for proper ventilation. This is crucial for the appliance's cooling system and efficient operation.

2. Initial Cleaning

Before first use, it is recommended to perform a self-cleaning cycle. Refer to the "Maintenance" section for detailed instructions on using the self-cleaning function.

3. Add Water

Open the top lid and fill the water reservoir with potable water up to the maximum fill line. The unit does not connect to an external water source, so manual refilling is required.

Operating Instructions

1. Making Ice

1. Ensure the water reservoir is filled.
2. Press the **ICE** button on the control panel to start the ice-making process.
3. The first batch of ice will be ready in approximately 5 minutes.

2. Indicators

- **ICE FULL:** The indicator light will illuminate when the ice basket is full, and the machine will automatically pause ice production to prevent overflow and conserve energy.
- **ADD WATER:** The indicator light will illuminate when the water level in the reservoir is low, prompting you to refill.
- **LIGHT:** Press the **LIGHT** button to turn the internal light on or off, allowing you to view the ice production.

3. Scooping Ice

You can access the ice in two ways:

- Open the top cover to scoop ice directly from the ice basket.
- Pull out the front ice basket to scoop ice.

MAINTENANCE

1. Self-Cleaning Function

The ice maker features an automatic self-cleaning function. To activate:

1. Ensure the water reservoir is filled.
2. Press the **CLEAN** button on the control panel.
3. The cleaning cycle takes approximately 10 minutes.

2. Descaling

To prevent mineral buildup, especially in hard water areas, descaling is recommended:

- **Moderately Hard Water Areas:** Descale once a month.
- **Hard to Very Hard Water Areas:** Descale every two or three weeks.

Consult your local water provider for information on water hardness in your area.

Troubleshooting

If you encounter issues with your ice maker, please refer to the following common solutions:

- **No Ice Production:** Check if the water reservoir is filled and if the**ICE** button has been pressed. Ensure the unit is plugged in and receiving power.
- **"ADD WATER" Indicator On:** Refill the water reservoir to the maximum fill line.
- **"ICE FULL" Indicator On:** Empty the ice basket. The machine will resume ice production automatically.
- **Ice Melts Quickly:** This ice maker is not a freezer. Ice will melt over time. The melted water is recycled. For long-term storage, transfer ice to a freezer.
- **Unusual Noise:** Ensure the unit is on a stable, level surface. Check for any obstructions in the ice-making

mechanism.

- **Poor Ice Quality:** Perform a self-cleaning cycle and consider descaling if you are in a hard water area. Use filtered or distilled water for best results.
