- **Sisal Posts:** The sisal material is designed for scratching. Over time, it will show wear. This is normal. Replace posts if they become too frayed or damaged.
- **Stability Check:** Periodically check all screws and connections to ensure they remain tight. Re-tighten as necessary to maintain stability.

7. TROUBLESHOOTING

- **Tree is Wobbly:** Ensure the cat tree is on a flat surface. Check and tighten all screws, especially those connecting the posts to the platforms and base.
- **Cat Not Using Scratching Posts:** Try sprinkling catnip on the sisal posts to attract your cat. Gently guide your cat's paws to the posts to demonstrate.
