BLOKEES Marvel Infinity Saga Champion Class Iron Man MK85 Model Kit Instruction Manual

Model: 73923

INTRODUCTION

This manual provides detailed instructions for the assembly, operation, and maintenance of your BLOKEES Marvel Infinity Saga Champion Class Iron Man MK85 Model Kit. This officially licensed collectible faithfully recreates Iron Man MK85 from Marvel's Avengers: Endgame, featuring screen-accurate details, an LED lighting system, and extensive articulation. Please read all instructions carefully before beginning assembly.

IMPORTANT SAFETY INFORMATION

WARNING: CHOKING HAZARD – Small parts. Not for children under 3 years.

This product contains small components that may pose a choking hazard. Keep all parts out of reach of small children. Recommended age for assembly and use is 14 years and older. Adult supervision is recommended for younger users within the recommended age range.

PACKAGE CONTENTS

Please verify that all components listed below are present in your package:

- Iron Man MK85 Model Kit x 1 (149 pieces for standard, 167 pieces for DX version)
- Weapon Accessories x 1 (Includes Dorsal Wing Thruster, Energy Knife, Arm Nano Cannonball)
- Interchangeable Hand x 6
- Instruction Booklet x 1 (This document)

SETUP AND ASSEMBLY

The Iron Man MK85 Model Kit features a tool-free assembly design with pre-coated parts, ensuring an effortless and beginner-friendly experience. No glue or paint is required.

1. **Unpack Components:** Carefully remove all parts from the packaging. Organize them by part number or type to

facilitate assembly.

2. **Identify Parts:** Refer to the included diagram (if applicable, or follow the visual cues in this manual) to identify each component.
3. **Snap-Off Panel Design:** Parts are designed to snap off from their runners without the need for cutting tools. Gently twist or bend the part at its connection point to detach it. Avoid excessive force to prevent damage.
4. **Assemble Body Sections:** Follow the sequential steps outlined in the visual guide (refer to the images below for the final appearance). Begin with the torso, then attach limbs, and finally the head. Ensure all connections are secure.
5. **Install LED Unit:** The chest and eyes feature an LED lighting system. Carefully install the required batteries (not included, typically button cell batteries) into the designated compartments, usually located in the head and chest. Ensure correct polarity.
6. **Attach Accessories:** Once the main figure is assembled, attach the Dorsal Wing Thruster, Energy Knife, Arm Nano Cannonball, and interchangeable hands as desired. These accessories are designed for easy attachment and removal.

OPERATING AND FEATURES

- **Light-Up Chest and Eyes:** After installing batteries, locate the small switch or button on the back or chest of the figure to activate the LED lighting system. The iconic Arc Reactor and eyes will glow.
- **Articulation:** The model features 39 points of articulation, including chassis, butterfly shoulders, chest drop-down joints, and dual ball-jointed wrists. Carefully manipulate these joints to achieve dynamic and screen-accurate poses. Avoid forcing joints beyond their natural range of motion.
- **Interchangeable Accessories:** The included Dorsal Wing Thruster, Energy Knife, Arm Nano Cannonball, and various interchangeable hands can be swapped to customize the figure's appearance and recreate different scenes. Ensure accessories are firmly attached to prevent accidental detachment.

MAINTENANCE

- **Cleaning:** To clean the model, gently wipe it with a soft, dry cloth. For stubborn dust, a slightly damp cloth can be used, followed by immediate drying. Avoid abrasive cleaners or solvents, as these can damage the pre-coated finish.
- **Storage:** Store the model in a cool, dry place away from direct sunlight and extreme temperatures to prevent material degradation or discoloration.
- **Battery Replacement:** If the LED lights dim or stop working, replace the batteries in the designated compartments. Dispose of old batteries responsibly.

- **Handling:** Handle the model with care, especially when posing or changing accessories, to avoid stress on joints or small parts.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Parts do not fit together	Incorrect part orientation or minor molding flash.	Ensure parts are oriented correctly. Gently apply pressure. If minor flash is present, carefully remove with a hobby knife (adult supervision recommended).
LED lights do not turn on	Batteries not installed, incorrect polarity, or depleted batteries.	Check battery installation and polarity. Replace with fresh batteries. Ensure the power switch is in the "ON" position.
Joints are too loose or too tight	Manufacturing variance or wear over time.	For loose joints, a thin layer of clear nail polish or a small piece of tissue paper can be used to add friction. For tight joints, gently work them back and forth. Do not force.
